Executive Summary

Asthma is a common chronic inflammatory disease of the lungs that makes it difficult to breathe. Common symptoms include recurrent wheezing and coughing, difficulty breathing, and tightness of the chest. Asthma attacks can range in severity from inconvenient to life-threatening. The exact causes of asthma are not fully known, but both genetics and the environment are contributing factors.

There is no known cure for asthma, but it can be controlled by following a medical management plan and by reducing exposure to environmental “triggers,” such as air pollution, cockroaches, dust mites, furry pets, mold, tobacco smoke, and other toxic and hazardous chemicals. Additionally, addressing social determinants of health such as poverty, unemployment, lack of quality health insurance, low educational attainment, old and substandard housing, environmental pollution, location of hazardous industries, and limited access to healthcare services will contribute to improving community health.

Children, communities of color (particularly African Americans and Latinos), and low-income communities bear the burden of asthma, having higher prevalence of asthma and increased rates of hospitalizations, deaths, and emergency room usage. This inflammatory lung disease is one of the most common chronic childhood diseases affecting millions of children nationwide. In Los Angeles County, approximately 1,250,000 children and adults have been diagnosed with asthma.

An effective approach in the fight against asthma will be one that incorporates multiple strategies designed to address the numerous factors that lead to asthma--including access to health care, adherence to housing and building codes, tobacco control, improved public transportation and reduced vehicle and industrial emissions.

This Strategic Plan builds upon the previous 2010-2012 Strategic Plan for the Asthma Coalition of Los Angeles County. This revised Plan includes specific goals and objectives based upon the four coalition workgroups: Health Care/Clinical Settings, Asthma Friendly Schools, Indoor Environments, and Outdoor Environments. This Plan is designed to be in alignment with the Strategic Plan for Asthma in California in order to guide the work of the Asthma Coalition of Los Angeles County by providing specific and attainable objectives to prevent or minimize asthma in Los Angeles County.

---

**Asthma in Los Angeles County**

**About Asthma**

Asthma is a common chronic inflammatory disease of the lungs that makes it difficult to breathe. Symptoms include wheezing, coughing, chest tightness, and shortness of breath. The exact causes of asthma are not fully known, but both genetics and the environment are contributing factors. Environmental triggers of asthma include indoor allergens, irritants and air pollutants such as dust mites, animal dander, cockroaches, mold, cleaners, pesticides, and tobacco smoke, as well as outdoor air pollutants resulting from motorized vehicle exhaust fumes and industrial emissions. While asthma cannot be cured, it can be effectively managed with proper medical care and with reduced exposure to both indoor and outdoor environmental triggers.

**The Asthma Burden**

Asthma rates across the nation have increased substantially over the past years, including within the Los Angeles area. Those affected most by asthma are individuals living within communities that lack access to regular, quality medical care and are exposed more frequently to indoor and/or outdoor asthma triggers. Low-income communities of color in Los Angeles County suffer the highest asthma rates due to a myriad of extenuating factors. Often, these communities lack health insurance and access to health care; live, work or go to school in substandard buildings where exposure to indoor asthma triggers is significantly prevalent; exhibit higher rates of tobacco use and exposure to second-hand smoke; or they may live, work or play in close proximity to congested freeways and industrial sites.4

According to data from a recent California Breathing report, more than 1.2 million children and adults have been diagnosed with asthma in Los Angeles County over their lifetime. Nearly one out of 10 children under the age of 17 in Los Angeles County has active asthma. More than 6% of adults aged 18 to 64, and 7% of those over age 65, have active asthma.5 The National Heart, Lung, and Blood Institute reports that rates of hospitalizations and deaths due to asthma are three times higher among African Americans than among Whites. Also, compared to White children, asthma prevalence is 1.6 times higher among African American children. The percentage of people with asthma taking daily controller medication is lower among Hispanics (23.2%) and African Americans (25.1%) than among Whites (35.1%).6 Likewise, low-income people of color with asthma miss more school and work days due to asthma.7

The Asthma Coalition of Los Angeles County

Vision Statement
Los Angeles County residents will live, work and learn in healthy environments where the effects of asthma are prevented or minimized and people with asthma will enjoy a high quality of life.

Mission Statement
The Asthma Coalition of Los Angeles County is a collective, powerful voice for policy and systems change to prevent, minimize and manage the burden of asthma.

Guiding Principles
1. We, the members of the Asthma Coalition of Los Angeles County, affirm we have a common purpose. Therefore, we commit ourselves to act in synergy, to pursue our shared vision by setting aside competitiveness, to pool our resources to achieve our mission, and to share responsibility for the Coalition’s successes and challenges.

2. We believe that consistency of individual participation over time is important and necessary for successful collaboration. Therefore Coalition members are encouraged to attend all Coalition meetings and events and to take responsibility for staying informed regarding Coalition actions and decisions.

3. We believe that each Coalition member has a voice. Therefore all opinions are respected and diverse opinions are encouraged.

4. We believe that developing relationships among Coalition members is key to our successful collaboration. Therefore all members are actively welcome at meetings and encouraged to greet new members and network with others.

5. We believe the Los Angeles region is a culturally, linguistically and economically diverse community. Therefore, we strive for diversity in our membership.

Structure
The general membership of the Coalition is the highest governing body and ultimate decision-maker (see Figure 1). The Coalition is organized by the Coordinator and functions through its Steering Committee and Workgroups. The Steering Committee provides leadership and direction to the ACLAC, and the Workgroups conduct activities in support of the Coalition’s goals and objectives.

  - Steering Committee
  - Workgroup Co-Chairs
  - Workgroups
    - Clinical, Healthcare
    - Asthma Friendly Schools
    - Indoor Air Quality
    - Outdoor Air Quality
The document “Controlling Asthma in Los Angeles: A Call to Action” (available online at www.asthmacoalitionla.org) set the foundation for the strategic priorities of the Asthma Coalition. The six key recommendations in the Call to Action include: Increase access to and improve quality of health care; improve indoor air quality; improve outdoor air quality; improve asthma management in schools/child care centers; address racial/ethnic and socio-economic disparities; and strengthen research related to asthma. These were incorporated into the revised goals and objectives.

### Health Care, Clinical Settings

**Goal 1: To increase access to and improve quality of health care**

**Goal Statement**

Comprehensive, culturally-appropriate, and high quality asthma care will be accessible to everyone in Los Angeles County, with a special focus on children, resulting in optimal prevention, diagnosis, treatment, and management of asthma.

**Objectives**

1.1 Advocate for professional development opportunities for asthma health care providers and community health workers/promotores de salud.
1.2 Identify and promote implementation of guidelines and best practices for asthma management.
1.3 Advocate for coverage, reimbursement, and on-going quality improvement for comprehensive asthma care.
1.4 Promote access to high quality asthma care for underserved populations in Los Angeles County and advocate for strategies to reduce barriers to care.
1.5 Utilize available research and data to identify populations with disproportionate asthma burden and promote asthma education, prevention of exacerbations, and control.
1.6 Promote integrated asthma support services and encourage communication and collaboration among patients, families, schools, and health care providers.

**Strategies**

1. S1: *(supports objectives 1.1, 1.2, 1.3, 1.4)*

   Utilize data and engage with partners to identify high-need providers for asthma education, and collaborate with other organizations that are already conducting asthma provider trainings to expand training opportunities for high-need providers in Los Angeles County.

1. S2: *(supports objectives 1.5 and 1.6)*

   Collaborate between the Clinical/Healthcare Workgroup and the Asthma Friendly Schools Workgroup to develop one comprehensive LA County asthma action plan (AAP) form and attain endorsement by the LA County Office of Education (LACOE).

1. S3: *(supports objectives 1.2 and 1.6)*

   Contact County and community clinics to work on implementing AAPs for pediatric patients.
## Asthma Friendly Schools

### Goal 2: To improve asthma awareness and management in schools

### Goal Statement

Everyone in Los Angeles County will benefit from schools that meet the needs of students with asthma and support, to the greatest extent possible, awareness of asthma management.

### Objectives

1. Support the development and implementation of comprehensive and coordinated asthma policies and procedures in school districts to ensure the health and well-being of students with asthma.
2. Promote good air quality through education in the reduction of asthma triggers to teachers, nurses, staff, and students to improve air quality in schools.
3. Advocate for the utilization of Asthma Action Plans (AAP) in schools for students with asthma.
4. Encourage participation in physical education and appropriate physical activity for students with asthma.
5. Promote collaboration between schools and health care providers to improve the health of students with asthma.

### Strategies

1. **S1:** *(supports objectives 2.1, 2.2, and 2.4)*
   
   Inform school staff about current policies and protocols and gain their support.

2. **S2:** *(supports objectives 2.1 and 2.3)*
   
   Engage LACOE to present positive asthma management strategies for school districts.

3. **S3:** *(supports objectives 2.1 and 2.5)*
   
   Encourage local health care providers to provide an AAP to all of their pediatric asthma patients.
## Indoor Air Quality

### Goal 3: To improve indoor air quality in homes

#### Goal Statement

Everyone in Los Angeles County will benefit from homes that meet the needs of people with asthma and provide, to the greatest extent possible, indoor spaces and adjacent environments that are free from air pollutants, allergens, and chemicals that cause or exacerbate asthma.

#### Objectives

- **3.1** Advocate for improved code enforcement by City and County housing inspectors.
- **3.2** Educate stakeholders about health and safety housing standards and the legal consequences of substandard housing.
- **3.3** Utilize available research and data to promote awareness of the association between health and substandard housing.
- **3.4** Promote collaboration among tenant rights groups, health care providers, community health workers/promotores de salud, and code enforcement officials.
- **3.5** Advocate for the use of integrated pest management (IPM) in homes.

#### Strategies

- **3.S1:** (supports objectives 3.1, 3.2, 3.3, and 3.4) Develop recommendations for the improvement of housing inspections and develop and distribute a resource guide for tenants seeking assistance and services for indoor air quality-related housing issues.
- **3.S2:** (supports objectives 3.3 and 3.5) Promote integrated pest management (IPM) as a viable healthy housing strategy that improves occupant health and reduces long-term maintenance costs.
- **3.S3:** (supports objectives 3.2) Educate tenants, landlords & other key stakeholders on strategies to reduce smoking and second-hand smoke in multi-family housing while protecting all parties involved in the issue.
- **3.S4:** (supports cross cutting objective 3) Increase the size of meetings by identifying, recruiting, and engaging stakeholders for the ACLAC and the IAQ workgroup.
### Outdoor Air Quality

#### Goal 4: To improve outdoor air quality

**Goal Statement**

A healthy and safe outdoor environment will exist for everyone in Los Angeles County, with a focus on preventing and controlling asthma.

**Objectives**

4.1 Promote policies and community plans that improve conditions or people with asthma.
4.2 Advocate for reducing air pollution from sources such as “goods movement” industries, stationary industries, and transportation.
4.3 Promote the elimination of disproportionate exposure to outdoor air pollution impacting vulnerable groups or communities.
4.4 Advocate for reducing smoking rates and decreasing exposure to secondhand smoke.

**Strategies**

4.S1: *(supports objectives 4.1, 4.2, 4.3, and 4.4)*

Respond to requests to sign on to campaigns, send letters of support and offer testimony for policies related to outdoor air quality and asthma.

4.S2: *(supports objectives 4.1 and 4.4)*

Gather and disseminate information and resources about current outdoor air quality-related policies and plans to Coalition members and other stakeholders.

4.S3: *(supports objectives 4.1, 4.2, 4.3, and 4.4)*

Coordinate meetings with legislators for Coalition members to educate them on the Coalition, the problem of asthma in their specific districts, and policies that the ACLAC is currently supporting.

Mission

The Asthma Coalition of Los Angeles County is a collective, powerful voice for policy and systems change to prevent, minimize and manage the burden of asthma.

Goals

Increase access to and improve quality of health care.

Improve asthma awareness and management in schools.

Improve indoor air quality in homes.

Improve outdoor air quality.

Objectives

Strategies
Implementation Process

This Strategic Plan was developed to be in alignment with the “Strategic Plan for Asthma in California” (available online at www.asthmapartners.org). The Plan will be implemented through the work of the four ACLAC Workgroups and monitored by the Steering Committee and the ACLAC Coordinator. In addition, the general Coalition will conduct meetings and activities in support of the Strategic Plan. Workgroup Co-Chairs will lead their groups in developing annual work plans that include strategies, deliverables, activities, and time lines based upon the goals and objectives of the Plan.

Work Plan Development

The ACLAC Workgroups will develop one-year work plans for each of the four focus areas of the Coalition: Clinical, Healthcare; Asthma Friendly Schools; Indoor Air Quality and; Outdoor Air Quality. The goals and objectives in this Strategic Plan were developed by the Workgroups in accordance with standard guidelines from the ACLAC Coordinator. The Workgroups will use these goals and objectives to develop concrete strategies, deliverables, activities, and realistic timelines. A sample work plan template is provided in Figure 3 below.

### Figure 4: ACLAC Logic Model

#### Inputs
- **ACLAC Coordinator** provided by DPH
- **Steering Committee** elected by membership to guide the efforts of the Coalition
- **ACLAC membership resources and time**
- **4 Workgroups** (Health care/ Clinical, Schools, Indoor Air Quality, Outdoor Air Quality)

#### Activities
- Establish, maintain and enhance effective County-wide partnerships
- Provide opportunities for education and training for Coalition members
- Promote asthma awareness through the Coalition website and social media
- Support asthma-related policies through outreach, letters of support, and public testimony
- Accomplish strategies of the ACLAC strategic plan through the implementation of annual work plans
- Seek/leverage funding to implement an asthma-focused project

#### Outputs
- Completed Membership Forms on file for all members
- Quarterly Coalition meetings held with engaging presentations
- Coalition web page and Facebook page updated regularly
- Letters of support for policies on file, documentation of testimonies given
- Work plans developed
- Funding secured

#### Short-term Outcomes
- Coalition partners and collaborators will have appropriate knowledge and skills to minimize the burden of asthma
- Completion of at least 1 strategy in each of the four Workgroups
- Support of at least 1 new policy that improves conditions for people with asthma
- Sustainability of Coalition with a dedicated coordinator
- Coordinated funding efforts resulting in a successful asthma project

#### Intermediate Outcomes
- Increased access and improved quality of health care
- Improved quality of indoor air in homes
- Improved outdoor air quality
- Improved asthma management in schools
- Coordinated funding efforts resulting in a successful asthma project

#### Long-term Outcomes
- Reduced ED visits due to asthma
- Reduced hospitalizations due to asthma
- Improved quality of life for LA County residents with asthma
- Reduced racial/ethnic and socioeconomic disparities in asthma
- Decreased school absenteeism
Evaluation Plan

Process Evaluation
The ACLAC will conduct ongoing process evaluation to track the quality of the Coalition’s work and to monitor fidelity to the Strategic Plan. A process evaluation plan was developed by the ACLAC Coordinator and approved by the Steering Committee (see Figure 5). Data collected through the process evaluation will inform Coalition members and stakeholders of important findings that may improve processes, activities, and short- and long-term outcomes.

Data Collection
The ACLAC Coordinator and/or Evaluator, in conjunction with the Workgroup Co-Chairs, will collect process evaluation data for nine key elements on a bi-monthly or quarterly basis (see Figure 5). The ACLAC Coordinator will regularly update and maintain standard documents and tracking spreadsheets. In addition, the Coordinator will distribute and collect General Meeting Evaluation forms at the quarterly general Coalition meetings. The evaluations will be analyzed and a summary of the results will be produced and shared with the Steering Committee after each General Meeting. In addition, workgroup Co-Chairs will use standard forms and templates to conduct meetings and track attendance. The Co-Chairs will share these completed forms with the ACLAC Coordinator.

Data Analysis and Reporting
Through the various methods described in the process evaluation plan, the ACLAC Coordinator and/or Evaluator and Workgroup Co-Chairs will summarize results in a written annual report. These results will be shared with the Steering Committee at the December meeting. Issues that are identified will be discussed at Steering Committee meetings, and possible changes or solutions will be proposed and implemented. Additionally, the ACLAC Coordinator will maintain regular communications with Workgroup Co-Chairs to monitor progress and provide technical assistance in collecting, analyzing, and reporting data.

Outcome Evaluation
The ACLAC will conduct outcome evaluation to ensure that intermediate and long-term outcomes are being achieved, resulting in effective and impactful Coalition work. An outcome evaluation plan will be developed by the Steering Committee and the ACLAC Coordinator based on the deliverables that the Workgroups develop for each of their strategies. The ACLAC Co-Chairs and Coordinator will review Work Plans with each Workgroup’s Co-Chairs at the end of each fiscal year (April) to determine whether activities were conducted and deliverables produced.

Sustainability Plan

Coordination and Funding
The ACLAC will ensure that there is always a coordinator to organize, strategize and oversee all activities and outcomes for the Coalition. The current coordinator is provided in the form of a CDC Public Health Prevention Service (PHPS) Fellow from October 2012-October 2014. After the PHPS Fellow assignment is completed, the MCAH programs at DPH will appoint another staff person(s) to dedicate a substantial portion of his/her time to coordinate the ACLAC.

The coalition will continue to seek funding through appropriate grant opportunities and identify feasible projects to implement asthma-focused activities throughout LA County.

Leadership and Recruitment
Another important component of the ACLAC’s sustainability is ensuring that there is a strong leadership base of members who are dedicated to the Coalition’s work and capable of carrying out and maintaining activities. The ACLAC Coordinator will continue working with the current leadership to help build their capacity and enable them to take on roles and tasks independently. The Steering Committee members and Workgroup Co-Chairs will also outreach to new, current, and returning members to continually engage them in the Coalition and encourage them to step into leadership roles.
