

WHAT IS THE TELEPREP/PEP PROGRAM ?

**Pre-Exposure Prophylaxis (PrEP) and Post-Exposure Prophylaxis (PEP)
Are New Approaches to PREVENT HIV Infection!**

Pre-Exposure Prophylaxis (PrEP):

Truvada

Descovy

Post-Exposure Prophylaxis (PEP) provides protection against HIV infection when taken within 72 hours after HIV exposure.

Healthcare providers remotely monitor and manage clients receiving PrEP/PEP medication.

What to Expect When Enrolled In the PrEP/PEP Program?

- **Remote Consultations: In the comfort of your choice!**
- **Prescription Delivery: For people who qualify.**
- **Lab Testing: Monitor kidney function and screen for possible HIV infection.**
- **Education and Support: Understand HIV prevention, safe practices, and the importance of PrEP/PEP consistency.**
