Many thanks to the following Department of Public Health Programs for their contributions of data and expertise to this report: Division of HIV and STD Programs; Division of Maternal, Child & Adolescent Health Programs; OHAE Epidemiology Unit; and Tuberculosis Control Program.
MESSAGE FROM THE INTERIM DIRECTOR

The Los Angeles County Department of Public Health is pleased to provide you with this report on the Key Indicators of Health by Service Planning Area. This report presents a snapshot of the health of the population of Los Angeles County overall and in each of the county’s eight Service Planning Areas (SPAs). “Health” is characterized very broadly in the report to encompass not only disease and injury, but also the many factors that contribute to these adverse health outcomes—including health risk behaviors, limited access to services and, most importantly, health damaging social, economic, and environmental conditions. The health indicators included in the report were selected to reflect the breadth and complexity of these factors and the health outcomes they produce.

This report highlights striking disparities in health across the eight SPAs. These disparities are, to a large degree, preventable and hence are more appropriately referred to as health inequities. Efforts to reduce these and other health inequities in the county will require sustained intervention at multiple levels, involving multiple partners and sectors. For example, while medical, mental health, and other support services play an essential role in helping individuals and families, we are unlikely to reduce the stark health inequities seen between populations and across geographic regions in the county unless we address the underlying conditions in the social, economic, and physical environments that fuel these inequities.

I hope the information presented in this report will help support these needed efforts. We in the Department of Public Health look forward to new and continued partnerships with you, our partners, to promote health equity and ensure that all Angelenos have the opportunity to live healthy and productive lives.

Cynthia A. Harding, MPH
Interim Director

---

INTRODUCTION

Key indicators are standardized measures through which we consider and compare many aspects of health and well-being. In this report, we describe indicators for Los Angeles County’s Service Planning Areas (SPAs) and the County overall. When possible, we compare the health measures of Los Angeles County residents with those of the United States population and with Healthy People 2020 goals, which represent the health standards our nation is trying to achieve within this decade. Graphs presented, unless otherwise specified, refer to Los Angeles County, and highlight certain health indicators and data trends.

USER’S GUIDE

Each SPA is represented by a different color, which is portrayed on the cover map. The gold standard for health indicators, reflecting U.S. Healthy People 2020 goals, is depicted in the first column of the tables. Data for Los Angeles County overall are presented in the blue column, while national statistics are portrayed in pink. Data for the SPAs are highlighted with notations that show whether a particular SPA fares better or worse than the other seven SPAs combined, based on statistical comparisons. In some cases, the indicator for a SPA may appear better or worse than the county data but are not marked as such. In these instances, the indicator for that SPA did not differ from the other SPAs’ data based on tests for statistical significance. Testing for significance was not conducted in the Demographics section of the report. Otherwise, when statistical comparisons were not performed, the indicator row is marked with a diamond ◆.

Technical Notes

* Data from the Los Angeles County Health Survey with a relative standard error >30% are considered unstable. Birth and mortality data with 5-19 events are considered unstable. These data should be interpreted with caution.
– Data with <5 events are not reported to protect confidentiality.

### Education
- Percent of adults with less than a high school education
  - National: N/A
  - LA County: 13.1%
  - Antelope Valley: 20.7
  - San Fernando: 16.8
  - San Gabriel: 23.6
  - Metro: 27.3
  - West: 6.4
  - South: 41.6
  - East: 28.9
  - South Bay: 16.1
- Percent of adults who completed high school
  - National: N/A
  - LA County: 27.7%
  - Antelope Valley: 25.2
  - San Fernando: 19.9
  - San Gabriel: 19.8
  - Metro: 20.5
  - West: 12.5
  - South: 25.7
  - East: 28.1
  - South Bay: 21.8
- Percent of adults who completed some college, trade school, or associate’s degree
  - National: N/A
  - LA County: 29.1%
  - Antelope Valley: 36.2
  - San Fernando: 30.8
  - San Gabriel: 30.0
  - Metro: 23.6
  - West: 25.2
  - South: 24.0
  - East: 28.2
  - South Bay: 32.4
- Percent of adults with a college or post graduate degree
  - National: N/A
  - LA County: 30.1%
  - Antelope Valley: 17.9
  - San Fernando: 32.5
  - San Gabriel: 26.6
  - Metro: 28.6
  - West: 55.8
  - South: 8.6
  - East: 14.8
  - South Bay: 29.7

### Employment Status
- Percent of adults who are employed
  - National: N/A
  - LA County: 57.3%
  - Antelope Valley: 46.1
  - San Fernando: 63.1
  - San Gabriel: 54.3
  - Metro: 53.3
  - West: 61.6
  - South: 48.3
  - East: 56.8
  - South Bay: 57.9
- Percent of adults who are unemployed (and looking for work)
  - National: N/A
  - LA County: 6.0%
  - Antelope Valley: 12.4
  - San Fernando: 8.9
  - San Gabriel: 9.2
  - Metro: 12.6
  - West: 5.6
  - South: 13.6
  - East: 10.9
  - South Bay: 10.2
- Percent of adults not in the labor force (includes retired and disabled and unable to work)
  - National: N/A
  - LA County: 35.6%
  - Antelope Valley: 41.5
  - San Fernando: 28.0
  - San Gabriel: 36.5
  - Metro: 34.2
  - West: 32.9
  - South: 38.1
  - East: 32.3
  - South Bay: 31.9

### Poverty
- Percent of population with household incomes less than 100% of the Federal Poverty Level (FPL)
  - National: N/A
  - LA County: 15.5%
  - Antelope Valley: 21.4
  - San Fernando: 14.9
  - San Gabriel: 13.3
  - Metro: 24.3
  - West: 11.9
  - South: 33.6
  - East: 17.3
  - South Bay: 17.4

### Housing
- Percent of households with children
  - National: N/A
  - LA County: 31.7%
  - Antelope Valley: 41.3
  - San Fernando: 35.5
  - San Gabriel: 40.2
  - Metro: 31.4
  - West: 25.5
  - South: 51.2
  - East: 42.2
  - South Bay: 35.4
- Percent of households who spend 30% or more of their income on housing
  - National: N/A
  - LA County: 34.9%
  - Antelope Valley: 46.2
  - San Fernando: 51.4
  - San Gabriel: 45.2
  - Metro: 54.0
  - West: 45.4
  - South: 62.7
  - East: 48.5
  - South Bay: 46.7
- Percent of adults with housing instability (i.e., reported being homeless or not having their own place to live or sleep) in the past 5 years
  - National: N/A
  - LA County: 4.8
  - Antelope Valley: 11.3
  - San Fernando: 3.0
  - San Gabriel: 3.5
  - Metro: 4.3
  - West: 3.0
  - South: 9.9
  - East: 4.9
  - South Bay: 5.5

### Food
- Percent of households with incomes <300% FPL who are food insecure
  - National: N/A
  - LA County: 29.2
  - Antelope Valley: 34.4
  - San Fernando: 27.2
  - San Gabriel: 21.8
  - Metro: 32.0
  - West: 30.5
  - South: 32.4
  - East: 32.4
  - South Bay: 30.3
- Percent of households with incomes <185% FPL who participate in the Supplemental Nutrition Assistance Program (SNAP)
  - National: N/A
  - LA County: 25.2
  - Antelope Valley: 39.8
  - San Fernando: 22.5
  - San Gabriel: 17.9
  - Metro: 24.2
  - West: 11.4
  - South: 33.7
  - East: 28.0
  - South Bay: 27.1

---

**User’s Guide**

- SPA fares better
- SPA fares worse
- Data not statistically tested

*Data are unstable (see technical notes p. 5)
Percent of Households with Incomes <185% FPL that Report Receiving SNAP, by Households With and Without Children, 2015

- Households with Children: 38.1%
- Households without Children: 14.6%

Note: Data for NHOPI and American Indian/Alaskan Native are suppressed (see technical notes p. 5)

Percent of Adults with Housing Instability by Sexual Orientation, 2015

- Heterosexual: 4.7%
- Gay/Lesbian: 7.9*%
- Bisexual: 9.9%
- Uncertain: 4.4%

* Data are unstable (see technical notes p. 5)

Adult Educational Attainment by Race/Ethnicity, 2015

- Latino: College or Post Graduate Degree 9.8%, Some College or Trade School 24.0%, High School 45.5%, Less Than High School 15.7%
- White: College or Post Graduate Degree 24.0%, Some College or Trade School 33.7%, High School 27.7%, Less Than High School 11.3%
- African American: College or Post Graduate Degree 21.2%, Some College or Trade School 39.8%, High School 26.4%, Less Than High School 10.1%
- Asian: College or Post Graduate Degree 43.2%, Some College or Trade School 26.4%, High School 20.3%, Less Than High School 10.1%

Note: Data for NHOPI and American Indian/Alaskan Native are suppressed (see technical notes p. 5)
### PHYSICAL DETERMINANTS OF HEALTH

#### Neighborhood
- Percent of adults who believe their neighborhood is safe from crime
- Percent of children ages 1-17 years who can easily get to a park, playground, or other safe place to play
- Percent of adults who use walking paths, parks, playgrounds, or sports fields in their neighborhood
- Percent of adults whose neighborhoods do not have walking paths, parks, playgrounds, or sports fields

#### Air Quality
- Number of days in the year when AQI (Air Quality Index) was unhealthy
- Percent of households with children ages 0-17 years regularly exposed to tobacco smoke at home (one or more days in the past week)

#### Climate Change
- Percent of adults who are concerned about more heat waves due to climate change
- Percent of adults who are concerned about droughts and water shortages due to climate change
- Percent of adults who are concerned about worse air pollution due to climate change

### HEALTH CARE ACCESS

#### Key Indicators of Health – 2016

**Insurance**
- Percent of children ages 0-17 years who are insured\(^1\)
  - National: 100.0
  - SPA 1: 100.0
  - SPA 2: 95.5\(^*\)
  - SPA 3: 96.6
  - SPA 4: 94.9
  - SPA 5: 97.6
  - SPA 6: 94.2
  - SPA 7: 98.1
  - SPA 8: 97.0

- Percent of adults ages 18-64 years who are insured\(^1\)
  - National: 100.0
  - SPA 1: 100.0
  - SPA 2: 87.2\(^*\)
  - SPA 3: 88.3
  - SPA 4: 88.4
  - SPA 5: 88.7
  - SPA 6: 84.8
  - SPA 7: 84.8
  - SPA 8: 95.3

#### Regular Source of Care
- Percent of children ages 0-17 years with a regular source of health care\(^2\)
  - National: 100.0
  - SPA 1: 100.0
  - SPA 2: 95.6\(^*\)
  - SPA 3: 94.3
  - SPA 4: 95.0
  - SPA 5: 94.8
  - SPA 6: 94.0
  - SPA 7: 89.4
  - SPA 8: 93.4

- Percent of adults ages 18-64 years with a regular source of health care\(^2\)
  - National: 89.4
  - SPA 1: N/A
  - SPA 2: 77.7
  - SPA 3: 79.7
  - SPA 4: 79.1
  - SPA 5: 78.3
  - SPA 6: 74.3
  - SPA 7: 74.3
  - SPA 8: 76.0

#### Access to Medical Care
- Percent of children ages 0-17 years who have difficulty accessing medical care\(^3\)
  - National: N/A
  - SPA 1: 11.0
  - SPA 2: 9.4
  - SPA 3: 28.0
  - SPA 4: 149.0
  - SPA 5: 14.5
  - SPA 6: 4.3
  - SPA 7: 15.0
  - SPA 8: 9.5

- Percent of adults who reported difficulty accessing medical care\(^2\)
  - National: N/A
  - SPA 1: 23.6
  - SPA 2: 28.0
  - SPA 3: 21.6
  - SPA 4: 25.5
  - SPA 5: 28.6
  - SPA 6: 13.1
  - SPA 7: 32.5
  - SPA 8: 22.9

- Percent of children ages 0-17 years who did not see a doctor when needed in the past year because they could not afford it\(^2\)
  - National: N/A
  - SPA 1: 6.4
  - SPA 2: 6.2
  - SPA 3: 5.9
  - SPA 4: 8.0
  - SPA 5: 6.3\(^*\)
  - SPA 6: 7.4
  - SPA 7: 7.4
  - SPA 8: 7.2

#### Access to Dental Care
- Percent of adults who did not see a dentist or go to a dental clinic in the past year\(^2\)
  - National: N/A
  - SPA 1: 34.7\(^*\)
  - SPA 2: 43.4
  - SPA 3: 43.4
  - SPA 4: 41.8
  - SPA 5: 40.3
  - SPA 6: 28.9
  - SPA 7: 56.9
  - SPA 8: 46.9

- Percent of children ages 3-17 years who did not obtain dental care (including check-ups) in the past year because they could not afford it\(^2\)
  - National: N/A
  - SPA 1: 11.5
  - SPA 2: 14.2
  - SPA 3: 10.3
  - SPA 4: 9.9
  - SPA 5: 15.5
  - SPA 6: 13.3
  - SPA 7: 10.4
  - SPA 8: 11.5

#### Access to Mental Health Care
- Percent of children ages 3-17 years whose parents tried to get them mental or behavioral health care in the past year\(^2\)
  - National: N/A
  - SPA 1: 7.4
  - SPA 2: 7.4
  - SPA 3: 10.2
  - SPA 4: 5.5
  - SPA 5: 8.0
  - SPA 6: 7.9
  - SPA 7: 5.6\(^*\)
  - SPA 8: 8.2

- Percent of adults who tried to get mental health care in the past year\(^2\)
  - National: N/A
  - SPA 1: 8.5
  - SPA 2: 10.1
  - SPA 3: 7.0
  - SPA 4: 5.4
  - SPA 5: 12.3
  - SPA 6: 14.2
  - SPA 7: 8.1
  - SPA 8: 7.9

## HEALTH BEHAVIORS

### Alcohol & Drug Use
- **Percent of adults who binge drink (men who had 5 or more alcoholic drinks, women 4 or more, on at least one occasion in the past month)**
- **Percent of teens ages 14-17 years who consumed at least one alcoholic drink in the past month**
- **Percent of teens ages 14-17 years who binge drink (had 5 or more alcoholic drinks on at least one occasion in the past month)**
- **Percent of adults who misused prescription drugs in the past year**

### Nutrition
- **Percent of children whose families eat meals together every day**
- **Percent of adults who consume five or more servings of fruits and vegetables a day**
- **Percent of adults who drink at least one soda or sweetened drink a day**
- **Percent of children who drink at least one soda or sweetened drink a day**

### Tobacco Use
- **Percent of adults who smoke cigarettes**
- **Percent of teens ages 14-17 years who smoke cigarettes**
- **Percent of adults who smoked electronic cigarettes in the past month**

### Physical Activity
- **Percent of adults who obtain recommended amount of aerobic exercise each week (≥ 150 minutes/wk of moderate exercise, or ≥ 75 minutes/wk of vigorous exercise)**
- **Percent of adults who obtain recommended amount of muscle-strengthening exercise each week (at least 2 days/wk)**
- **Percent of adults who obtain recommended amount of aerobic and muscle-strengthening exercises each week**
• Percent of children ages 6-17 years who obtain recommended amount of aerobic exercise each week (≥ 60 minutes, daily)²
• Percent of children ages 6-17 years who obtain recommended amount of muscle-strengthening each week (at least 2 days/wk)²
• Percent of children ages 6-17 years who obtain recommended amount of aerobic and muscle-strengthening each week²

### Mental Health
- Percent of adults with current depression
- Percent of adults at risk for major depression
- Alzheimer’s disease death rate (age-adjusted per 100,000 population)

### Communicable Diseases
- Incidence of HIV/AIDS (annual new cases per 100,000 population) among adolescents and adults ages 13 years or older
- HIV infection-related mortality rate (age-adjusted per 100,000 population)
- Incidence of primary and secondary syphilis (annual new cases per 100,000 population)
- Incidence of chlamydia (annual new cases per 100,000 population)
- Incidence of gonorrhea (annual new cases per 100,000 population)
- Incidence of tuberculosis (annual new cases per 100,000 population)

### Respiratory Disease
- Percent of children ages 0-17 years with current asthma (ever diagnosed with asthma and reported still have asthma and/or had an asthma attack in the past year)
- Pneumonia/Influenza mortality rate (age-adjusted per 100,000 population)
- COPD/Emphysema mortality rate (age-adjusted per 100,000 population)
Cancer

- Lung cancer death rate (age-adjusted per 100,000 population)*
- Breast cancer death rate among females (age-adjusted per 100,000 females)*
- Cervical cancer death rate among females (age-adjusted per 100,000 females)*
- Colorectal cancer death rate (age-adjusted per 100,000 population)*

All Cause Mortality

- (Age-adjusted per 100,000 population)*

LOCAL DATA SOURCES & NOTES

2. 2015 Los Angeles County Health Survey; Office of Health Assessment and Epidemiology, Los Angeles County Department of Public Health. Estimates are based on self-reported data by a random sample of 8,008 Los Angeles County adults and 5,982 Los Angeles County adults sufficiently knowledgeable about the child's health and well-being.

a. For language used most often at home, Asian includes: Burmese, Cambodian, Cantonese, Chinese unspecified, Filipino, Indian languages, Indonesian, Japanese, Korean, Mandarin, Sinhalese (Sri Lankan), Tagalog, Vietnamese. Other includes: European (Armenian, French, German, Hungarian, Italian, Ladino, Polish, Portuguese, Romanian, Russian); Middle Eastern (Arabic, Egyptian, Farsi/Persian, Greek, Hebrew, Turkish); African (Ethiopian, Nigerian); and Other (American Indian, Patois [Jamaican]).

b. Disability was defined as a positive response to any of the following questions: “Are you limited in any way in any activities because of a physical, mental, or emotional problem?”; “Do you now have any health problem that requires you to use special equipment, such as a cane, wheelchair, a special bed or special telephone?”; “Do you consider yourself a person with a disability?”

e. Unhealthy days refers to a composite of the number of reported poor physical and/or mental health days in the past month. [Reference: Centers for Disease Control and Prevention. Measuring Health Days. Atlanta, Georgia: CDC, November 2000. www.cdc.gov/hrqol/pdfs/mhd.pdf.]

f. Children with Special Health Care Needs (CSHCN) Screening Tool from the FACCT - Foundation for Accountability. The CSHCN screener has three “definitional domains.” These are: (1) Dependency on prescription medications; (2) Service use above that considered usual or routine; and (3) Functional limitations. The definitional domains are not mutually exclusive categories. A child meeting the CSHCN screener criteria for having a chronic condition may qualify for one or more definitional domains. [Reference: www.facct.org/cahmiweb/chronic/Screener/lwiscreen.htm.]

g. The Patient Health Questionnaire-2 (PHQ-2) is used as the initial screening test for major depressive episode. [Reference: Kroenke K, Spitzer RL, Williams JB. The Patient Health Questionnaire-2: validity of a two-item depression screener. Med Care 2003; 41:1284-92.]

4. US Census Bureau, 2010-2014 American Community Survey 5-Year Estimates (Table B25106: Tenure by housing costs as a percentage of household income in the past 12 months - universe: occupied housing units).

a. In previous Key Indicators of Health by Service Planning Area reports this indicator was worded as “rate of births (per 1,000 live births) to teens ages 15-19 years.” The wording has been updated to be more clear. Note: data are comparable to the prior reports.

8. Los Angeles County Department of Public Health (DPH), Office of Health Assessment and Epidemiology, Linked 2013 California DPH Death Statistical Master File for Los Angeles County Residents.

9. Los Angeles County Department of Public Health, Division of HIV and STD Prevention.

b. Sexually Transmitted Disease Casewatch System, Los Angeles County 2015 data. Data are provisional due to reporting delay. Excludes cases reported in the cities of Long Beach and Pasadena. Denominator data is based on 2015 LAC population estimates provided by the LAC DPH Office of Health Assessment and Epidemiology.

10. Los Angeles County Department of Public Health, Tuberculosis Control Program, 2014 data. TB cases in Pasadena and Long Beach are not included because these two cities have their own TB Control Programs.
NATIONAL DATA SOURCES

AC U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates. [Race: Tables B02001, B03002; Language spoken at home: Table B16007; Foreign born: Table S0501; Education: Table DP02; Poverty: Table DP03]. Additional note: data for education is for ages 25 years and older.

AC1 U.S Census Bureau, 2014 American Community Survey 5-year Estimates. [Table: B25106.]

HP U.S. Department of Health and Human Services. Office of Disease Prevention and Health Promotion. Healthy People 2020. Washington, DC. Available at: www.healthypeople.gov. Additional notes: data for breastfeeding is for children 19-35 months; teen binge drinking is for ages 12-17 years; adults who are obese is for ages 20 years and older.
