

# COVID-19 SYMPTOMS?

Treatment can prevent you from getting very sick. It works well against current COVID-19 variants and does not cause rebound infection.

## TEST & TREAT

### IF YOU'RE FEELING SICK...

- 1 Take a **COVID-19** test
- 2 Start treatment within **5 days**

Some will qualify for treatment & **FREE options** are available.

If a doctor thinks your symptoms are from COVID-19, they can **treat you without a positive test.**

## DON'T WAIT FOR SYMPTOMS TO GET WORSE

### YOU CAN STILL GET TREATMENT IF...

- You've had **COVID-19 before**
- You've been **vaccinated**

### YOU DO NOT NEED...

- US Citizenship
- Insurance
