##### Discussing:

- Antimicrobial Stewardship
- Regulatory Bodies
- Outbreak Investigation
- Disease Surveillance

#### Ranging from 70 to 120

##### participants:

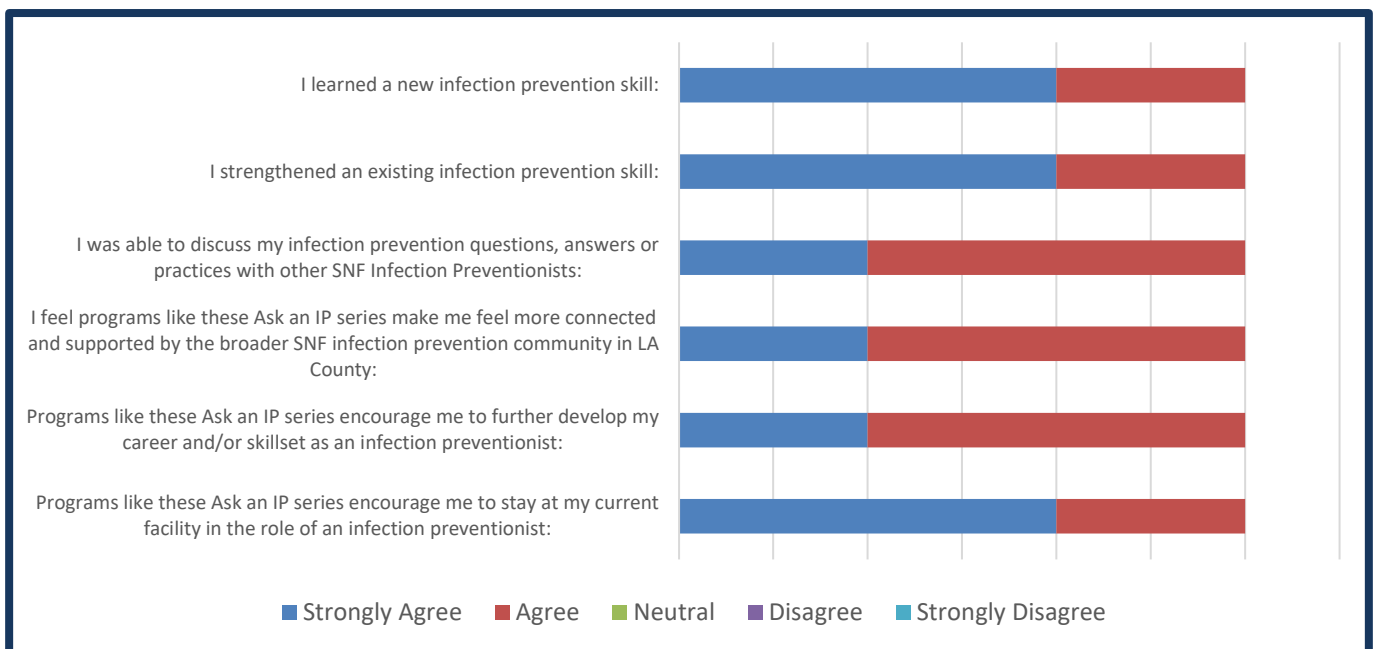

- SNF IPs
- SNF staff
- LAC DPH IPs
- LAC DPH Subject Matter Experts (physicians and epidemiologists)

#### Additional program elements:

- Office hours
- Open and guided Q&A
- Case studies
- IP Resources
- Post-program feedback survey

#### SNF IP Feedback:

Select which answer choice best describes your experience (14 responses)

#### What SNF IPs have to say:

*"I really like the entire program. The presenters know what they are talking about. They always answer our questions or get back by email if not know answer at the time. I like the slides available on the website too."*

*"I like being able to have the access of other IPs, not just at public health but also other facilities. This program almost like our own APIC meeting just for nursing home IPs."*

*"I like the question and answer portion towards the end of each session. I like the overall concept of IP session. Every information shared by DPH infection prevention team has been very helpful in my daily duties as IP."*

Program 3 dates: TBD

#### Future topics:

- PPE
- Multi drug-resistant organisms
- Vaccine acceptance strategies
- Basic microbiology
- Occupational health and duty restrictions
- Quality assurance, performance improvement
- Environmental services
