Five Point Plan to Reduce the Health Impacts of Climate Change

**Inform**
...and engage the general public about the nature of climate change and the health co-benefits associated with taking action to reduce carbon emissions.

**Promote**
...local planning, land use, transportation, water, and energy policies that reduce carbon emissions and support the design of healthy and sustainable communities.

**Provide**
...guidance on climate preparedness to local government and community partners to reduce health risks and create more resilient communities.

**Build**
...the capacity of Departmental staff and programs to monitor health impacts, integrate climate preparedness, and improve climate response.

**Adopt**
...best management practices to reduce carbon emissions associated with Departmental facilities and internal operations.
