

Vaccine Preventable Disease Control Program

Rise in Cases: How to Prepare for Measles in Healthcare Settings

MAY 1, 2024 | 1:00 PM

At the completion of this activity, participants will feel more confident in their ability to:

1. Recognize measles in various patient populations.
2. Effectively isolate suspect measles cases to minimize spread in your healthcare facility.
3. Discuss vaccine effectiveness, side effects and counter misinformation about the MMR vaccine.
4. Access Public Health measles guidance for clinicians as well as patient resources in multiple languages.
