Learning and Communication Series

SNF Honors Program, ICAR
Review, SNF Symposium,
PSIE

**Presented by: Chandana Das, MD, Marco
Marquez, MPH, CIC, Walteena Brooks,
LVN, Eileen Wong, PhD, MS**

Acute Communicable Disease Control (ACDC) Program

Los Angeles County Department of Public Health

LACDPH Infection Preventionist Team

- Jehan Mephors, RN
- Marco Marquez, MPH, CIC
- Walteena Brooks, LVN

Contact Us: LACSNF@ph.lacounty.gov

Website:

<http://publichealth.lacounty.gov/acd/AskAnIPProgram/index.htm>

Disclosures

- There is no commercial support for today's call
- Neither the speakers nor planners of today's call have disclosed any financial interests related to the contents of this meeting
- This call is meant for healthcare facilities and is off the record, reporters should log off now

Housekeeping

- **Microphones** are disabled. For questions, please use the chat
- **Cameras:** please keep them turned off during the presentation
- **Recording:** the presentation is being recorded and will be posted on the Ask an IP Website within a few weeks following the session
- We will not review COVID-19 guidelines (including CDPH AFLs) during these sessions

Objectives

- Review the LAC DPH SNF Honors Program
- Review the goals of an Infection Control Assessment and Response (ICAR) tool
- Describe the process of conducting an ICAR
- Share resource for LAC SNFs to enroll in an ICAR from the LAC DPH IP Team
- Share information regarding the 2024 SNF Symposium
- Describe the Patient Safety Information Exchange (PSIE)

SNF Honors Program

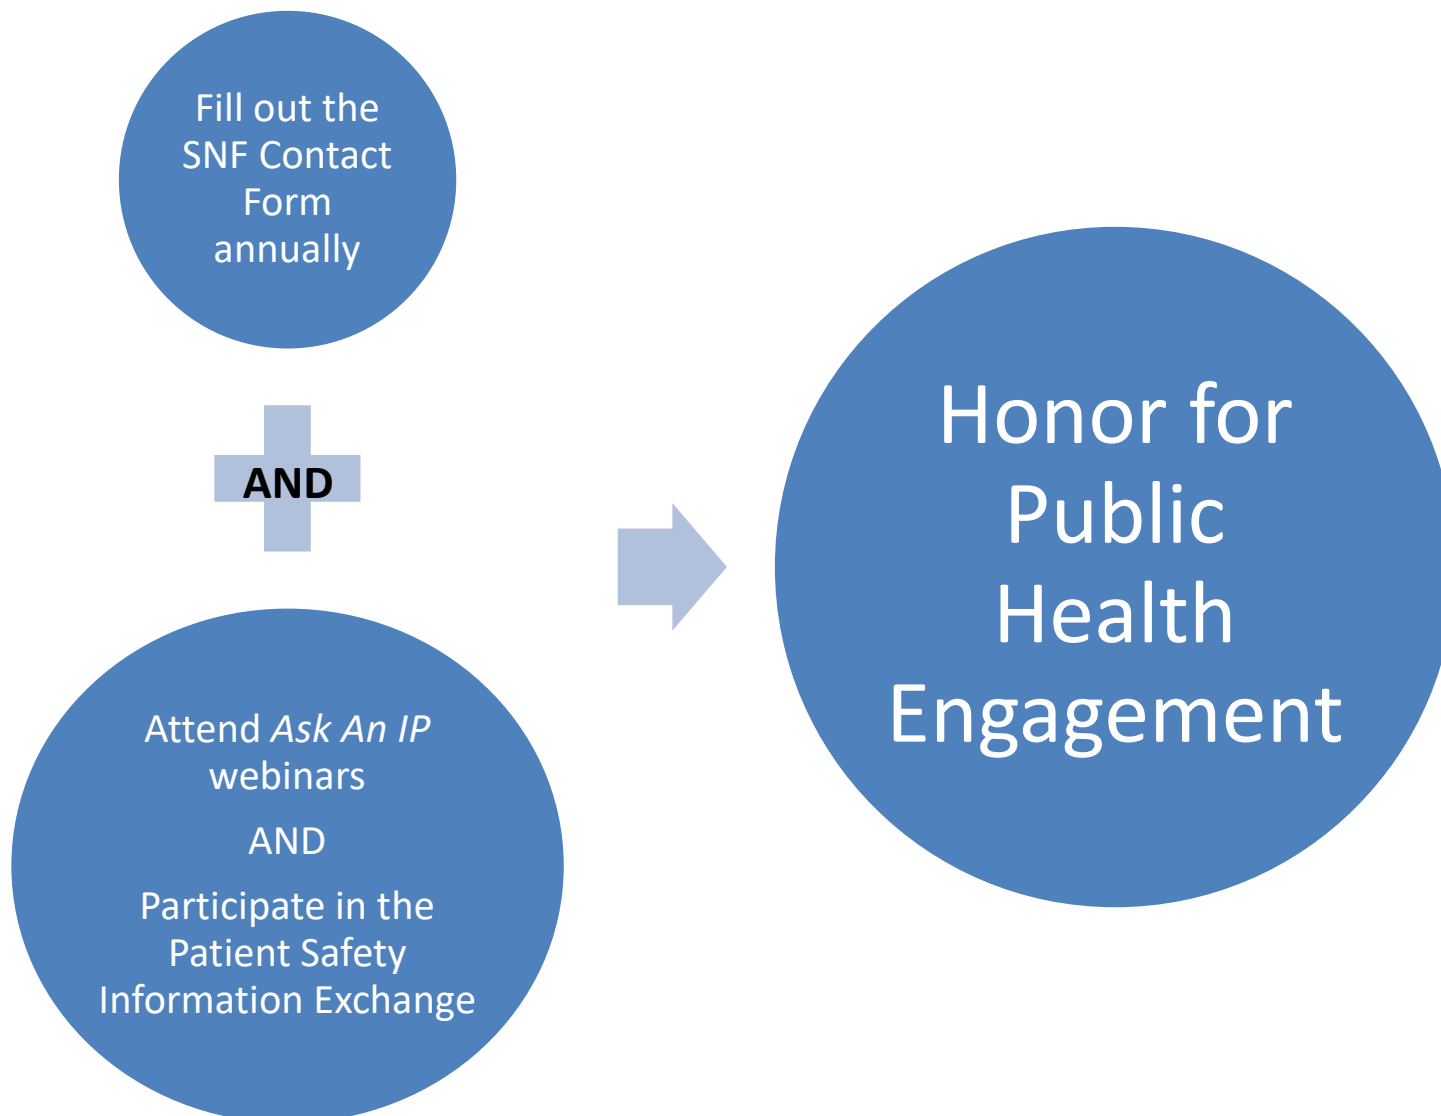

Honors Categories

- Public Health Engagement
- Vaccination Coverage
- Infection Preventionist Professional Development
- Preventive Action

Public Health Engagement

Vaccination Coverage

Honor for achieving at least 2/3

Resident
COVID-19
vaccination
rate $\geq 80\%$

Staff
COVID-19
vaccination
rate $\geq 80\%$

Staff
Influenza
vaccination
rate $\geq 90\%$

Honor for Infection Preventionist Professional Development

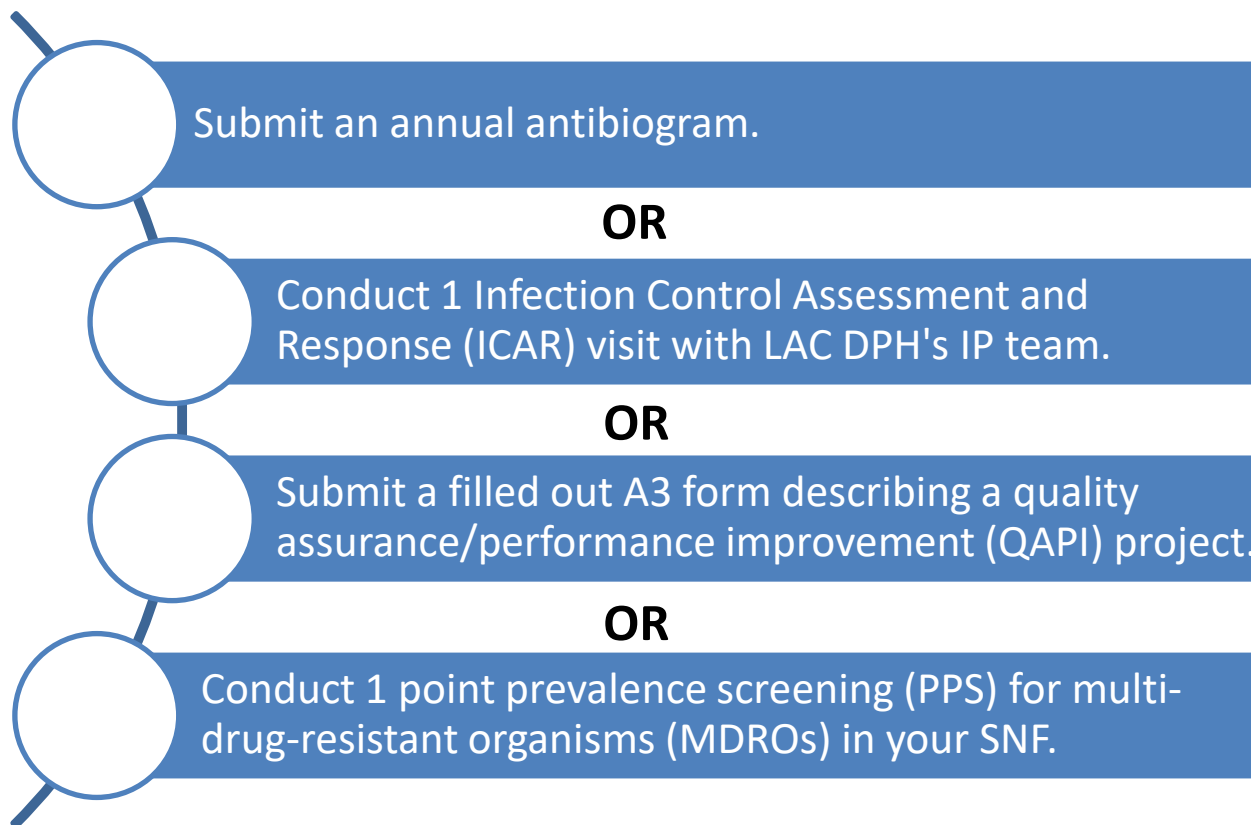

- One IP with national certification from the Certification Board of Infection Control (CBIC).
 - a-IPC: Associate Infection Prevention and Control
 - LTC-CIP: Long-Term Care Certification in Infection Prevention
 - CIC: Certification in Infection Control
 - BCIDP: Board Certified Infectious Disease Pharmacist

AND

- One IP who has been working at the SNF for 1 year or more.

Both criteria do not need to be met by the same IP.

Honor for Preventive Action

Review of SNF ICAR Process

What is an ICAR?

- ICAR = Infection Control Assessment and Response
 - Gap Analysis: identify the gap between what should be happening for infection prevention and control (IPC) and what is currently being done for IPC
 - Tool for assessing your facility's IPC practices
 - Tool for guiding your facility's QAPI program/projects

Goals of an ICAR

- Assess your facility's IPC practices
- Guide your facility's QAPI programs
- Identify your facility's capacity to detect and address HAIs and outbreaks

ICAR Process

- Identify a need for an ICAR
- Schedule the ICAR
- Conduct the ICAR
- Disseminate findings and feedback
- Follow up on feedback

*IP plays a significant role at each part of the process

ICAR Process: Identify a Need

- Examples include:
 - Increase in HAIs
 - New staff, new IP
 - Preparation for a regulatory survey
 - Facility goal of completing ICARs at a specific frequency (e.g., yearly)
 - As part of an Annual Risk Assessment that is used to update IP plan on an annual basis

ICAR Process: Facility-Wide vs Targeted ICAR

Facility-wide ICAR	Targeted ICAR
<ul style="list-style-type: none">• Comprehensive snapshot of your facility's IPC practices	<ul style="list-style-type: none">• Deep dive into specific units, departments, IPC practices
<ul style="list-style-type: none">• Unknown reason for poor IPC practices	<ul style="list-style-type: none">• Known reasons for poor IPC practices
<ul style="list-style-type: none">• Unknown state of IPC practices	<ul style="list-style-type: none">• Previous interventions did not yield improvement
<ul style="list-style-type: none">• Outbreak or increased transmission seen throughout facility	<ul style="list-style-type: none">• Outbreak or increased transmission seen in specific areas within facility

ICAR Process: Schedule

- Internal: Facility is conducting their own ICAR, IP is typically responsible for leading the ICAR
 - IP is accompanied by other team leads (e.g., nursing, supervisors, EVS, dietary, maintenance)
- External: the IP is typically the liaison for scheduling external gap analysis between internal and external teams
 - Ex. LAC DPH
 - Ex. External consultant

ICAR Process: Conducting the ICAR

- Materials needed to conduct ICAR:
 - Trained staff who are familiar with IPC best practices and direct observation instructions
 - ICAR tool (electronic or paper)
 - Fluorescent marker and uv flashlight if conducting fluorescent marker observations or observing environmental cleaning and disinfection
- Types of ICAR questions:
 - Close ended: yes or no
 - Open ended: free text or prompt a longer response
 - Interview (verbal)
 - Observation (audit)

ICAR Process: What are the areas covered in the ICAR?

- Modules include:
 - Demographics
 - IPC Program
 - Training, Auditing, Feedback
 - Hand Hygiene
 - Antimicrobial Stewardship Program
 - Standard and Transmission Based Precautions
 - Dietary
 - Wound Care
 - Occupational Health
 - And More!!!

ICAR Process: Disseminating Information

- Once you complete the entire assessment, the IP should collect and organize findings and feedback
- You can work together with your QAPI team and other department leads to prioritize interventions and agree on project deadlines
- Disseminate your ICAR findings and feedback:
 - All staff
 - Electronic, paper, verbal
 - Celebrate the good!

ICAR Process: Follow Up

- Regularly meet with teams and assist them with their IPC interventions (based on findings and feedback)
- As QAPI projects wrap up, complete a focused ICAR (gap analysis)
- Document bridged gaps
- Disseminate your improved findings

Establish Your Own Goal

We invite you to start the ICAR process

1. When do you want to complete your ICAR by?
2. Who should be involved in the assessments and observations?
3. Is there a focus?
4. If yes, what is your focus?
5. How will you disseminate findings and feedback?
6. When will you follow up on intervention implementation?
7. Who will you report intervention progress to?

SNF Symposium in September

SNF Symposium on Infection Prevention

- September 24, 2024.
- The California Endowment in downtown Los Angeles.
- We will be sending out the announcement flyer shortly along with registration information.
- This will be an in-person event only, one attendee per facility.

PSIE Information

MDROs in Healthcare

- Multidrug-resistant organisms (MDROs)
- MDROs are common sources of infections and outbreaks in healthcare settings
- MDROs of particular concern in LA County and reportable to DPH:
 - *Candida auris*
 - Carbapenemase-producing organisms (CPO)
 - Carbapenem-resistant Enterobacterales (CRE)
- MDROs result in life-long carriage

The Threat of Antibiotic Resistance in the United States

Antibiotic resistance—when germs (bacteria, fungi) develop the ability to defeat the antibiotics designed to kill them—is one of the greatest global health challenges of modern time.

New National Estimate*

Each year, antibiotic-resistant bacteria and fungi cause at least an estimated:

2,868,700
infections

35,900 deaths

*Clostridioides difficile*** is related to antibiotic use and antibiotic resistance:

223,900
cases

12,800 deaths

New Antibiotic Resistance Threats List

Updated urgent, serious, and concerning threats—totaling 18

5 urgent threats

2 new threats

NEW: Watch List with **3** threats

Antibiotic resistance remains a significant One Health problem, affecting humans, animals, and the environment. Data show infection prevention and control is saving lives—especially in hospitals—but threats may undermine this progress without continued aggressive action now.

Learn more: www.cdc.gov/DrugResistance/Biggest-Threats.html

Past efforts to improve interfacility communication of MDROs

- Education (webinars, email reminders)
- Standardized interfacility transfer forms
- Standardized transfer guides
- Calls to educate facilities after events
- HFID complaints
- LA County study found only 6 out of 22 CRE patients (27%) transferred from Facility X to Hospital A had documentation about their CRE.¹

Los Angeles County Department of Public Health
Infectious Organism Transfer Form

Use this form for all patient transfers between facilities. This form is not intended to be used as criteria for admission. On transfer, please include all positive lab results that pertain to this form.

Patient Label Here

Patient Name:		
DOB:	MRN:	Transfer Date:
Receiving Facility (RF):		
RF Contact Name:	RF Contact Phone:	
Sending Facility (SF):		
SF Contact Name:	SF Contact Phone:	

Precautions

Check all appropriate Isolation Precautions: Airborne Contact Droplet Standard

Personal protective equipment (PPE) recommended:

				
<input type="checkbox"/> Gown	<input type="checkbox"/> Mask	<input type="checkbox"/> N 95 / PAPR	<input type="checkbox"/> Eye Protection	<input type="checkbox"/> Gloves

Organisms NONE IDENTIFIED

Organism(s) Identified	Specimen Source	Collection Date	Status: Colonization, History, Infection, Rule-Out
<input type="checkbox"/> <i>C. auris</i> (<i>Candida auris</i>)			
<input type="checkbox"/> <i>C. diff</i> (<i>Clostridioides difficile</i>)			
<input type="checkbox"/> CRE (Carbapenem-resistant Enterobacterales)			
<input type="checkbox"/> MDR Gram negatives: (e.g. Acinetobacter, Pseudomonas)			
<input type="checkbox"/> MRSA (methicillin-resistant <i>Staphylococcus aureus</i>)			
<input type="checkbox"/> VRE (vancomycin-resistant Enterococcus)			
<input type="checkbox"/> Other, specify: (e.g. COVID-19, flu, lice, norovirus, scabies, TB, VRSA, etc.)			

Automating interfacility communication - PSIE

- MDRO registries have proven successful in Chicago, Tennessee, and other LHJs
- LACDPH is building the **Patient Safety Information Exchange (PSIE)**

PSIE PROJECT GOALS

- Overall Goal: Decrease transmission of MDROs in LA County by closing the communication gap with accessible and rapid notification of a patient's MDRO status.
- Intend for every hospital and SNF in LA County to use PSIE at patient admission.

LACDPH provides list of reported MDRO cases

All Facilities

Log in and search for patients (Name, DOB)

Facilities with EHR

Automated EHR patient admission messages sent

Health Information Exchange (HIE) Organizations

Patient Safety Information Exchange (PSIE)

Patient and MDRO information displayed when match is found

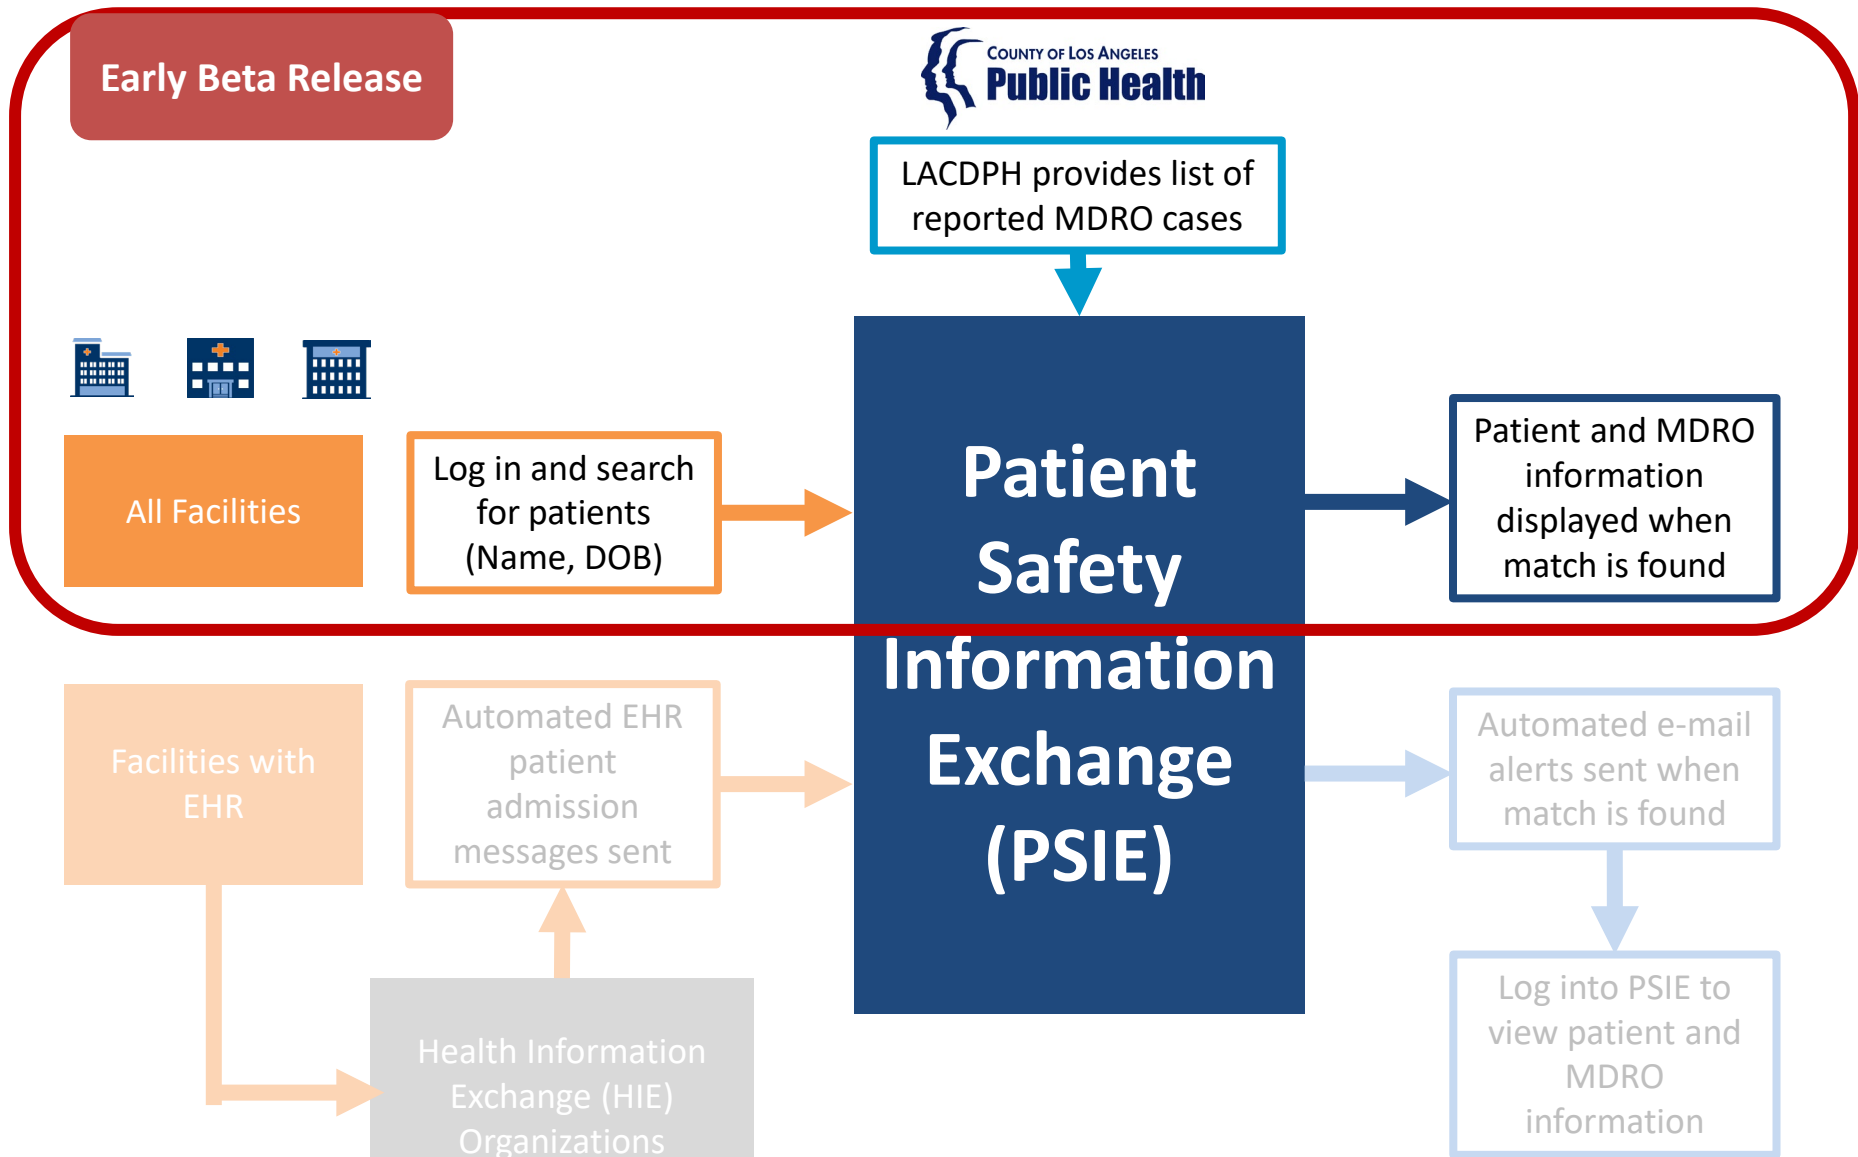

Automated e-mail alerts sent when match is found

Log into PSIE to view patient and MDRO information

MDRO: Multidrug-resistant organism

EHR: Electronic Health Record

LACDPH: Los Angeles County Department of Public Health

MDRO: Multidrug-resistant organism

PSIE Landing Page

Data Management ▾

Welcome to the PSIE landing page

Select the Component

Case Search

Search for patients within the MDRO registry by name and date of birth

Summary information and statistics about patients with MDRO infections for the health care facility

MDRO Dashboard

Alert History

If facility has EHR and is set up to send ADT messages to one of our HIE collaborators or directly to DPH, will be able to receive automated alerts when patient with known MDRO is admitted

Reports

Create reports or spreadsheets for the health care facility

Register for PSIE

- Voluntary participation
- Currently limiting to 5 or fewer users per facility, targeting users who are responsible for infection prevention and control or implementation of transmission-based precautions.
- Three steps to access MDRO information from PSIE:
 1. Complete a registration form.
 2. Sign and submit Data User Agreement.
 3. Set up Microsoft Authentication to use County of Los Angeles apps upon approval.

Email PSIE@ph.lacounty.gov for these steps and links to be sent by email or for more information!

PROJECT FIRSTLINE

Project Firstline (PFL) is a national training and education collaborative created by the Centers for Disease Prevention and Control (CDC) to increase infection control knowledge and understanding among the frontline healthcare workforce.

Project Firstline's innovative content is designed so that—regardless of a healthcare worker's previous training or educational background—they can understand and confidently apply the infection control principles and protocols necessary to protect themselves, their residents, their facility, their family, and their community from infectious disease threats, including COVID-19.

**Our next Ask an IP session will be on
Wednesday, September 11 at 1:30pm!**
