

# **Brain Health and Alzheimer's Disease and Related Dementias Awareness Social Media Toolkit**

---

**Updated: August 2022**

**Healthy Brain Initiative  
Los Angeles**

## Overview

The Healthy Brain Initiative: Los Angeles (HBI-LA) was launched by the Los Angeles County Department of Public Health as an intended effort to increase awareness about brain health, Alzheimer's disease and related dementias (ADRD), ADRD risk reduction strategies, and caregiving for ADRD, especially among Latino and African American communities with higher risk of ADRD.

To support this effort, the HBI-LA team developed a bilingual social media toolkit to promote key messages across social media platforms. This toolkit was designed using plain language and health literacy strategies to convey clear and concise messaging. In addition, messaging and images were developed using a positive framing approach.

## How to Use This Toolkit

Below are posts and images you can share across your social media platforms within your communities. Feel free to tailor posts so that the messaging resonates with your intended audience.

This toolkit features:

- Content related to three topic areas: Brain Health and ADRD Risk Reduction, ADRD Awareness, and Caregiving for ADRD;
- Post copy and images available in English and Spanish;
- Social media images available for Twitter, Facebook, Instagram; and
- Alt text is available to ensure content is accessible to low or no vision individuals.

## Key Tips

- When posting content on Twitter, keep posts limited to 280 characters. We recommend posts are accompanied by a visual.
- For Twitter, tag us @ChooseHealthLA or use #HealthyBrainLA in your post so we can retweet and engage with your content.
- Below are suggested holidays and health observances throughout the year that may help create awareness and increase engagement.
  - **February** - African American History/Black History Month
  - **April** - Minority Health Month
  - **June** - Alzheimer's & Brain Awareness Month
  - **September 15<sup>th</sup> through October 15<sup>th</sup>** - National Hispanic Heritage Month
  - **November** - National Alzheimer's Disease Awareness Month, National Family Caregivers Month

## Social Media Post Copy and Images

The following social media copy and accompanying images were designed for Twitter. However, you can adapt the content for Instagram and Facebook. You can access and download images for all three social media platforms on the [Box drive](#).
