Answer "Yes" if the LTCF can perform COVID-19 viral testing, if there was a need to do so, or are able to obtain resources needed from outside sources, such as laboratories, health department, outbreak response team etc.

Yes  No

**CURRENT CENSUS:** Total number of beds that are currently occupied.\*

Only include new deaths since the last time these counts were entered in the Module.

**INFLUENZA:** Number of staff and facility personnel above with new influenza (flu).\*

# Best practices for data tracking

- Use Excel, Google Sheets or other electronic record keeping
- Allow multiple people to enter data for comprehensive reporting
- Ensure data is accurate through regular "quality checks", trainings, and refreshers

\*For tracking individual information, organize reports or excels in rows of patients or staffs

\*For tracking change or improvement over time, organize data by date (day, week, etc) for different activities

## **Audience Question:**

**Would your facility find helpful a template spreadsheet for tracking COVID-19 vaccination status for residents and staff?**

# Best Practices for Data Management

## Data must be

- Accurate
- Clean
- Truthful

## Make sure this happens by

- Tracking data appropriately
- Entering all data completely
- Doing data quality checks

## **Reporting incorrect data can impact safety and funding**

- Inaccurate patient data can lead to unintended interventions and treatments
- Incomplete facility data can lead to amendments in funding and reimbursements
