

<i>Enterococcus</i> (n=30,855 isolates from 70 Hospitals)			
	Susceptibility (Range)	Number of Isolates	Number of Hospitals
Ampicillin	83.6% (47-100%)	25,516	59
Doxycycline	24.9% (13-45%)	8,585	22
Vancomycin	82.1% (25-100%)	29,587	66
Nitrofurantoin	80.4% (41-100%)	13,869	37

Comments from LA County Healthcare-Associated Infection and Antibiotic Resistance Committee:

This table includes data from *Enterococcus* isolates not identified to species level by the submitting laboratory and does not include data from isolates listed as *E. faecalis* or *E. faecium*.

Nitrofurantoin data are useful for urine isolates only, but these data represent all sources.
