The County of Los Angeles Department of Public Health is adopting a staged approach, supported by science and public health expertise, to allow for people to start to use public spaces again in ways that will limit the risk of exposure to COVID-19.

As an individual, it is within your right to engage in political expression, including, your right to petition the government. During a pandemic, in-person gatherings can be risky because even if you adhere to physical distancing, bringing members of different households together carries a higher risk of transmission of COVID-19. Such gatherings may result in increased rates of infection, hospitalization, and death, especially among more vulnerable populations. Activities like chanting, shouting, singing, and group recitation can more easily spread respiratory droplets, making it very important that people engaging in these activities wear face coverings at all times.

If you chose to participate in an in person gathering, there are strategies for reducing the risk of COVID-19 infection to you and others.

**Sensible Public Health Precautions**

1. **Prepare before you participate.**
   a. Plan your route to and from the demonstration. Know which streets may be closed to traffic or street parking and what public transportation routes may have been rerouted.
   b. Mobility aids such as wheelchairs, canes, walkers, or baby strollers should be allowed, but check with the organizers and police to see if there are any restrictions, precautions, or alternate routes.
   c. Bring any necessary supplies with you including face coverings, food, water, hand sanitizer and any other personal supplies you may need.

2. **Wear a cloth face covering at all times.**

3. **Maintain a six foot distance from others that are not part of your household or living unit.**
   a. Participants should maintain a physical distance of six feet from any uniformed peace officers and other public safety personnel present, unless otherwise directed, and follow all other requirements and directives imposed by law enforcement or other applicable authorities.

4. **Avoid areas where the crowd may be congested.**
   If the crowd becomes tight make your way to the periphery and away from areas of congestion.
5. Wash your hands often.
   Use soap and water for at least 20 seconds or use hand sanitizer with at least 60% alcohol, especially after being near others, going to the bathroom, before eating, and after blowing your nose, coughing, or sneezing.

6. Do not share beverages or food with others that are not in your household.

7. If you had close contact (within 6 feet for greater than 15 minutes) with non-household members who were not wearing face coverings you should consider yourself possibly exposed to COVID-19 and stay at home for 14 days and monitor yourself for COVID-19 symptoms.
   a. If you live with persons who are elderly or have high risk conditions, you should also try to maintain a six-foot distance and wear a face covering when you are with them at home.
   b. If you develop symptoms of COVID-19, call your healthcare provider and speak to them about getting tested.

Know where to get reliable information
Beware of scams, false news and hoaxes surrounding novel coronavirus. Accurate information, including announcements of new cases in LA County, will always be distributed by Public Health through press releases, social media, and our website. The website has more information on COVID-19 including FAQs, infographics and a guide to coping with stress, as well as tips on handwashing
