Asian	53	96	95	86	85	91	87%
Entire age group³	29%	83%	79%	84%	87%	98%	81%

¹Likely an overestimate due to inclusion of multiracial people

²LAC residents 5 and older (including Long Beach and Pasadena)

³Subgroup data for NHOPI, multiracial, other, and unknown categories included in overall count but not displayed due to likely inaccurate estimates

School Testing Volume and Test Positivity

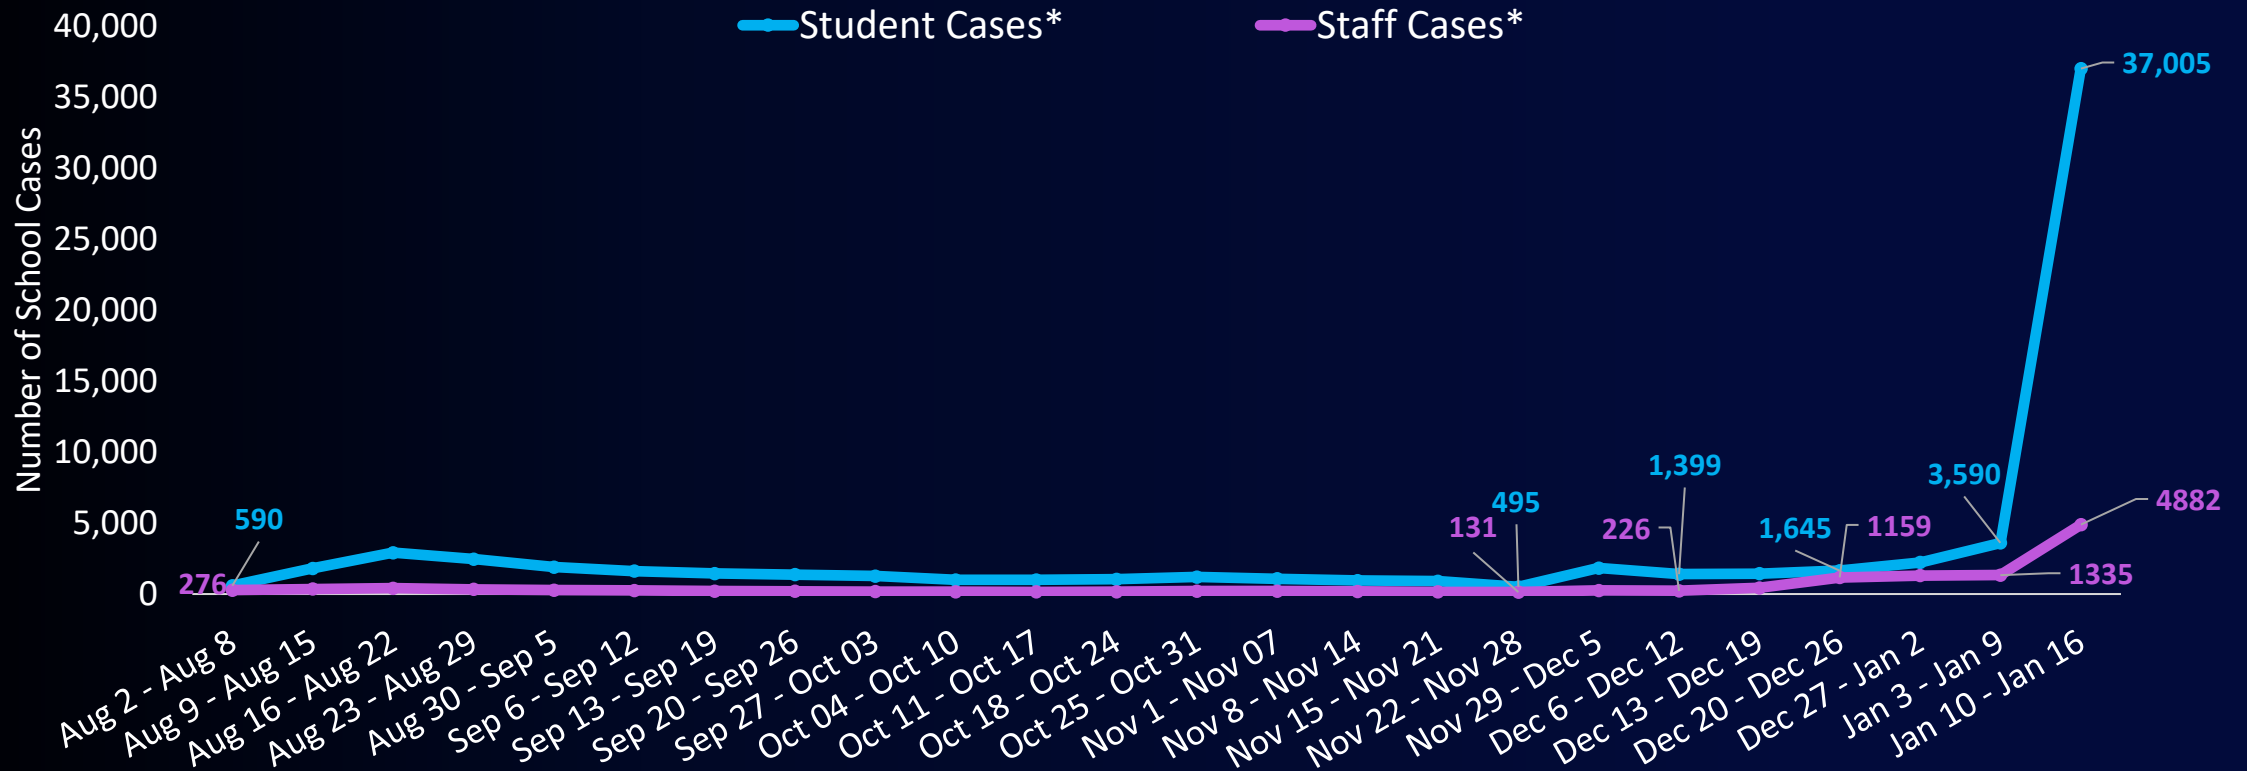

August 2, 2021 – January 14, 2021*

*Most school tests are among asymptomatic, exposed persons as part of weekly screening testing, but could include ad-hoc response testing among symptomatic or exposed persons. School testing data may include repeat tests for a unique individual. Test types reported by schools include PCR, rapid antigen, and over-the-counter tests. For the weeks of Nov 22, 2021, and December 20, 2021 – January 2, 2022, testing volume decrease was due to districts/schools being closed for holiday breaks.

TK-12 Staff and Student Cases

August 2, 2021 – January 16, 2022

* Reported by case date (earliest of symptom or specimen collection date). Represents cases that were on campus within 14 days of the case date. Counts to not include cases identified from testing prior to returning to school for the Fall 2021 semester and returning from Winter break in January 2022. Counts may include duplicate reports and includes external tests not conducted at schools. Most recent counts should be interpreted cautiously due to reporting delays.

Outbreaks in TK-12 Schools and Programs

August 1, 2021 – January 15, 2022*

As of January 18, DPH is responding to 24 active school outbreaks.

* Outbreaks are reported by the date the outbreak investigation was opened. Outbreaks may still be open and under investigation
 ** All but one of the Youth Sports Outbreaks have been in a high-school setting.

Get Free COVID-19 Tests

Get Free Tests Via USPS

Get free at-home COVID-19 tests!

Residential households in the U.S.
can order one set of 4 free at-home
tests from [COVIDTESTS.GOV](https://www.covidtests.gov).

Get Reimbursed by your Health Plan

- Insurance companies are required to reimburse you for 8 tests per month for each individual on the plan:
 - **\$12 per individual test** (or the cost of the test, if less than \$12)
- OR
- If the plan or insurer has not set up a process through which individuals can obtain test with no upfront costs, then the plan and insurer must reimburse in the full cost of the test, even if the test costs more than \$12.

Steps to Take

1. Find out from your plan or insurer if it provides direct coverage of over-the-counter COVID-19 tests through such a program or whether you will need to submit a claim for reimbursement.
2. Visit a pharmacy or retailer to purchase a test.
 - If you are charged for your test after January 15, keep your receipt and submit a claim to your insurance company for reimbursement. Contact your plan to find out how to submit a claim.
3. Take your test.
4. If positive, follow isolation requirements and notify your close contacts.

Visit [COVIDtests.gov](https://www.covidtests.gov) for more information on reimbursement.
