<sup>1</sup> Data from the Cities of Long Beach and Pasadena are included. Rates based on observations fewer than 12 may not be reliable.

<sup>2</sup> Data are provisional due to reporting delay.

<sup>3</sup> Overall syphilis rate does not include congenital syphilis cases.

<sup>4</sup> Early syphilis includes primary, secondary and early non-primary, non-secondary (previously early latent) syphilis.

<sup>5</sup> In January 2018, surveillance language was modified. 'Early Latent' was changed to 'Early Non-primary, Non-secondary' and 'Late Latent or Late' was changed to 'Unknown Duration or Late' syphilis.

<sup>6</sup> Rate calculated per 100,000 live births. 2018 rates are calculated using 2017 denominators as a proxy as 2018 denominators are not yet available. 2018 rate will be updated when the data become available.

<sup>7</sup> Rates cannot be calculated due to a lack of reliable denominator data. Includes both male-to-female and female-to-male transgender individuals.
