California Facilities

- 493 jail facilities
  - Ranging from holding sites to large detention centers
- 169 juvenile facilities
  - Halls, justice centers, camps, group homes
Correctional Population, 2014-16

129,160 state prisoners
73,891 jail inmates
3,325 juvenile detainees

1,351,000 state prisoners
744,600 jail inmates
50,821 juvenile detainees
Public Safety Realignment (2011)

- Goal: stop “revolving door” of lower-level offenders through state prison system
- Local jurisdictions take up the responsibility for all sentenced non-violent, non-serious, non-sex offenders
- Creation of a new agency to provide leadership to adult and juvenile facilities
  - Board of State and Community Corrections (BSCC)
What is BSCC’s role?

- Collect data (i.e. population, demographics)
- Establish minimum standards for detention facilities
- Biennial inspections of detention facilities
- Juvenile Justice and Delinquency Prevention Act (JJDPAct) compliance monitoring
- Provide TA/training to detention facilities
  - BSCC does not support policy writing process
