REDUCE YOUR RISK OF COVID-19 IF YOU ARE NOT FULLY VACCINATED

CHOOSE WISELY - AVOID THE THREE C'S

- **CONFINED SPACES** - especially with poor ventilation. Outdoors is better than indoors.
- **CROWDS** - the more people the higher the risk, especially if the crowd is unmasked, talking, singing, shouting, or breathing hard (exercising)
- **CLOSE CONTACT** - staying further apart is safer than being close together

THE MORE C'S, THE HIGHER THE RISK

TAKE STEPS TO REDUCE YOUR RISK

- Wash (or sanitize) your hands often
- Wear a mask around others – make sure it fits snugly. For better protection wear a mask with 2 or more layers.
- Stay at least 6 feet away from people who do not live with you – unless you know they are all fully vaccinated.
- Increase air flow – go outside, open windows
- Regularly clean surfaces that are touched often
- Keep the number of different households you socialize with small
- If you decide to get vaccinated, call the DPH Vaccine Call Center at 833-540-0473 or visit VaccinateLACounty.com to find a vaccine. No appointment needed at many locations.

PLAN AHEAD

- Be flexible - be willing to change your plans or make a quick exit to avoid the three C’s
- Carry an extra mask and hand sanitizer when going out in public.
