Many thanks to the following Department of Public Health Programs for their contributions of data and expertise to this report: Division of HIV and STD Programs; Division of Maternal, Child & Adolescent Health Programs; OHAE Epidemiology Unit; and Tuberculosis Control Program.
MESSAGE FROM THE INTERIM DIRECTOR

The Los Angeles County Department of Public Health is pleased to provide you with this report on the Key Indicators of Health by Service Planning Area. This report presents a snapshot of the health of the population of Los Angeles County overall and in each of the county’s eight Service Planning Areas (SPAs). “Health” is characterized very broadly in the report to encompass not only disease and injury, but also the many factors that contribute to these adverse health outcomes—including health risk behaviors, limited access to services and, most importantly, health damaging social, economic, and environmental conditions. The health indicators included in the report were selected to reflect the breadth and complexity of these factors and the health outcomes they produce.

This report highlights striking disparities in health across the eight SPAs. These disparities are, to a large degree, preventable and hence are more appropriately referred to as health inequities. Efforts to reduce these and other health inequities in the county will require sustained intervention at multiple levels, involving multiple partners and sectors. For example, while medical, mental health, and other support services play an essential role in helping individuals and families, we are unlikely to reduce the stark health inequities seen between populations and across geographic regions in the county unless we address the underlying conditions in the social, economic, and physical environments that fuel these inequities.

I hope the information presented in this report will help support these needed efforts. We in the Department of Public Health look forward to new and continued partnerships with you, our partners, to promote health equity and ensure that all Angelenos have the opportunity to live healthy and productive lives.

Cynthia A. Harding, MPH
Interim Director

### Notes

INTRODUCTION

Key indicators are standardized measures through which we consider and compare many aspects of health and well-being. In this report, we describe indicators for Los Angeles County’s Service Planning Areas (SPAs) and the County overall. When possible, we compare the health measures of Los Angeles County residents with those of the United States population and with Healthy People 2020 goals, which represent the health standards our nation is trying to achieve within this decade. Graphs presented, unless otherwise specified, refer to Los Angeles County, and highlight certain health indicators and data trends.

USER’S GUIDE

Each SPA is represented by a different color, which is portrayed on the cover map. The golden standard for health indicators, reflecting U.S. Healthy People 2020 goals, is depicted in the first column of the tables. Data for Los Angeles County overall are presented in the blue column, while national statistics are portrayed in pink. Data for the SPAs are highlighted with notations that show whether a particular SPA fares better or worse than the other seven SPAs combined, based on statistical comparisons. In some cases, the indicator for a SPA may appear better or worse than the county data but are not marked as such. In these instances, the indicator for that SPA did not differ from the other SPAs’ data based on tests for statistical significance. Testing for significance was not conducted in the Demographics section of the report. Otherwise, when statistical comparisons were not performed, the indicator row is marked with a diamond ◆.

Technical Notes

* Data from the Los Angeles County Health Survey with a relative standard error >30% are considered unstable. Birth and mortality data with 5-19 events are considered unstable. These data should be interpreted with caution.
– Data with <5 events are not reported to protect confidentiality.
## Demographics

### Gender
- Percent of population who are male\(^1\)
- Percent of population who are female\(^1\)

<td>Asian</td>
<td>19.6</td>
<td>19.6</td>
</tr>
</tbody>
</table>

*Data are unstable (see technical notes p. 5)
Note: Data for NHOPI and American Indian/Alaskan Native are suppressed (see technical notes p. 5)
### Social Determinants of Health

#### Education
- Percent of adults with less than a high school education
- Percent of adults who completed high school
- Percent of adults who completed some college, trade school, or associate’s degree
- Percent of adults with a college or post graduate degree

#### Employment Status
- Percent of adults who are employed
- Percent of adults who are unemployed (and looking for work)
- Percent of adults not in the labor force (includes retired and disabled and unable to work)

#### Poverty
- Percent of population with household incomes less than 100% of the Federal Poverty Level (FPL)

#### Housing
- Percent of households with children
- Percent of households who spend 30% or more of their income on housing
- Percent of adults with housing instability (i.e., reported being homeless or not having their own place to live or sleep) in the past 5 years

#### Food
- Percent of households with incomes <300% FPL who are food insecure
- Percent of households with incomes <185% FPL who participate in the Supplemental Nutrition Assistance Program (SNAP)

**User’s Guide**

- SPA fares better
- SPA fares worse
- Data not statistically tested

*Data are unstable (see technical notes p. 5)
**Percent of Adults with Housing Instability by Sexual Orientation, 2015**

- Heterosexual: 4.7%
- Gay/Lesbian: 7.9*%
- Bisexual: 9.9%
- Uncertain: 4.4%

* Data are unstable (see technical notes p. 5)

**Percent of Households with Incomes <185% FPL that Report Receiving SNAP, by Households With and Without Children, 2015**

- Households with Children: 38.1%
- Households without Children: 14.6%

**Note:** Data for NHOPi and American Indian/Alaskan Native are suppressed (see technical notes p. 5)
### PHYSICAL DETERMINANTS OF HEALTH

#### Neighborhood
- Percent of adults who believe their neighborhood is safe from crime
- Percent of children ages 1-17 years who can easily get to a park, playground, or other safe place to play
- Percent of adults who use walking paths, parks, playgrounds, or sports fields in their neighborhood
- Percent of adults whose neighborhoods do not have walking paths, parks, playgrounds, or sports fields

#### Air Quality
- Number of days in the year when AQI (Air Quality Index) was unhealthy
- Percent of households with children ages 0-17 years regularly exposed to tobacco smoke at home (one or more days in the past week)

#### Climate Change
- Percent of adults who are concerned about more heat waves due to climate change
- Percent of adults who are concerned about droughts and water shortages due to climate change
- Percent of adults who are concerned about worse air pollution due to climate change

# Health Behaviors

## Alcohol & Drug Use
- Percent of adults who binge drink (men who had 5 or more alcoholic drinks, women 4 or more, on at least one occasion in the past month)\(^2\)
  - National: 24.4
  - LA County: 16.0
  - Antelope Valley: 13.6
  - San Bernardino: 14.3
  - San Gabriel: 15.5
  - Metro: 17.6
  - West: 18.2
  - South: 13.8
  - East: 17.6
  - South Bay: 16.4

- Percent of teens ages 14-17 years who consumed at least one alcoholic drink in the past month\(^1\)
  - National: N/A
  - LA County: 32.8
  - Antelope Valley: N/A
  - San Bernardino: N/A
  - San Gabriel: N/A
  - Metro: N/A
  - West: N/A
  - South: N/A
  - East: N/A
  - South Bay: N/A

- Percent of teens ages 14-17 years who binge drink (had 5 or more alcoholic drinks on at least one occasion in the past month)\(^1\)
  - National: 8.6
  - LA County: 17.7
  - Antelope Valley: 10.2
  - San Bernardino: N/A
  - San Gabriel: N/A
  - Metro: N/A
  - West: N/A
  - South: N/A
  - East: N/A
  - South Bay: N/A

- Percent of adults who misused prescription drugs in the past year\(^2\)
  - National: N/A
  - LA County: 5.5
  - Antelope Valley: 5.8
  - San Bernardino: 3.9
  - San Gabriel: 4.7
  - Metro: 7.0
  - West: 5.2
  - South: 6.8
  - East: 5.9
  - South Bay: 6.3

## Nutrition
- Percent of children whose families eat meals together every day\(^2\)
  - National: N/A
  - LA County: 62.1
  - Antelope Valley: 68.3
  - San Bernardino: 57.3
  - San Gabriel: 65.1
  - Metro: 58.7
  - West: 49.6
  - South: 65.7
  - East: 64.1
  - South Bay: 64.5

- Percent of adults who consume five or more servings of fruits and vegetables a day\(^2\)
  - National: N/A
  - LA County: 14.7
  - Antelope Valley: 13.7
  - San Bernardino: 14.6
  - San Gabriel: 16.2
  - Metro: 16.0
  - West: 20.9
  - South: 9.6
  - East: 11.9
  - South Bay: 14.8

- Percent of adults who drink at least one soda or sweetened drink a day\(^2\)
  - National: N/A
  - LA County: 31.4
  - Antelope Valley: 37.4
  - San Bernardino: 28.0
  - San Gabriel: 28.3
  - Metro: 29.9
  - West: 21.7
  - South: 41.9
  - East: 40.3
  - South Bay: 30.1

- Percent of children who drink at least one soda or sweetened drink a day\(^2\)
  - National: N/A
  - LA County: 39.2
  - Antelope Valley: 39.9
  - San Bernardino: 37.5
  - San Gabriel: 33.4
  - Metro: 35.0
  - West: 14.3
  - South: 51.6
  - East: 45.3
  - South Bay: 41.3

## Tobacco Use
- Percent of adults who smoke cigarettes\(^1\)
  - National: 12.0
  - LA County: 18.1
  - Antelope Valley: 13.3
  - San Bernardino: 18.2
  - San Gabriel: 12.8
  - Metro: 12.8
  - West: 14.1
  - South: 8.3
  - East: 13.0
  - South Bay: 13.6

- Percent of teens ages 14-17 years who smoke cigarettes\(^2\)
  - National: 16.0
  - LA County: 10.8
  - Antelope Valley: 4.5
  - San Bernardino: N/A
  - San Gabriel: N/A
  - Metro: N/A
  - West: N/A
  - South: N/A
  - East: N/A

- Percent of adults who smoked electronic cigarettes in the past month\(^2\)
  - National: N/A
  - LA County: 3.5
  - Antelope Valley: 7.4
  - San Bernardino: 4.7
  - San Gabriel: 2.7
  - Metro: 2.3
  - West: 3.7
  - South: 1.7
  - East: 3.0

## Physical Activity
- Percent of adults who obtain recommended amount of aerobic exercise each week (≥ 150 minutes/wk of moderate exercise, or ≥ 75 minutes/wk of vigorous exercise)\(^2\)
  - National: 47.9
  - LA County: 65.1
  - Antelope Valley: 61.5
  - San Bernardino: 66.0
  - San Gabriel: 64.2
  - Metro: 66.5
  - West: 73.4
  - South: 63.8
  - East: 63.6
  - South Bay: 63.1

- Percent of adults who obtain recommended amount of muscle-strengthening exercise each week (at least 2 days/wk)\(^2\)
  - National: 24.1
  - LA County: 41.3
  - Antelope Valley: 46.2
  - San Bernardino: 43.6
  - San Gabriel: 37.3
  - Metro: 41.2
  - West: 48.5
  - South: 38.8
  - East: 42.0
  - South Bay: 39.1

- Percent of adults who obtain recommended amount of aerobic and muscle-strengthening exercises each week\(^2\)
  - National: 20.1
  - LA County: 34.1
  - Antelope Valley: 38.1
  - San Bernardino: 36.5
  - San Gabriel: 31.3
  - Metro: 33.6
  - West: 42.0
  - South: 30.3
  - East: 34.3
  - South Bay: 32.1
• Percent of children ages 6-17 years who obtain recommended amount of aerobic exercise each week (≥ 60 minutes, daily)²
• Percent of children ages 6-17 years who obtain recommended amount of muscle-strengthening each week (at least 2 days/wk)²
• Percent of children ages 6-17 years who obtain recommended amount of aerobic and muscle-strengthening each week²

Percent of Adults Who Use Electronic Cigarettes, by Age Group, 2015

Percent of Adults Who Binge Drink by Gender & Race/Ethnicity, 2015

* Data are unstable (see technical notes p. 5)
Note: Data for NHOPI and American Indian/Alaskan Native are suppressed (see technical note p. 5)
# HEALTH OUTCOMES

## Overweight and Obesity
- Percent of adults who are obese (BMI ≥ 30.0)\(^2\)
  - 30.5\(^{th}\) 28.9\(^{th}\) 23.5
- Percent of adults who are overweight (25.0 ≤ BMI < 30.0)\(^2\)
  - N/A 35.2\(^{th}\) 35.9

## Diabetes
- Percent of adults ever diagnosed with diabetes\(^2\)
  - N/A 9.3\(^{st}\) 9.8
- Diabetes death rate (age-adjusted per 100,000 population)\(^8\)
  - 66.6 21.2\(^{th}\) 21.9

## Cardiovascular Disease
- Percent of adults ever diagnosed with hypertension\(^2\)
  - 26.9 26.4\(^{th}\) 23.5
- Percent of adults ever diagnosed with high blood cholesterol\(^2\)
  - N/A N/A 25.2
- Coronary heart disease death rate (age-adjusted per 100,000 population)\(^8\)
  - 103.4 102.6\(^{th}\) 116.7
- Stroke death rate (age-adjusted per 100,000 population)\(^8\)
  - 34.8 36.2\(^{th}\) 32.8
- Stroke death rate for African Americans (age-adjusted per 100,000 population)\(^8\)
  - 34.8 49.0\(^{th}\) 48.4

## Reproductive Health
- Birth rate for females ages 15-19 years (per 1,000 females ages 15-19 years)\(^6,8\)
  - N/A 26.5\(^{th}\) 22.8
- Percent of low weight (<2,500 grams) births (per 100 live births)\(^8\)
  - 7.8 8.0\(^{th}\) 7.0
- Percent of low weight (<2,500 grams) African American births (per 100 African American live births)\(^6\)
  - 7.8 13.1\(^{th}\) 12.1
- Infant death rate (per 1,000 live births)\(^6\)
  - 6.0 6.0\(^{th}\) 4.4
- African American infant death rate (per 1,000 African American live births)\(^6\)
  - 6.0 11.2\(^{th}\) 10.3
**Injury**

- Percent of adults ages 65 years or older who have fallen in the past year
- Percent of adults ages 65 years or older who were injured due to a fall in the past year
- Suicide rate (age-adjusted per 100,000 population)
- Homicide rate among adolescents and young adults ages 15-34 years (per 100,000 population)
- Death rate attributed to motor vehicle crashes (age-adjusted per 100,000 population)
- Unintentional injury death rate among children ages 1-17 years (per 100,000 population)
- Rate of unintentional drug-related (includes alcohol) death rate (age-adjusted per 100,000 population)

### User’s Guide

### Mental Health
- Percent of adults with current depression
- Percent of adults at risk for major depression
- Alzheimer’s disease death rate (age-adjusted per 100,000 population)

### Communicable Diseases
- Incidence of HIV/AIDS (annual new cases per 100,000 population) among adolescents and adults ages 13 years or older
- HIV infection-related mortality rate (age-adjusted per 100,000 population)
- Incidence of primary and secondary syphilis (annual new cases per 100,000 population)
- Incidence of chlamydia (annual new cases per 100,000 population)
- Incidence of gonorrhea (annual new cases per 100,000 population)
- Incidence of tuberculosis (annual new cases per 100,000 population)

### Respiratory Disease
- Percent of children ages 0-17 years with current asthma
- Pneumonia/Influenza mortality rate (age-adjusted per 100,000 population)
- COPD/Emphysema mortality rate (age-adjusted per 100,000 population)
Cancer

- Lung cancer death rate (age-adjusted per 100,000 population) *
- Breast cancer death rate among females (age-adjusted per 100,000 females) *
- Cervical cancer death rate among females (age-adjusted per 100,000 females) *
- Colorectal cancer death rate (age-adjusted per 100,000 population) *

All Cause Mortality

- (Age-adjusted per 100,000 population) *

* Data are unstable (see technical notes p. 5)
  — Data are suppressed (see technical notes p. 5)

2 2015 Los Angeles County Health Survey; Office of Health Assessment and Epidemiology, Los Angeles County Department of Public Health. Estimates are based on self-reported data by a random sample of 8,008 Los Angeles County adults and 5,982 Los Angeles County adults sufficiently knowledgeable about the child’s health and well-being.

a. For language used most often at home, Asian includes: Burmese, Cambodian, Cantonese, Chinese unspecified, Filipino, Indian languages, Indonesian, Japanese, Korean, Mandarin, Sinhalese (Sri Lankan), Tagalog, Vietnamese. Other includes: European (Armenian, French, German, Hungarian, Italian, Ladino, Polish, Portuguese, Romanian, Russian); Middle Eastern (Arabic, Egyptian, Farsi/Persian, Greek, Hebrew, Turkish); African (Ethiopian, Nigerian); and Other (American Indian, Patois [Jamaican]).

b. Disability was defined as a positive response to any of the following questions: “Are you limited in any way in any activities because of a physical, mental, or emotional problem?”; “Do you now have any health problem that requires you to use special equipment, such as a cane, wheelchair, a special bed or special telephone?”; “Do you consider yourself a person with a disability?”

e. Unhealthy days refers to a composite of the number of reported poor physical and/or mental health days in the past month. [Reference: Centers for Disease Control and Prevention. Measuring Health Days. Atlanta, Georgia: CDC, November 2000. www.cdc.gov/hrqol/pdfs/mhd.pdf.]

f. Children with Special Health Care Needs (CSHCN) Screening Tool from the FACCT - Foundation for Accountability. The CSHCN screener has three “definitional domains.” These are: (1) Dependency on prescription medications; (2) Service use above that considered usual or routine; and (3) Functional limitations. The definitional domains are not mutually exclusive categories. A child meeting the CSHCN screener criteria for having a chronic condition may qualify for one or more definitional domains. [Reference: www.facct.org/cahmiweb/chronic/Screener/lwiscreen.htm.]

g. The Patient Health Questionnaire–2 (PHQ–2) is used as the initial screening test for major depressive episode. [Reference: Kroenke K, Spitzer RL, Williams JB. The Patient Health Questionnaire–2: validity of a two-item depression screener. Med Care 2003; 41:1284-92.]

4 US Census Bureau, 2010-2014 American Community Survey 5-Year Estimates (Table B25106: Tenure by housing costs as a percentage of household income in the past 12 months - universe: occupied housing units).

6 Los Angeles County Department of Public Health, Maternal, Child & Adolescent Health Programs; 2013 birth and 2013 death record data (for infant mortality) and 2013 birth data obtained from the California Department of Public Health, Center for Health Statistics, OHIR Vital Statistics Section.

a. In previous Key Indicators of Health by Service Planning Area reports this indicator was worded as “rate of births (per 1,000 live births) to teens ages 15-19 years.” The wording has been updated to be more clear. Note: data are comparable to the prior reports.

8 Los Angeles County Department of Public Health (DPH), Office of Health Assessment and Epidemiology, Linked 2013 California DPH Death Statistical Master File for Los Angeles County Residents.

9 Los Angeles County Department of Public Health, Division of HIV and STD Prevention.

b. Sexually Transmitted Disease Casewatch System, Los Angeles County 2015 data. Data are provisional due to reporting delay. Excludes cases reported in the cities of Long Beach and Pasadena. Denominator data is based on 2015 LAC population estimates provided by the LAC DPH Office of Health Assessment and Epidemiology.

10 Los Angeles County Department of Public Health, Tuberculosis Control Program, 2014 data. TB cases in Pasadena and Long Beach are not included because these two cities have their own TB Control Programs.
NATIONAL DATA SOURCES

AC U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates. [Race: Tables B02001, B03002; Language spoken at home: Table B16007; Foreign born: Table S0501; Education: Table DP02; Poverty: Table DP03]. Additional note: data for education is for ages 25 years and older.

AC1 US Census Bureau, 2014 American Community Survey 5-year Estimates. [Table: B25106.]

HP U.S. Department of Health and Human Services. Office of Disease Prevention and Health Promotion. Healthy People 2020. Washington, DC. Available at: www.healthypeople.gov. Additional notes: data for breastfeeding is for children 19-35 months; teen binge drinking is for ages 12-17 years; adults who are obese is for ages 20 years and older.
