## **Instructions For Assessment of Prenatal Weight Gain**

#### 1. Find the Woman's Weight Category

- Measure her height without shoes.
- Ask the woman her weight before pregnancy (*known* as *pre-pregnancy weight*). If she does not know her pre-pregnancy weight, refer to health care provider and /or <u>calculate</u> the pre-pregnancy weight (see separate instructions).
- Find the woman's height on Table 1 and follow across the row to find her prepregnancy weight.
- The title of the column with her pre-pregnancy weight tells you her **weight** category and also the woman's "Body Mass Index" (BMI) range.

#### **Example:**

A woman is 5 feet 2 inches tall. She weighed 145 pounds before pregnancy. Her **weight category** is Overweight . . . Her **BMI range** = 25-29.9.

#### 2. Find the Recommended Range and Rate of Weight Gain

- Find the Recommended Weight Gain Range for her weight category on Table 2.
- Research has shown that there is insufficient data to recommend rate of weight gain for the 1<sup>st</sup> trimester.
- Find the recommended 2<sup>nd</sup>/3<sup>rd</sup> trimester rate of gain per month for her weight category.

#### **Example:**

An Overweight woman should gain 15 to 25 pounds. A weight gain of 2 pounds per month is recommended during the 2<sup>nd</sup> and 3<sup>rd</sup> trimester.

#### 3. Find the Right Weight Gain Grid

- The weight gain grid is a tool that helps you see if the woman is gaining within the recommended range.
- Choose the grid that matches her weight category. *There are four weight gain grids:* Underweight, Normal Weight, Overweight, and Obese. Document the pre-pregnancy weight and height on the correct grid.

#### • The Weight Gain Grid:

- The *horizontal zero line* starts at conception.
- The *vertical zero line* represents the woman's weight before pregnancy.
- Each horizontal line <u>above</u> the zero represents one pound *gained*.
- Each horizontal line below the zero represents one pound *lost*.
- Each vertical line represents one more week into the pregnancy (gestational age).

#### 4. Plot the Weight Gain Grid

- Note: Record the woman's pre-pregnancy weight on the appropriate weight grid.
- If she does not know her pre-pregnancy weight, document the weight that was estimated or calculated.
- Take the woman's weight today and substract it from her pre-pregnant weight. This number equals the number of pounds she has gained (+) or lost (-).

#### **Example:**

A woman, 5 feet 2 inches weighed 145 pounds before pregnancy. At 18 weeks gestation she weighs 151 pounds (lbs).

(151 lbs.-145 lbs. = 6 lbs. She gained 6 lbs.

- Find the line that marks her weight change and the line that marks the number of weeks of gestation.
- Mark an **X** where these two lines meet.
- Check to see whether her total weight gain at this visit falls within her target weight gain range. In this example she is within the range for overweight women.

• Plot weight gain at <u>each prenatal</u> visit. <u>Always subtract the pre-pregnant weight</u> <u>from today's weight</u>.

• Show the woman where her weight is on the grid. Discuss her weight gain progress.

#### 5. What the Weight Gain Grid Tells You

- The weight gain grid can tell you if the woman is gaining too fast, too slow, or just right. The pattern of weight gain is as important as the total gain.
- The grid is also a screening tool to identify women who need more in-depth assessment and counseling.
- When a woman's gain is outside the recommended range, assess factors that may affect her weight gain. See "Low Weight Gain" and "High Weight Gain" in the Nutrition section of Steps to Take Guidelines.

Some women may not follow the curves of the Weight Gain Grid or may be four or five pounds above or below the recommended line even though they are eating a nutritious diet. Other women may be eating too little or too much. It is important to find out what the woman is eating. Follow the guidelines for the <u>Perinatal Food Frequency Questionnaire</u> (PFFQ).

(A 24-hour food recall is also an acceptable dietary assessment tool, but is not recommended unless the assessor has received adequate training.)

#### Steps to Take for Appropriate Weight Gain

• If the woman is gaining above or below the recommended range, complete the Perinatal Food Frequency Questionnaire (or 24-Hour Food Recall) monthly.

Emphasize the <u>Daily Food Guide for Pregnancy</u> whether or not the pregnancy weight gain fits the recommended weight gain grid.

• If she is not eating enough or eating too much in any of the food groups, discuss with the woman the changes she needs to make in her diet.

Make a plan together that will bring about positive changes.

• If her weight gain is within the recommended range, assess her diet.

If her diet is fine, congratulate the woman and encourage her to continue eating well.

Review her diet intake each month and her weight at each prenatal visit.

• If her weight gain is below the recommended range, review "Low Weight Gain" in the Nutrition section of Steps to Take Guidelines.

Even if the woman is not eating enough of certain foods, look for other factors which may also explain the low weight gain.

• If her weight gain is above the recommended range, review "High Weight Gain" in the Nutrition section of Steps to Take Guidelines.

Do not restrict the diets of women who are gaining extra weight when they consume low fat foods within the recommended number of food groups.

Even if the woman is eating too much of certain foods, look for other factors which may also explain her excess weight gain.

• Continue to monitor weight gain at each prenatal visit.

<sup>\* -</sup> IOM, 2009. Weight Gain During Pregnancy: Reexamining the Guidelines. Washington, DC: National Academies Press.

<sup>\*\* -</sup> Steps to Take, Comprehensive Perinatal Services—Program Guidelines for Enhanced Health Education, Nutrition, and Psychosocial Services, Step to Take Guidelines, 1997 Edition, CDHS.

<sup>\*\*\* -</sup> Research to date concludes that there is insufficient data for recommendation for rate of weight for the  $1^{\rm st}$  trimester.

## INSTRUCTIONS WHEN PRE-PREGNANCY WEIGHT IS NOT KNOWN

#### At the first visit:

- 1. Estimate the woman's pre-pregnancy status (*underweight, normal weight, overweight or obese weight*) by considering her current height and weight. If uncertain, consider her to be within the normal range.
- 2. Determine the week of gestation at the time of the current weight.
- 3. Place a dot on the grid where the line representing the week of gestation crosses the lower line of the weight gain range estimated to be appropriate for the woman.
- 4. Subtract the number of pounds represented by the line at the dot from the current weight to determine an estimated pre-pregnancy weight. Record this estimated pre-pregnancy weight on the appropriate weight gain grid, noting that it is "estimated", or "calculated".

#### **Example:**

Pre-pregnancy Weight = Est. 150 lbs. - **or** Pre-pregnancy Weight = Calc.150 lbs.

#### When future weight measurements are available:

- 1. Determine the number of pounds gained or lost by comparing the current weight with the estimated pre-pregnancy weight.
- 2. Determine the week of gestation on the date of the current weight.
- 3. Place a dot on the grid where the line representing the number of pounds gained or lost crossed the line representing the week of gestation.
- 4. Compare the change in weight between measurements with the gain expected for the estimated pre-pregnancy status (*underweight, normal weight, overweight, or obese*).
- 5. Consider the results of this assessment with the results of the dietary and clinical (physical/medical) assessment to determine appropriate recommendations.

**CPSP Nutrition Steps to Take Guidelines** 

\* Current research suggests that the optimal gestational weight gain might be <u>lower</u> than the Institute of Medicine (IOM) recommendations for all maternal BMI categories, especially among <u>obese women</u>.

### \*Daily Food Guide for Pregnant/Breastfeeding Women (All Ages) 6

| Food Groups   | One Serving Equals   |   | Recommended<br>Minimum Servings                      |
|---|--|---|--|
| Protein Foods Provide protein, iron, zinc, and B-vitamins for growth of muscles, bone, blood, and nerves. Vegetable protein provides fiber to prevent constipation.                   | Animal Protein: 2-3oz Cooked chicken, turkey, lean beef, lamb, pork, or fish. 2 Eggs 2 Fish sticks or hot dogs 2 slices luncheon meat 1/4 cup canned tuna or other canned fish             | Vegetable Protein:  ½ cup cooked dry beans, lentils or split peas  3 oz Tofu  ¼ cup nuts or seeds  2 tbsp. peanut butter  | Include one serving of vegetable protein daily.      |
| Milk Products Provide protein and calcium to build strong bones, teeth, healthy nerves and muscles, and to promote normal blood clotting.   | 8 oz milk or yogurt 1 cup milk shake 1½ cup cream soup (made with milk) 1½ oz or 1/3 cup grated cheese (like cheddar, Monterey, mozzarella, or Swiss)                                      | 1½ -2 slices pre-sliced American cheese 4 tbsp. parmesan cheese 2 cups cottage cheese 1 cup pudding, custard or flan 1½ cups ice milk, ice cream, or frozen yogurt                        | 3  |
| Breads, Cereals & Grains Provide carbohydrates and vitamins for energy and healthy nerves. Also provide iron for healthy blood and fiber to prevent constipation.                     | 1 slice bread or dinner roll ½ bun, bagel, English muffin or pita 1 small tortilla ¾ cup dry cereal ½ cup cooked cereal or granola   | 1/2 cup rice, noodles or spaghetti 1/4 cup wheat germ 1 4-inch pancake or waffle 1 small muffin 8 medium crackers 4 graham cracker squares 3 cups popcorn                                 | <b>7</b> Four servings of whole-grain products daily |
| Vitamin C-Rich Fruits and Vegetables Provide vitamin C to prevent infection and to promote healing and iron absorption. Also provide fiber to prevent constipation.                   | 6 oz orange, grapefruit, or fruit juice enriched with vitamin C 6 oz tomato juice or vegetable juice cocktail 1 orange, kiwi, mango ½ grapefruit, cantaloupe ½ cup papaya 2 tangerines     | ½ cup strawberries ½ cup cooked or 1 cup raw cabbage ½ broccoli, Brussels sprouts, or cauliflower, snow peas, sweet peppers, or tomato puree 2 tomatoes                                   | 1  |
| Vitamin A-rich Fruits and Vegetables Provide beta-carotene and vitamin A to prevent infection and promote wound healing and night vision. Also provide fiber to prevent constipation. | 6 oz apricot nectar, or vegetable juice cocktail 3 raw or ¼ cup dried apricots ¼ cantaloupe or mango 1 small or ½ cup sliced carrots 2 tomatoes  | ½ cup cooked or 1 cup raw<br>spinach<br>½ cup cooked greens (beet, chard,<br>collards, dandelion, kale,<br>mustard)<br>½ cup pumpkin, sweet potato,<br>winter squash, or yams.            | 1  |
| Other Fruits & Vegetables Provide carbohydrates for energy and fiber to prevent constipation.   | 6 oz fruit juice (if not listed above) 1 medium or ½ cup sliced fruit (apple, banana, peach, pear) ½ cup berries (other than strawberries) ½ cup cherries, grapes, pineapple or watermelon | 1/4 cup dried fruit 1/2 cup sliced vegetable (asparagus, beets, green beans, celery, corn, eggplant, mushrooms, onion, peas, potato, summer squash, zucchini) 1/2 artichoke 1 cup lettuce | 3  |
| Unsaturated Fats Provide vitamin E to protect tissue.  Note: The Daily Food Guide for   | 1/8 medium avocado 1 tsp. margarine, mayonnaise or vegetable oil or Women may not provide all the calo   | 2 tsp. salad dressing (mayonnaise-<br>base)<br>1 tbsp. salad dressing (oil based)<br>ries you require. The best way to increase   | 3 e your intake is to                                |

Note: The Daily Food Guide for Women may not provide all the calories you require. The best way to increase your intake is to include more than the minimum servings recommended.

<sup>\*-</sup>Adapted for LAC/DHS-CPSP Trainings

### LOS ANGELES COUNTY COMPREHENSIVE PERINATAL SERVICES PROGRAM

#### INSTRUCTIONS FOR THE PERINATAL FOOD FREQUENCY QUESTIONNAIRE

The Perinatal Food Frequency Questionnaire (PFFQ) is used to determine the different foods a patient eats each day or week. This dietary information is used together with anthropometric (height/weight), biochemical (labs), and clinical information to complete the nutrition component of the Prenatal Initial Combined Assessment/Reassessment Tool (ICA).

#### **FOOD INTAKE & FREQUENCY**

A nutrition assessment needs to be completed on every woman, initially and at least once each trimester, *using a Perinatal Food Frequency Questionnaire*. The questionnaire will help the evaluator:

- assess the patient's nutritional status;
- compare what and how much she eats to the Daily Food Guide recommendations;
- help her find foods she enjoys in food groups where she doesn't eat enough; and
- learn about her food habits, culture, family, and lifestyle

#### **HOW TO DO A PERINATAL FOOD FREQUENCY QUESTIONNAIRE - (PFFQ)**

The Perinatal Food Frequency Questionnaire (PFFQ) uses the seven food groups from the *Daily Food Guide for Women*. Foods are grouped according to similar nutrients and one food can be exchanged for another within the same group. Eating the recommended number of servings in groups 1-6 assures that a pregnant or breastfeeding woman will eat at least 90% of the Recommended Dietary Allowances (RDA) for protein, vitamins, and minerals. Eating the recommended servings in the "Other Foods" group (identified with the triangle ▲ symbol), assures appropriate intake of unsaturated fats and vitamin E.

Either the client or evaluator can complete the questionnaire. The client instructions are at the top of the page of the PFFQ. **Note:** although it states "*if you eat the food less than 1* time *per week, do not mark columns*," this information must be reviewed and totaled by the evaluator who should fill in any blanks with a "0". The "Other Foods" group is not scored, but is evaluated to capture the intake of unsaturated fats.

Record the final scores of the PFFQ in question #90 of the ICA- "Nutrition Assessment Summary". *A completed PFFQ is also required for each trimester reassessment and postpartum assessment and must remain in the chart.* Completing a PFFQ takes practice. Speed and accuracy will come as more questionnaires are completed.

The PFFQ uses a *point system* to determine if the diet is adequate. The points in the *bottom left corner* of each box – in parentheses - are equal to the recommended number of servings in the Daily Food Guide multiplied by 7 *(1 serving equals 7 points).* For example: In Group 1 (Protein), a patient needs 21 points. This is equal to 3 "servings." *Follow the Steps Below:* 

7A

#### 1. Explain what you are going to do:

"I am going to read off a list of foods. For each food tell me the number of times you eat that food every day. If you do not eat that food daily, tell me how many times you eat that food each week."

#### 2. Fill out the PFFQ:

As you read off the foods, write in the client's answers. If she eats the food every day, write down her answer in the **Daily** column. If she does not eat a food every day, write down her answer in the **Weekly** column. If she eats the food less than one time per week, document a zero.

#### 3. Score the PFFQ:

After filling out the answers for all the food groups, go back and add up the totals for groups 1-6. For each group:

- a Add all the numbers in the **Daily** column and write that number on the **Subtotals** line, to the left of "\_\_\_ x 7=". Multiply this number by 7 and write in the total to the right of the "x 7 =\_\_\_ ".
- b Add all the numbers in the **Weekly** column and write that total on the **Subtotals** line.
- c Add the subtotals from the **Daily** column and **Weekly** column. Write the total on the last line next to **Total Points.**

#### 4. Discuss the changes she should make to her diet:

Review each food group and provide suggestions to help client meet her needs. Use the following information to help evaluate her needs:

- a Compare the **Total Points** of each group with the **Recommended Points** (found in *parentheses* in the lower left corner of each box (*shaded area*).
- b If the **Recommended Points** are greater than the **Total Points**, the client is not meeting her minimum needs for that group. To advise her on how many servings to add to her daily diet **subtract** the **Total Points** from the **Recommended Points** and divide the answer by 7. This number is the number of servings from that group the client needs to add to her diet every day.
  - \* The diet is low in total protein only if the combined points of groups 1 and 2 are less than 35.
  - \* A star (\*) next to a food indicates that this food is high in folate. A diet may be low in folate if the total for all starred foods is less than 7.
  - \* A triangle (▲) next to a food indicates that it is high in unsaturated fats. A diet may be low in unsaturated fats if the total intake is less than 3.
- c If the **Total Points** is greater than the **Recommended Points** you will need to evaluate whether a decrease in servings is necessary. (Remember that the

**Recommended Points** is the minimum number suggested: a greater intake may be encouraged.) Use the following guidelines to advise the client:

#### Groups 1 & 2:

Encourage client to eat the lower fat sources from these groups (chicken, fish and beans from Group1; low-fat/nonfat dairy from Group 2). Determine whether a high intake of foods from these groups interferes with an adequate intake from other groups. If intake from these groups is very high, suggest replacing some servings from these groups with servings from the other groups that are deficient.

#### Group 3:

Encourage client to eat whole grains. Remind client to limit high fat additions to foods, like butter, margarine, or cream sauces. Determine whether a high intake of foods from this group interferes with an adequate intake from other groups. If intake from this group is very high, suggest replacing some servings from this group with servings from the other groups that are deficient.

#### Groups 4, 5, & 6:

A high intake from these groups should be encouraged. Remind client to eat a variety of foods from each group. Be sure fruit intake includes both juices and whole fruits. Remind client to limit intake of fried vegetables and limit higher fat additions to vegetables, like butter, cheese, or cream sauces.

#### "Other Foods" Group:

This group is not scored, but is important to evaluate the intake of unsaturated fats. In general, more than 3 servings per day of foods that are high in fat or sugar may lead to excess weight or displacement of more nutritious foods.

It is recommended that fat be limited to the items indicated with the triangle ( $\blacktriangle$ ), which are high in unsaturated fat. Encourage clients to eat these foods in moderation. Determine whether a high intake of foods from this group interferes with an adequate intake from other groups. If intake from this group is very high, suggest replacing some servings from this group with servings from groups that are deficient. Check the client's weight. If she is overweight, or if she is gaining weight too quickly, advise her to limit these foods. If she is underweight, or if she is gaining weight too slowly, advise her to eat adequate amounts from all the food groups, and then add these extra foods.

### Incorporating PFFQ Information Into Initial Combined Assessment/Reassessment Tool

The PFFQ information needs to be transferred to the "Nutrition Assessment Summary" section (question #90) of the ICA. Transfer the **Total Points** from each food group (1-6) to the corresponding food group line in question # 90. (Remember to put a check ☑ in the box for "Food Frequency (7 days)" to indicate that you used a PFFQ rather than a 24-hour diet recall. Circle the word "**points**" in **Part a** "Food Group"/ column 2 "Servings/Points."

- 1. If **Recommended** Points are greater than **Total Points**:
  - 1. Subtract **Total Points** from **Recommended Points**.
  - 2. Divide this total by 7. Write this number in the column under "Suggested Changes"
  - 3. Circle the "+" sign under "Suggested Changes."
- 3. If the **Total Points** are greater than **Recommended Points**:
  - a. Subtract Recommended Points from Total Points.
  - b. Divide this total by 7. Write this number in the column under "Suggested Changes"
  - c. Circle the "-" sign under "Suggested changes."
- 4. Complete **Part b** for initial assessment.
- 5. Repeat above steps for each reassessment and postpartum visit.

#### DIETARY ASSESSMENT SUMMARY

This section must be completed by the Evaluator for the Initial Combined Assessment (ICA), and for  $2^{nd}$  and  $3^{rd}$  trimester reassessments, and for postpartum assessment.

#### - Diet Inadequate/Excessive In:

Compare actual points with recommended points. Note which food groups/nutrients are inadequate or excessive and list them in appropriate areas. For initial assessment, transfer this information to the "Nutrition Assessment Summary" of the ICA.

#### - Comments /Needs:

Note any pertinent findings from Food Groups 1-6 and "Other Foods". This information may be useful in development of the Individualized Care Plan (ICP).

#### - Nutrition Intervention:

Summarize what you have done for the woman by checking the appropriate intervention(s) as follows:

>check when you have completed counseling for identified problems; check if you have given a brochure (*you may note which one*); check if you have referred high risk patients to the Registered Dietitian (R.D.) per protocols.

Sign and date tool; record the woman's name and ID/chart information.

**Note:** A 24-hour diet recall may be used instead of a Food Frequency Questionnaire, but the provider must demonstrate that staff have been adequately trained and knowledgeable in its use.

SS 8572 (Rev. 12/02)

#### **DEFINITIONS AND INSTRUCTIONS ON REVERSE**

#### DEFINITIONS AND GENERAL INSTRUCTIONS FOR COMPLETION OF FORM SS 8572

All Penal Code (PC) references are located in Article 2.5 of the PC. This article is known as the Child Abuse and Neglect Reporting Act (CANRA). The provisions of CANRA may be viewed at: <a href="http://www.leginfo.ca.gov/calaw.html">http://www.leginfo.ca.gov/calaw.html</a> (specify "Penal Code" and search for Sections 11164-11174.3). A mandated reporter must complete and submit the form SS 8572 even if some of the requested information is not known. (PC Section 11167(a).)

#### I. MANDATED CHILD ABUSE REPORTERS

 Mandated child abuse reporters include all those individuals and entities listed in PC Section 11165.7.

### II. TO WHOM REPORTS ARE TO BE MADE ("DESIGNATED AGENCIES")

 Reports of suspected child abuse or neglect shall be made by mandated reporters to any police department or sheriff's department (not including a school district police or security department), the county probation department (if designated by the county to receive mandated reports), or the county welfare department. (PC Section 11165.9.)

#### III. REPORTING RESPONSIBILITIES

- Any mandated reporter who has knowledge of or observes a child, in his or her professional capacity or within the scope of his or her employment, whom he or she knows or reasonably suspects has been the victim of child abuse or neglect shall report such suspected incident of abuse or neglect to a designated agency immediately or as soon as practically possible by telephone and shall prepare and send a written report thereof within 36 hours of receiving the information concerning the incident. (PC Section 11166(a).)
- No mandated reporter who reports a suspected incident of child abuse or neglect shall be held civilly or criminally liable for any report required or authorized by CANRA. Any other person reporting a known or suspected incident of child abuse or neglect shall not incur civil or criminal liability as a result of any report authorized by CANRA unless it can be proven the report was false and the person knew it was false or made the report with reckless disregard of its truth or falsity. (PC Section 11172(a).)

#### IV. INSTRUCTIONS

• **SECTION A - REPORTING PARTY:** Enter the mandated reporter's name, title, category (from PC Section 11165.7), business/agency name and address, daytime telephone number, and today's date. Check yes-no whether the mandated reporter witnessed the incident. The signature area is for either the mandated reporter or, if the report is telephoned in by the mandated reporter, the person taking the telephoned report.

#### IV. INSTRUCTIONS (Continued)

- SECTION B REPORT NOTIFICATION: Complete the name and address of the designated agency notified, the date/ time of the phone call, and the name, title, and telephone number of the official contacted.
- **SECTION C VICTIM (One Report per Victim):** Enter the victim's name, address, telephone number, birth date or approximate age, sex, ethnicity, present location, and, where applicable, enter the school, class (indicate the teacher's name or room number), and grade. List the primary language spoken in the victim's home. Check the appropriate yes-no box to indicate whether the victim may have a developmental disability or physical disability and specify any other apparent disability. Check the appropriate yes-no box to indicate whether the victim is in foster care, and check the appropriate box to indicate the type of care if the victim was in out-of-home care. Check the appropriate box to indicate the type of abuse. List the victim's relationship to the suspect. Check the appropriate yes-no box to indicate whether photos of the injuries were taken. Check the appropriate box to indicate whether the incident resulted in the victim's death.
- SECTION D INVOLVED PARTIES: Enter the requested information for: Victim's Siblings, Victim's Parents/ Guardians, and Suspect. Attach extra sheet(s) if needed (provide the requested information for each individual on the attached sheet(s)).
- SECTION E INCIDENT INFORMATION: If multiple victims, indicate the number and submit a form for each victim. Enter date/time and place of the incident. Provide a narrative of the incident. Attach extra sheet(s) if needed.

#### V. DISTRIBUTION

- **Reporting Party:** After completing Form SS 8572, retain the yellow copy for your records and submit the top three copies to the designated agency.
- Designated Agency: Within 36 hours of receipt of Form SS 8572, send white copy to police or sheriff's department, blue copy to county welfare or probation department, and green copy to district attorney's office.

OCJP-920 (NEW 11/03)

#### SUSPICIOUS INJURY REPORT

Go to Form OCJP-920

#### Instructions To The Health Practitioner

Penal Code Section 11160 mandates the following regarding suspicious injuries:

- Internal procedures established to facilitate reporting and apprise supervisors and administrators of reports shall be consistent with the reporting requirements of PC Section 11160. The internal procedures shall not require any employee who must make a report to disclose his or her identity to the employer.
- Report suspicious injuries to your local law enforcement agency by telephone **immediately**, or as soon as practically possible.
- Submit the required completed written report to your local law enforcement agency within two working days of discovering a suspicious injury, whether or not:
  - 1. The person has expired;
  - The injury was a factor contributing to the person's death; or
  - Evidence of the conduct of the perpetrator is discovered during an autopsy.
- Use this standard form or a form, developed and adopted by another state agency, that otherwise fulfills the requirements of this form, (see "Exceptions to using this form" below).
- Two or more health practitioners with knowledge of a suspicious injury may mutually select a team member to make the telephone report and one written report signed by the selected team member. A team member who knows that the selected team member has not made the telephone call or submitted the written report shall make the report(s).
- No supervisor or administrator shall impede or inhibit the required reporting duties, and no person making a report pursuant to this section shall be subject to any sanction for making the report.

#### **Exceptions To Using This Form**

Other state reporting mandates pre-empt the use of this form to report suspicious injuries, as follows:

| Incident                      | Form                   | Source of Form   |
|-------------------------------|------------------------|--|
| Physical Child Abuse          | SS 8572                | Call California Department of Justice at (916) 227-3285.   |
| Dependent Adult / Elder Abuse | SOC 341                | Online: <a href="http://www.dss.cahwnet.gov/pdf/SOC341.pdf">http://www.dss.cahwnet.gov/pdf/SOC341.pdf</a> or contact your local County Adult Protective Services Dept. |
| Sexual Assault – Adult*       | OCJP 923*              | Online, www.noin.com.com/nublications.htm  |
| Sexual Assault – Child*       | OCJP 925*<br>OCJP 930* | Online: <a href="https://www.ocjp.ca.gov/publications.htm">www.ocjp.ca.gov/publications.htm</a> or call OCJP at (916) 324-9100.  |

<sup>\*</sup>Use these forms to conduct a forensic examination of the victim. Otherwise, use this Suspicious Injury Report form.

#### **Definitions**

Health Practitioner - Provides medical services to a patient for a physical condition that he/she reasonably suspects is a suspicious injury as listed below, and is employed in a health facility, clinic, physician's office, local or state public health department, or a clinic or other type of facility operated by a local or state public health department.

Suspicious Injury - Includes any wound or other physical injury that either was:

- Inflicted by the injured person's own act or by another where the injury is by means of a firearm, OR
- Is suspected to be the result of assaultive or abusive conduct inflicted upon the injured person.

**Injury** - Shall not include any psychological or physical condition brought about solely through the voluntary administration of a narcotic or restricted dangerous drug.

Assaultive / Abusive Conduct - includes committing, or an attempt to commit, any of the following Penal Code violations:

- · Abuse of spouse or cohabitant
- Aggravated mayhem
- · Administering controlled substances or anesthetic to aid in the commission of a felony
- · Assault with a stun gun or taser
- Assault with a deadly weapon, firearm, assault weapon or machine gun, or by means likely to produce great bodily injury
- · Assault with intent to commit mayhem, rape, sodomy, or oral copulation
- Battery
- Child abuse or endangerment (including Statutory Rape)
- Elder abuse
- Incest
- · Lewd and lascivious acts with a child
- Murder
- Manslaughter
- Mayhem
- Oral copulation
- · Procuring any female to have sex with another man
- Rape
- · Sexual battery
- Sexual penetration

- Sodomy
- Spousal rape
- · Throwing any vitriol, corrosive acid. or caustic chemical with intent to injure or disfigure
- Torture

## When Sexual Intercourse\* with a Minor Must Be Reported as Child Abuse: California Law

In California, health care practitioners are mandated to report any reasonable suspicion of child abuse. Sexual intercourse with a minor is reportable as child abuse *when*:

#### 1. WHEN COERCED OR IN ANY OTHER WAY NOT VOLUNTARY

Mandated reporters must report any intercourse that was coerced or in any other way not voluntary, irrespective of the ages of the partners and even if both partners are the same age. Sexual activity is not voluntary, for example, when accomplished against the victim's will by means of force or duress, or when the victim is unconscious or so intoxicated that he or she cannot resist. *See* Penal Code § 261 for more examples. Irrespective of what your patient tells you, treating professionals should use clinical judgment and "evaluate facts known to them in light of their training and experience to determine whether they have an objectively reasonable suspicion of child abuse." 249 Cal. Rptr. 762.

#### 2. BASED ON AGE DIFFERENCE BETWEEN PARTNER AND PATIENT IN A FEW SITUATIONS

Mandated reporters also must report based on the age difference between the patient and his or her partner in a few circumstances, according to the following chart:

**KEY: M** = *Mandated.* A report is mandated based solely on age difference between partner and patient.

**CJ** = Clinical Judgment. A report is not mandated based solely on age; however, a reporter must use clinical judgment and must report if he or she has a reasonable suspicion that act was coerced, as described above.

| Age of Partner ⇒ | 12 | 13 | 14 | 15 | 16 | 17 | 18  | 19       | 20 | 21      | 22 and older          |  |

#### Do I have a duty to ascertain the age of a minor's sexual partner for the purpose of child abuse reporting?

No statute or case obligates health care practitioners to ask their minor patients about the age of the minors' sexual partners for the purpose of reporting abuse. Rather, case law states that providers should ask questions as in the ordinary course of providing care according to standards prevailing in the medical profession. Thus, a provider's professional judgment determines his practice. 249 Cal. Rptr. 762, 769 (3<sup>rd</sup> Dist. Ct. App. 1988).

#### What do I do if I am not sure whether I should report something?

When you aren't sure whether a report is required or warranted, you may consult with Child Protective Services and ask about the appropriateness of a referral.

<sup>\*</sup>This worksheet addresses reporting of consensual vaginal intercourse between **non-family members**. It is not a complete review of all California sexual abuse reporting requirements and should not be relied upon as such. For more information on other reporting rules and how to report in California and other states, check <a href="https://www.teenhealthrights.org">www.teenhealthrights.org</a>

# **Keypoints for the Individualized Care plan**

- The ICP must be developed in conjunction with the patient.
- For each identified problem develop a goal with the patient.
- Be sure to reinforce strengths with the patient in order to increase her self-esteem.
- Use identified CPSP problem list when developing a plan.
- Each problem must have a plan of proposed interventions.
- The plan includes interventions which are appropriate and are not in conflict with the patient's status, needs or wishes.
- The interventions may include action taken by CPSP staff or referrals to outside agencies.
- Referrals to outside resources should include name of agency, contact person and telephone number.
- The interventions should include persons responsible, methods, time frame, and outcome objectives.
- Clearly document when the intervention was done.
- The plan for high-risk patient may need to be further described in a progress note.
- Update plan with current changes throughout the pregnancy.
- The ICP should be utilized in case conferences.

# Maternal Child Adolescent Health Programs COMPREHENSIVE PERINATAL SERVICES PROGRAM Documentation Guidelines

The purpose of this section is to provide guidance to Comprehensive Perinatal Services Program (CPSP) providers regarding documentation of services provided and billed to Medi-Cal. These guidelines are complementary to other resources and rules regarding the CPSP requirements in statute, regulations, billing manuals, and Medi-Cal Services bulletins; these guidelines do not supersede the other requirements.

It is hoped that the CPSP Documentation Guidelines will assist providers in reducing billing problems and meeting program requirements. These Guidelines may be used by the Department of Health Services auditors in addition to the other documents mentioned above.

## **Basic Principles for CPSP Billing**

#### All Services billed must be:

- 1. Provided by a Department of Health Services certified Comprehensive Perinatal Service Provider:
- 2. Provided in direct patient contact before they are billed;
- 3. Billed in accordance with the appropriate procedure codes;
- 4. Documented in writing. If there is no documentation, the assumption is that no services was given;
- 5. Patient services as specified in the CPSP regulations;
- 6. In accordance with the instructions in the Medi-Cal Training Syllabus for Medi-Cal obstetrics (OB/CPSP); and
- 7. Submitted no later than six months subsequent to the month in which the CPSP services was provided or in accordance with State Law.

### **CPSP BILLING INFORMATION**

### **BONUSES**

EARLY ENTRY INTO CARE (Z1032-ZL) - If the patient receives her initial pregnancy-related exam within 16 weeks LMP (anytime up to 16 weeks), add modifier -ZL to the Initial Pregnancy-Related exam code Z1032 and add \$56.63 to your "usual and customary fees" for this service. Maximum allowance for Z1032-ZL is \$182.94 (\$126.31 + \$56.63).

Billing ZL Modifier when done by Non-Physician Medical Practitioner (multiple Modifier):

CNM bills 99: SB+ ZL NP bills 99: SA+ ZL PA bills 99: U7+ ZL

10<sup>TH</sup> ANTEPARTUM VISIT (Z1036) - may be billed <u>one time only</u> when the 10<sup>th</sup> antepartum visit is provided. Medi-Cal reimburses non-CPSP providers for the initial prenatal visit and 8 antepartum visits (9 visits total). CPSP providers are able to bill for one additional visit. Reimbursement is \$113.26.

## CPSP SUPPORT SERVICES

Support services (health education, nutrition, and psychosocial) are billed in 15 minute units. A minimum of 8 minutes of service must be provided in order to bill.

| UNITS | TIME (Minutes) | RANGE (Minutes) |
|-------|----------------|-----------------|
| 1     | 15             | 8-22            |
| 2     | 30             | 23-37           |
| 3     | 45             | 38-52           |
| 4     | 60             | 53-67           |

Formula for determining time range is as follows:

Range = Time  $\pm$  7 minutes

Example:  $3 \text{ units} = 45 \text{ minutes} (3 \times 15 \text{ min.})$ 

45 minus 7 = 38 minutes 45 plus 7 = 52 minutes

Range for 3 units = 38-52 minutes

LAC/CPSP Rev. 10/6/11 CPSP Billing.doc

# **Key Points for Support Services Documentation**

- All entries should be written legibly in black ink.
- Be sure all blanks are filled in. If the question doesn't apply, write "N/A" for "Not Applicable."
- If the patient did not want to answer the question, make a brief note on the form, such as "patient declines."
- Use only abbreviations that are approved for use at your site.
- If an error is made, a single line with black ink should be drawn through the incorrect information, leaving the original writing legible, marked "error" and initialed and dated by the person who made the original entry. DO NOT attempt to erase, block out or use "white out."
- DO NOT alter another person's note under any circumstances
- All entries should be dated and signed with the first initial, last name and title.
- Time spent in minutes should be noted at the end of the assessment; indicated only time spent
  face to face with the patient, not time spent on phone calls, charting, etc. unless the patient is
  present during these activities.
- Each page contains a patient identifier, such as full name, birth date and medical record number.
- All referrals, including name of agency, contact person and phone numbers should be recorded
  in the chart.

|                   |   | HEALTH EDUCATION CODES   |                                |                                   |                                       |
| Z6400             | Client Orientation, Individual, each 15 minutes (Maximum of 2 hours)  | Initial individual orientation (required); orientation required during pregnancy, e.g. when patient is referred to hospital for non-stress test.   | 8                              | \$8.41                            | \$67.28                               |
| Z6402             | Initial Health Education Assessment and Development of Care Plan, Individual, first 30 minutes  | For first 30 minutes of Initial Health Education Assessment when Initial CPSP Assessment not completed within 4 weeks of Initial Prenatal Exam (Z1032).  | 1                              | \$16.83                           | \$16.83                               |
| Z6404             | Initial Health Education Assessment and Development of Care Plan, Individual, each subsequent 15 minutes (Maximum of 2 hours)                                       | 1) Time spent doing initial assessment exceeded 30 minutes in health education component (either Z6500 or Z6402 used); 2) AEntirely new problem@ diagnosed later in pregnancy requiring a new health education assessment. | 8                              | \$8.41                            | \$67.28                               |
| Z6406             | Follow-up Antepartum Health Education<br>Assessment, Treatment, and/or<br>Intervention, Individual, each 15 minutes<br>(Maximum of 2 hours)                         | Trimester reassessment; antepartum counseling or other intervention, such as by health education consultant.   | 8                              | \$8.41                            | \$67.28                               |
| Z6408             | Follow-up Antepartum Health Education<br>Assessment, Treatment, and/or<br>Intervention, Group, per patient, each 15<br>minutes                                      | Health education provided in a group class.  | 8                              | \$2.81                            | \$22.48                               |

| Procedure<br>Code  | Description  | When to Use  | Maximum<br>Units of<br>Service | Reimbursement per Unit of Service | Maximum<br>Reimbursement <sup>1</sup> |  |
|--|--|--|--------------------------------|-----------------------------------|---------------------------------------|--|
|  | (Maximum of 2 hours)   |  |                                |                                   |                                       |  |
| Z6414  | Postpartum Health Education<br>Assessment, Treatment, and/or<br>Intervention, including update of Care<br>Plan, Individual, each 15 minutes<br>(Maximum of 1 hour) | Postpartum health education assessment;     Postpartum health education intervention.  | 4                              | \$8.41                            | \$33.64                               |  |
| PERINATAL EDUCATION CODES (Can be used antepartum or postpartum) |  |  |                                |                                   |                                       |  |
| Z6410  | Perinatal Education, Individual, each 15 minutes (Maximum of 4 hours)  | Individual education provided prenatally or postpartum.  | 16                             | \$8.41                            | \$134.56                              |  |
| Z6412  | Perinatal Education, Group, per patient, each 15 minutes (Maximum 4 hours/day,18 hours/pregnancy)  | Group education, e.g. childbirth education (Lamaze)  | 72                             | \$2.81                            | \$202.32                              |  |
| CPSP OB BONUSES  |  |  |                                |                                   |                                       |  |
| Z1032-ZL   | Initial Comprehensive Pregnancy-related office visit performed within 16 weeks of LMP  | Initial prenatal exam done prior to 16 weeks LMP. If non-physician practitioner (NP, PA, CNM) does exam, see M/C Provider Manual for appropriate modifier. | 1                              | \$56.63                           | \$56.63                               |  |
| Z1036  | Tenth Antepartum Office Visit  | One time only when 10 <sup>th</sup> antepartum visit performed.  | 1                              | \$113.26                          | \$113.26                              |  |

<sup>&</sup>lt;sup>1</sup> Additional reimbursement is subject to prior approval using a Medi-Cal Treatment Authorization Request (TAR).

BillingCodeHandout.doc Los Angeles County CPSP Rev. 9/14/11

<sup>&</sup>lt;sup>2</sup> If Z6500 is used, codes Z6200, Z6300, and Z6402 cannot be used because the first 30 minutes of each assessment is already included in Z6500. However, additional initial assessment time can be billed under codes Z6202, Z6302, or Z6404.

<sup>&</sup>lt;sup>3</sup> Entry into care is the time of the first billable pregnancy-related office visit or initial support service assessment.

# MCAH Division Overview of National and State Resources for Electronic Health Record Adoption Updated March 30, 2011

This document provides an overview of current Federal and State efforts to implement Electronic Health Records (EHRs).

The Office of the National Coordinator is leading Federal efforts to implement Electronic Health Records. The Web site is:

http://healthit.hhs.gov/portal/server.pt/community/healthit hhs gov home/1204

The Health Resources and Services Administration has an excellent Web site at <a href="http://www.hrsa.gov/healthit/index.html">http://www.hrsa.gov/healthit/index.html</a> that includes helpful links to:

- EHR selection guidelines
- Webinars
- Regional Extension Centers
- Health IT and Quality
- Toolboxes

The Center for Medicare and Medicaid Services (CMS) is working to encourage providers to adopt EHRs by providing incentives and support to providers and supporting health IT workforce training. The goal is to achieve widespread adoption of EHRs by 2015. CMS adopted the EHR Incentive Rule in July 2010. This rule makes EHR incentives available to Medicare and Medicaid providers, but providers are not required to apply. Information on the EHR incentive program is available at <a href="http://www.cms.gov/EHRIncentivePrograms/#BOOKMARK2">http://www.cms.gov/EHRIncentivePrograms/#BOOKMARK2</a>

Registration for the EHR incentive program began January 3, 2011. Providers may register before they have a system installed. Medicare providers may receive up to \$44,000, and Medicaid providers may receive up to \$63,750 over 6 years for implementing eligible systems. Providers may receive incentives under only one of the options and may switch programs only one time after they receive the first payment. Eligible professionals may qualify for incentive payments if they adopt, implement, upgrade or demonstrate meaningful use in their first year of participation. They must successfully demonstrate meaningful use in subsequent participation years to receive additional payments. **The Medicaid incentive program is dependent on individual states.** Medi-Cal is developing a system to manage incentive payments for California's eligible providers. **The most current information specific to California** is available at: <a href="http://medi-cal.ehr.ca.gov/">http://medi-cal.ehr.ca.gov/</a> and <a href="http://medi-cal.ehr.ca.gov/">http://medi-cal.ehr.ca.gov/</a> and <a href="http://files.medi-cal.ca.gov/pubsdoco/newsroom/newsroom/newsroom/">http://files.medi-cal.ca.gov/pubsdoco/newsroom/newsroom/newsroom/</a> 11790.asp

Eligible EHR systems are listed on the Office of the National Coordinator Web site in a searchable format at: http://onc-chpl.force.com/ehrcert

Eligible systems must enable "meaningful use", which includes:

- 1. The use of a certified EHR in a meaningful manner, such as e-prescribing.
- 2. The use of certified EHR technology for electronic exchange of health information to improve quality of health care.
- 3. The use of certified EHR technology to submit clinical quality and other measures.

For more information on Meaningful Use, review the following Web site: <a href="http://www.cms.gov/EHRIncentivePrograms/30">http://www.cms.gov/EHRIncentivePrograms/30</a> Meaningful Use.asp

To demonstrate that they are meeting meaningful use requirements, providers must demonstrate that they meet the core objectives and must report six quality measures. The core objectives are available at <a href="http://www.cms.gov/EHRIncentivePrograms/Downloads/EP-MU-TOC.pdf">http://www.cms.gov/EHRIncentivePrograms/Downloads/EP-MU-TOC.pdf</a>

In addition, providers must report three core quality measures and three additional measures that they choose from 38 measures. Specifications for the measures and information on the Quality Incentive Program is available at:

http://www.cms.gov/QualityMeasures/03 ElectronicSpecifications.asp

#### Core measures are:

- 1. Blood pressure measurement
- 2. Tobacco use and intervention
- 3. Adult weight screening and follow up.

#### An alternative core measure set is:

- 1. Weight assessment and counseling for children and adolescents
- 2. Flu shot for people over 50
- 3. Childhood immunizations

There are two prenatal care measures that providers may choose from the 38 optional measures:

### NQF 0012 Prenatal Care: HIV Screening

Title: Prenatal Care: Screening for Human Immunodeficiency Virus (HIV) Description: Percentage of patients, regardless of age, who gave birth during a 12-month period who were screened for HIV infection during the first or second prenatal care visit.

### NQF 0014 Prenatal Care: Anti-D immune Globulin

Title: Prenatal Care: Anti-D Immune Globulin Description: Percentage of D (Rh) negative, unsensitized patients, regardless of age, who gave birth during a 12-month period who received anti-D immune globulin at 26-30 weeks gestation.

# Comprehensive Perinatal Services Program (CPSP) Electronic Health Record Functionality Basics

This document provides information that CPSP providers may want to consider when evaluating Electronic Health Record (EHR) functionality in CPSP practices.

The requirements for CPSP are the same whether a provider has electronic or paper records. These requirements are listed in Title 22 of the California Code of Regulations, and interpreted in the CPSP Provider Handbook, Steps to Take Guidelines, and each provider's protocols. It is important that the EHR facilitate the CPSP work flow in each provider office. Each provider should evaluate the content and functionality of the EHR system. The County Perinatal Services Coordinator (PSC) can assist by reviewing the EHR content using an approved set of CPSP forms as a guide. If a CPSP provider implements a CPSP EHR that is not functional, it may be difficult to conduct quality assurance (QA) to assure implementation of CPSP in accordance with Title 22. Forms that are scanned into an EHR will not allow sufficient functionality to meet federal Meaningful Use requirements, and may make it difficult to access the information to conduct CPSP QA activities. Please see the document, "Overview of National and State Resources for Electronic Health Record Adoption" for information on Meaningful Use.

The following questions can assist providers to evaluate the functionality of CPSP EHRs. If a provider has already implemented an EHR system, these questions can be useful for planning system upgrades.

- 1. Does the EHR document CPSP client orientation, initial assessments, 2<sup>nd</sup> and 3<sup>rd</sup> trimester reassessments, postpartum assessments, and Individualized Care Plans (ICPs) in all four domains (obstetric, psychosocial, nutrition, and health education) as required by Title 22?
- 2. Does the EHR generate reports that will enable the provider and County PSC to conduct QA to monitor delivery of services and outcomes?
- 3. Does the system recognize risk conditions from the assessments, reassessments, and postpartum assessments?
- 4. Will the system automatically populate the ICP with information from the assessment results/risks/problems and link to appropriate:
  - Site specific CPSP protocols
  - CPSP Steps To Take (STT) Guidelines
  - STT Patient handouts
  - Resources/Referrals
- 5. Will the system automatically populate applicable lab results in the CPSP assessments as well as other appropriate locations in the EHR?
- 6. When the height and weight are entered into the system, will the system automatically select and plot the correct weight gain grid?
- 7. Is the system user friendly to enable the provider to easily review previous assessment results, and the ICP before conducting a reassessment or postpartum assessment?
- 8. Does the system recognize CPSP services to enable correct billing and can it easily implement coding changes?
