Through our collective efforts, the public, businesses, and partners have made progress in slowing the spread of novel coronavirus (COVID-19) in Los Angeles County, allowing for a phased reopening of some businesses and public spaces. However, with no vaccine or proven treatment available, COVID-19 remains a serious risk as more people return to work and to businesses that may reopen with modifications. Thus, our collective efforts to slow its spread in Los Angeles County must continue. The Los Angeles County Department of Public Health (Public Health) is calling on the public, businesses, and community partners to maintain social (physical) distancing and infection control practices to protect workers and residents from COVID-19 during the reopening process.

RECOVERY PLAN

1. What is the plan for reopening Los Angeles County?

Los Angeles County has aligned its plans for reopening the County with California’s Pandemic Resilience Roadmap. This is a four-phase statewide plan that guides the reopening of businesses, public spaces, and sectors in California. The stages are:

- Stage 1: Safety and preparation
- Stage 2: Reopening of lower-risk workplaces and other spaces
- Stage 3: Reopening of higher-risk workplaces and other spaces
- Stage 4: Easing of final restrictions leading to the end of the stay-at-home order

Los Angeles County’s aim is to ensure that we continue to slow the spread of COVID-19 and prevent a surge of cases at healthcare facilities, while allowing for a gradual, safe return of some activities outside of the home. Los Angeles County received approval from the State to open businesses and other spaces in a different order or at a different pace than the State’s plan, based on local needs. Even so, the County may not reopen faster than the State, and must wait for the State to issue guidance for a sector prior to reopening at the local level.
will consider our County’s needs when making recommendations to the Board of Supervisors to help guide the recovery process.

Through each stage of the recovery, residents will need to continue practices that can prevent COVID-19 spread: social (physical) distancing, wearing cloth face coverings* in public settings (e.g., grocery stores, trails, parks, retail stores, and offices), washing their hands, self-isolating if sick, and self-quarantining if identified as a close contact to someone with the virus.

2. **How fast will we move through the reopening process?**

Los Angeles County is currently in Stage 3 of the reopening process. As noted, Los Angeles County’s plan for recovery is in line with the California Pandemic Resilience Roadmap, but based on our local needs, the County Health Officer and the Board of Supervisors can adjust the pace at which we reopen businesses and public sites in LA County. With no vaccine or proven treatment, COVID-19 still remains a significant threat, so when making decisions, we will carefully monitor: (a) the number of cases, hospitalizations and deaths; (b) whether the healthcare system can handle a surge in cases; (c) the supply of personal protective equipment (PPE) available for healthcare providers and staff; (d) availability of testing, especially for vulnerable groups and high-risk jobs or settings; and (e) the ability to quickly isolate people with COVID-19 and quarantine their contacts to prevent the spread of COVID-19.

**OVERVIEW OF THE ORDER**

3. **What is the Reopening Safer at Work and in the Community for Control of COVID-19 Order?**

The Reopening Safer at Work and in the Community for Control of COVID-19 Order (Order) is a legal order issued by the Los Angeles County Health Officer to help slow the spread of COVID-19 and protect the members of our community who are at greatest risk for serious illness due to COVID-19. The Order is consistent with California’s COVID-19 Executive Orders and Health Officer Orders.

4. **What do the latest Orders do?**

The latest Orders, which were released on June 11, 2020 and June 18, 2020:

- Permit the conditional opening of additional businesses, sectors, and activities in Los Angeles County, in ways that lower the risk of COVID-19 exposure for employees, patrons, and visitors, as allowed under the State’s Executive Order and Health Officer’s Orders.
- Specify that people are required to wear a cloth face covering* that covers both their nose and mouth when they are, or are likely to be, in contact with others outside of their home. This is required indoors and outdoors and in both public and private places.
- Continue to strongly recommend that persons who are 65 years of age or older and people of any age who have active or unstable pre-existing health conditions only leave their home for necessities, such as food, exercise, or medical care.

5. **What types of businesses, public spaces, and activities are open in Los Angeles County?**

As long as they follow the County’s social (physical) distancing and infection control guidance, many types of businesses, organizations, and public spaces in Los Angeles County can be open to the public and resume activities. Examples are listed on **“What’s Open in Los Angeles County.”** This summary also includes links to the County’s Protocols, which outline the steps that steps businesses, organizations, and the public need to take to help slow the spread of COVID-19 at these sites. As we move through recovery, additional sites will be reopening, and it remains as important now as it was at the start of the pandemic to follow these rules for reopening to help keep the public as safe as possible and prevent outbreaks of COVID-19.
6. While the Order is in effect, when can you leave your home?
   There are no restrictions on when individuals can leave their home, if they are wearing a cloth face covering* when near others and distancing from those not in their householder. However, residents should stay home as much as practicable, since there is increased risk for exposure to COVID-19 when around others not in your household. The following permitted activities are allowed, as long as residents follow social (physical) distancing requirements:
   - Participating in activities that are important to their own or family/household members’ (including pets’) health and safety, such as going to a doctor or vet or getting medical supplies or medication.
   - Getting or delivering services and supplies, such as groceries, for themselves and family or household members.
   - Caring for minors, the elderly, dependents, persons with disabilities, or other vulnerable persons.
   - Receiving in-person behavioral health or substance use disorder support in small group meetings, such as Alcoholics Anonymous or Narcotics Anonymous, or to receive faith-based counseling, as long as there are 10 or fewer people present.
   - Working at a business that is open or to carry out Minimum Basic Operations at a business that is temporarily closed by the Order.
   - Working for, volunteering at, or obtaining services at Healthcare Operations.
   - Accessing Essential Governmental services, such as getting social services or complying with a court or law enforcement order.
   - Participating in faith-based/worship services.
   - Participating in certain recreational or entertainment activities.
   - Shopping at retail establishments.
   People who are 65 years old and older and/or those who have underlying health conditions should only leave home for essential activities such as getting medical care or food, because they are more likely to have serious illness from COVID-19. They should stay home as much as possible; have groceries, medicine, and necessary goods delivered; and call their provider immediately if they have even mild symptoms. Public Health has strongly recommended that employers offer them telework or other accommodations.

7. How long will the Order be in effect?
   This Order is in effect until it is extended, expanded, or updated to protect the public’s health.

8. Do Los Angeles County residents have to follow the Los Angeles County and California Orders?
   All residents who live in the Los Angeles County Public Health Jurisdiction (all parts of the County except the cities of Long Beach and Pasadena), must follow the LA County Order, which is in line with California’s Order. The cities of Long Beach and Pasadena have their own public health departments and residents and businesses in those cities should check with their own public health departments for guidance. If LA County’s Order differs from the State’s or a City’s order, residents must comply with whichever Order is stricter.

9. What happens if I don’t comply with the Order?
   Public Health trusts that residents will voluntarily follow the Order to protect loved ones, other residents, and our community. However, if you don’t follow the Order, you can be fined, imprisoned, or both.

Social (Physical) Distancing and Infection Control

10. What steps to prevent COVID-19 spread are you required to follow?
    COVID-19 can spread when people are in close contact or when they touch something with the virus on it and then touch their face. To prevent spread of COVID-19, you’re required to: (1) Maintain at least six-feet of physical distance from individuals who are not part of your household; (2) Frequently wash your hands with soap and water...
for at least 20 seconds or use hand sanitizer that contains at least 60% alcohol; (3) Wear a cloth face covering* when you’re in contact with, or likely to be in contact with, people who don’t live in your household or living unit; and (4) Avoid all physical interaction outside the household when you’re sick with a fever or cough, except for necessary medical care.

11. Do you have to perform social (physical) distancing with household members and at home?
No, you don’t have to stay 6 feet from people who live in the same household or living unit with you. If you are ill though, you should remain in a separate room, preferably with your own bathroom, and minimize contact with others to avoid infecting others in the home.

12. Can visitors come to your home?
You should not have visitors, other than people who need to provide essential services, such as caregiving or repairs. These visitors shouldn’t come in if they are ill and must wear a cloth face covering* and practice social (physical) distancing, as much as possible, while in your home. Consider other ways to connect with family and friends, such as through phone calls or video conferencing.

Household and Personal Care Needs

13. Can you buy pet food or have your pet groomed?
Yes. You can go to a pet supply store to buy pet supplies and can have your pet groomed at a veterinary clinic, a pet feed store, or a pet grooming store. Mobile pet grooming is also allowed. Stay at least 6 feet from people who are not part of your household and use a cloth face covering*.

14. Are car dealerships open?
Car dealerships can be open for repairs, auto supplies, and showroom and internet sales if they follow social (physical) distancing and infection control requirements. Test drives can be conducted as long as the dealership limits passengers in the vehicle during test drives to only a single customer with the employee sitting in opposite back seat, when applicable. Both the customer and employee must wear cloth face coverings*.

15. Are personal grooming businesses open?
Barbershops and hair salons may reopen but employees and customers should wear a cloth face covering*. Services that require the removal of the customer’s cloth face covering are allowed but the worker must wear a face shield in addition to a cloth face covering during these services. In addition, nail salons, tanning salons, esthetician, skin care, and cosmetology services; electrology, body art professionals, tattoo parlors, and piercing shops; and massage therapy (in non-healthcare settings) can also open. If you receive any of these services, bring a cloth face covering*, preferably with ear loops and keep it on during your visit and please don’t bring others to your appointment.

Work/Employment

16. Can you go to work?
Yes. If you work at a business that is allowed to be open, you can go to work, as long as you follow social (physical) distancing and infection control requirements when you are traveling to/from work and while you are at work. Stay at least 6 feet from people who are not part of your household whenever possible and use a cloth face covering* if you are in or are likely to be in close contact with others. In order to be open, businesses must follow requirements related to infection control and social (physical) distancing. Ask your employer about ways to reduce the chance for COVID-19 to spread, such as rearranging the worksite to allow employees to keep a safe distance from other employees and customers, alternative work schedules, or working from home.

17. Can you apply for unemployment if you’ve been affected by COVID-19?
If your employer has reduced your hours or closed operations due to COVID-19, you may be able to file a claim for unemployment insurance. See https://www.edd.ca.gov/about_edd/coronavirus-2019.htm.
School, Childcare, Camps, and Learning

18. Can your children go to childcare?
   Yes. Childcare facilities can be open, as long as they follow requirements that are described in the Order.
   • Childcare must be carried out in stable groups of ten (10) or fewer. “Stable” means the same ten (10) or fewer children are in the same group each day. Children cannot change from one group to another.
   • If more than one group of children is cared for at one site/facility, each group must be in a separate space and these groups cannot mix with each other.
   • Each childcare provider must be solely with one group of children.

19. Can you or your children attend school or college?
   K-12 schools, colleges, and universities can continue to operate but must do so in a way that is safe as possible for students, teachers, and staff. At this time, schools, college, and universities can continue to facilitate distance learning, offer meals for pick-up, and perform essential functions or Minimum Business Operations.

20. Are libraries open?
   Libraries may be open for in-person and/or curbside pick-up if the building they’re located in is not closed to the public and they follow Public Health’s social (physical) distancing and infection control requirements. They can loan books, movies, and single-use items (such as take-home craft kits) but should limit loans of games and toys. When possible, you should place a “hold” on an item through an online or a phone reservation system. When visiting the library, wear a cloth face covering* and stay 6 feet from other patrons and staff. If you have mobility issues, can’t reserve items online, or should only leave home for necessities because you’re at higher risk for COVID-19 complications, ask your library about other options.

21. Can your children go to camp?
   Yes. They can attend day camps (including sports-related camps for skills-building only), although overnight camps aren’t open yet. Day camps will be making some changes to help keep staff and campers as safe as possible. Some examples include eliminating high-contact activities, staggering drop-off and pick-up times, and redesigning activities so that campers are in smaller groups. If your children go to camp, ask them to wear their cloth face covering* except when staff let them know they don’t need to; follow directions for social (physical) distancing; stay with their assigned group; and avoid sharing high-touch materials like arts supplies, recreational equipment, clothes, toys, books, games, and electronic devices. If possible, have them bring their own meals and snacks to the camp.

Healthcare

22. Can you leave your home to seek medical care or pick up medications?
   Yes, you can leave in order to seek essential services such as medical care or to pick up medications. Be sure to call your provider first since many practices are now offering telemedicine services. Similarly, check to see if your medications can be delivered to your home.

23. Can you receive elective and preventive healthcare services?
   Important preventive services such as well-child visits, immunizations, and other health screenings, including cancer screenings, should not be delayed. Whenever appropriate and available, consider taking advantage of telemedicine or video visits. In addition, providers can choose to offer elective medical services as long as the healthcare system does not get overwhelmed by the need to care for COVID-19 patients and providers can meet certain criteria (e.g., having enough personal protective equipment). However, because COVID-19 still poses a significant risk, Public Health recommends you carefully consider any elective procedure or surgery.
24. Can you receive dental services?
   Dental services pose a higher risk for the spread of COVID-19, so only emergency care and certain non-emergency
dental care may now be able to be provided. Speak to your dentist to find out what services are available.

25. Can you go to a behavioral health or substance use disorder group or receive faith-based counseling?
   You can go to group counseling and participate in peer support groups, such as Alcoholics Anonymous or Narcotics
Anonymous, or in faith-based counseling if there are fewer than 10 people present and you follow social (physical)
distancing and infection control requirements. You can also take advantage of sessions that are held by telephone
or video conference if they are available and meet your needs.

26. Can you still leave the home to donate blood?
   You can continue to give blood at Red Cross centers and at blood donation sites. Blood drives are not prohibited by
the Order if social (physical) distancing practices are in place. Red Cross will continue to hold blood drives to help
meet patient needs and has implemented new measures that ensure that blood drives and donation centers are even
safer for donors and staff. You should be prepared to wear a cloth face covering* while you are there.

Shopping and Restaurants

27. Are shopping centers and malls open?
   Indoor and outdoor shopping malls, destination shopping centers, strip and outlet malls, and swap meets can be open
for in-store shopping, at limited capacity, if they prepare, implement, and post Public Health’s Protocols for
Shopping Center Operators. Customers must wear cloth face coverings* and the number of customers will be
limited to ensure physical (social) distancing. Higher-Risk Businesses in these shopping centers and malls (e.g.,
movie theaters and playgrounds) are temporarily closed.

28. Are restaurants open?
   Restaurants, cafes, food trucks, food courts, and similar businesses may be open, including for onsite dining, but
need to limit the number of customers, so that they can maintain social (physical) distancing. Bar areas in
restaurants are also open, if social (physical) distancing is maintained. Restaurants can also seat customers at a
counter if it is at least 6 feet from areas where employees work, prepare food, and/or prepare drinks.

   If you’re dining onsite, parties are limited to 6 people, preferably only members of your household, at a table.
   If possible, wait in your car until you can be seated. If you’re entering the restaurant; waiting at a lobby, host
or check-stand, deli counter, restroom, valet drop off and pick-up, or other waiting area, or visiting the
restrooms; please keep a distance of 6 feet or more from people who aren’t part of your household and wear
a cloth face covering*. You can remove the cloth face covering while seated at a table and eating and/or
drinking.

29. How can you get free or reduced priced meals?
   Soup kitchens, food banks, and other organizations that provide free or reduced priced food or meals are
encouraged to continue providing these services. Visit www.covid19.lacounty.gov/food for additional information
on available resources.

Faith-based/Religious Services

30. Can you attend faith-based services?
   You may attend in-person faith-based services if social distancing and infection control requirements in the
County’s Protocol for Places of Worship are posted and followed. For instance, attendance at indoor gatherings
will be limited to 25% of building capacity or a maximum of 100 attendees, whichever is lower. There is no
maximum number of attendees for outdoor services, as long as attendees can keep a distance of 6 feet from each
other. Places of worship are also strongly encouraged to continue virtual services (e.g., teleconference, webinar, or
live-stream) for those who are more likely to have serious illness from COVID-19. Practices that could spread COVID-19 should also be modified. Examples include not passing offering plates and encouraging people to bring their own prayer books, rugs, or other direct touch items that are used in ceremonies. Check with your Place of Worship to understand if, when, and how it is reopening in compliance with this Protocol.

31. Can faith-based organizations offer support services or counseling?

Faith-based organizations can provide essential support services, such as a food bank, if they follow social (physical) distancing requirements. If remote counseling is not feasible, they can also offer faith-based counseling, as long as there are 10 or fewer people present and they follow social (physical) distancing and infection control requirements.

32. Can you work in an office at a faith-based organization?

If your regular worksite is an office at a faith-based organization and you can’t do your work from home, you can return to the office. However, if you’re 65 years old and older, are pregnant, or have a chronic health condition, you should ask if you can be assigned work that you can do from home, because you’re more likely to become seriously ill if you’re infected with COVID-19.

Gatherings and Events

33. Are conferences, conventions, or other large events allowed?

No. Large events, such as conferences or events at convention centers, whether public or private, are still not allowed.

34. Can vehicle-based (car) parades be held?

Vehicle-based (car) parades can be held if they are in compliance with all local ordinances, traffic control requirements, state and local laws, and all other requirements that are described in the County’s Vehicle-Based Parade Protocol. If an organization is hosting the parade, it must assign a host to ensure that these rules are followed. Car parades can’t include people on a bicycle, a motorcycle, a convertible with the top open, or a vehicle with no doors such as a golf cart. If any of the windows on a vehicle is open, the occupants must wear a face covering.

35. Can you or your family have a gathering or party?

No. Individual and family gatherings or parties of any size aren’t allowed. However, vehicle (car) parades are now allowed so that graduations, birthdays and other special days and achievements may be safely celebrated. See the Vehicle-Based Parade Protocol for rules and requirements.

Caregiving

36. Can you care for a family member, friend, or pet who requires assistance to care for themselves at their home or take them to needed appointments?

You can provide care for vulnerable and dependent people or animals, including taking them to appointments. However, you should take precautions, such as being sure that you don’t have a fever or symptoms of illness before leaving to provide care, keeping at least 6 feet from others whenever possible, wearing a cloth face covering* (or a surgical mask if you are caring for an ill individual), and frequently washing your hands or using hand sanitizer with at least 60% alcohol, including immediately after you arrive at and leave their home.

37. Can you visit loved ones in the hospital, skilled nursing facility, or other residential care facility?

To protect patients/residents, visitors, and healthcare personnel, most face-to-face visits are still not allowed at licensed congregate healthcare facilities (e.g., skilled nursing facilities and residential care facilities) and at some hospitals, except for in certain circumstances (visiting a child and for end-of-life visits). However, if congregate facilities have not had any new cases of COVID-19 for 28 days or more, they can now relax these restrictions and allow for additional visits. Similarly, because many hospitals have a masking policy and symptom screening policies...
in place, some are now allowing visitors. If your loved one is in a facility, ask if they’re allowing visits. If not, please use other ways to communicate, such as telephone calls, texts, and video calls.

Housing and Safety

38. How can you comply with the order if you are experiencing homelessness?
People who are experiencing homelessness are encouraged to try to stay with family or friends, identify housing options, or access emergency resources, such as shelters. You can call 2-1-1 for additional information on resources. You should also wear a cloth face covering* when in close contact with other people and stay 6 feet or more from others whenever possible.

39. If your home environment is abusive, do you need to stay at home?
No. Call 2-1-1 to identify safe and supportive housing alternatives. You should not stay in environments that are not safe.

40. Can you stay in dorms, shelters, or other congregate settings?
Yes, but you need to follow any measures that the institution has put into place to reduce the spread of disease. You should wear a cloth face covering* when in close contact with others and should stay 6 feet or more from people whenever possible.

41. Can you be evicted from your house or apartment while the Order is in effect?
Some local jurisdictions have issued renter protections during the Order. Check with your local City office to see if there are eviction protections where you live. For additional information on eviction moratoriums and rent freezes visit dcba.lacounty.gov/noevictions.

Legal and Civic Activities

42. Can you leave home to comply with a Court order?
Yes. You can leave home to comply with Court or enforcement orders but must follow social (physical) distance, including wearing a cloth face covering* when in close contact with others, and infection control precautions.

43. Can you leave home to take a citizenship test?
The federal government will determine whether citizenship tests will be held. Please contact the government agency that is giving the test to determine whether you should appear. If you are required to appear, wear a cloth face covering* and practice social (physical) distancing while there. If you are ill, stay home and ask the agency that is giving the test about your options for rescheduling or taking the test from home if possible.

44. Can you get married?
Yes. Governor Newsom signed an executive order that, through June 29, 2020, allows adults to obtain a marriage license by videoconference. This is allowed at the discretion of the local County Clerk, if both adults are located within California, and at least one is a resident of LA County. Both individuals must be present during the videoconference on a device with video/audio capabilities (desktop, laptop tablet or phone) along with an internet connection. They must also be able to present valid government identification and have a valid credit card. Visit the Los Angeles County Clerk site at: https://www.lavote.net/home/county-clerk/marriage-licenses-ceremonies/general-info to learn if this may be an option for you or call 1-800-201-8999, option 1 to get on the waiting list. In addition, places of worship may host a wedding when following the Protocol for Places of Worship.

45. Can you participate in public demonstrations?
As an individual, it is within your right to engage in political expression, including, your right to petition the government and participate in public demonstrations. During a pandemic, in-person gatherings can be risky because even if you adhere to physical distancing, bringing members of different households together carries a higher risk of transmission of COVID-19. Such gatherings may result in increased rates of infection, hospitalization, and death,
especially among more vulnerable populations. Activities like chanting, shouting, singing, and group recitation can more easily spread respiratory droplets, making it very important that **people engaging in these activities wear face coverings at all times.**

If you had close contact (within 6 feet for greater than 15 minutes) with non-household members who were not wearing face coverings, you should consider yourself possibly exposed to COVID-19 and should stay at home for 14 days and monitor yourself for COVID-19 symptoms.

- If you live with persons who are elderly or have high risk conditions, you should also try to maintain a six-foot distance and wear a face covering when you are with them at home.
- If you develop symptoms of COVID-19, call your healthcare provider and speak to them about getting tested.

If you chose to participate in an in-person gathering, there are **strategies** for reducing your risk and the risk to others.

**Fitness, Recreation, and Entertainment**

**46. Can you go to the gym/a fitness center?**

Gyms; fitness centers; and fitness-related studios such as yoga, pilates, dance, gymnastics, and martial arts studios can be open if they follow rules for reopening. They can offer group classes and personal training if social (physical) distancing requirements are followed and there’s no person-to-person physical contact. High-contact programs such as group sporting events, organized intermural activities, pick-up basketball, and organized races aren’t allowed. Swimming pools and splash pads can be open, but hot tubs, jacuzzi, spa pools, swim team practices, swim meets, and pool parties aren’t allowed.

To protect yourself and others from COVID-19 at the gym, don’t arrive early or stay after your work-out; always wear a **cloth face covering** except when you need to remove it to exercise vigorously, swim, or train; keep a distance of 6 feet from others when possible; and bring your own towel and equipment (e.g., yoga mats, goggles, nose clips, and snorkels). If you’re at higher risk for serious illness from COVID-19 (e.g., you’re 65 years of age or older and and/or have active or unstable pre-existing health conditions), ask if they have special hours or a reservation system so you can avoid contact with others as much as possible.

**47. Are pools open?**

Public pools and pools in gyms/fitness centers and shared residential facilities (apartments, condominiums, and homeowner’s associations), can be open if rules for reopening are followed. You can take group and 1x1 swimming lessons, but instructors should teach from the pool deck whenever possible, and swim team practices aren’t allowed. Pools at residential sites can only be used by household groups that live on the property and there are limits to the number of people who can use the pools and spas at the same time. If you have your own pool at a single-family home, you and your household members can use it but shouldn’t host parties or gatherings. If you’re at any pool, please don’t share towels, beverages, or food with anyone from outside of your own household; bring your own snorkels and nose clips; and when out of the water, wear a **cloth face covering** and keep a distance of 6 feet from people who aren’t in your household.

**48. Can you go to/take children to a park?**

Yes, but when at the park, you should stay at least 6 feet from people who are not part of your household. However, indoor and outdoor playgrounds and pools at parks remain closed.

**49. Are outdoor recreation options such as trails, beaches, and golf courses open?**

Trails, beaches, and other open spaces and outdoor recreational facilities, including golf courses, tennis and pickle ball courts, shooting and archery ranges, equestrian centers, model airplane areas, community gardens, and bike parks, may reopen, as long as visitors follow rules regarding social (physical) distancing and access. However, no recreational programming or public events can be held at these sites. Hired-fishing trips and small group charters...
50. Can you rent or check-out outdoor equipment?
   Outdoor equipment, such as kayaks, surf or paddle boards, canoes, bikes, fishing gear, and helmets may be available for rental/check-out, if operators can follow instructions for cleaning. However, whenever possible, you should bring your own equipment, since sharing equipment can increase the risk for spread of COVID-19.

51. What kinds of sports can you or your children play?
   You can do outdoor recreational activities or sports, such as walking, hiking, bicycling, running, or horseback riding, as long as you follow social (physical) distancing and the appropriate County Reopening Protocol. You can also play some non-contact sports, such as golf, tennis, or pickleball. You can’t play sports that involve shared equipment or physical contact such as soccer, basketball, football, volleyball, baseball, paintball, or miniature golf with anyone outside of your own household, and youth sports leagues are not yet open.

52. Can you go to the movies?
   Movie theaters are not yet open, but drive-in theaters are, as long as social (physical) distancing and infection control practices are followed.

53. Can you go to a museum, botanical garden, gallery, zoo, or aquarium?
   Yes, you can visit indoor and outdoor museums and galleries, botanical gardens, outdoor exhibition spaces, zoos, and aquariums if you follow the social (physical) distancing and infection control requirements. However, indoor playgrounds, play areas, climbing structures, petting zoos, movie theaters, and hands-on interactive exhibits at these venues are closed and demonstrations (including live animal shows) can only be held if social (physical) distancing and sanitation guidelines are followed. To help prevent spread of COVID-19, please only include only members of your own household in your visit, buy your tickets online in advance, avoid sharing vehicles, wear cloth face coverings*, and keep a distance of 6 feet from staff and other visitors.

54. Can you attend professional sporting events?
   Professional sports and training can resume, but at this time, all events must be held without in-person spectators.

55. Are bars and wineries open?
   Bars, breweries, brewpubs, tasting rooms, craft distilleries, and wineries can be open, at limited occupancy, if they follow rules for reopening. You’ll need to be seated, either at the bar (if you can keep 6 feet distance from others) or at a table (with no more than 6 people preferably from your own household) and should wear a cloth face covering* unless you’re eating and/or drinking. Karaoke, dancing, open mic performances, trivia activities, mixers, pub crawls, performances, drinking games/contests, drop shots, and book or board game loans aren’t allowed.

56. Are cardrooms, satellite wagering, and racetracks open?
   Yes, cardrooms, racetracks (with no spectators), and satellite wagering facilities are open if they can follow the County’s rules for reopening, to reduce the chance for spread of COVID-19. For instance, they must reduce the number of machines and occupants at gaming tables and screen personnel and customers for symptoms of COVID-
19 when they arrive. They can’t hold musical or other performances or host nightclubs. If you visit any of these venues, you must wear cloth face covering*; stay 6 feet from people who are not in your household, and wash your hands and/or use hand sanitizer with at least 60% alcohol content often. Food and beverages are prohibited at any gaming tables.

Travel

57. Can you take public transit or ride-sharing services (e.g. Lyft or Uber)?

You can take public transportation or use ride-sharing services as long as you wear a face covering during your ride and at stops/stations where others are present and stay 6 feet or more from people who aren’t part of your household when possible.

58. Can you take a trip?

Because travel increases your chances of getting infected and spreading COVID-19, staying home is the best way to protect yourself and others from getting sick. COVID-19 cases and deaths have been reported in all 50 states and in many international locations. If it’s not essential for you to travel, it’s best for you to postpone your trip. And if you’re sick or have been around someone with COVID-19 in the past 14 days, you shouldn’t travel.

You can travel outside of your area if you need to address essential needs, such as essential business needs or to take care of after-death arrangements. Before traveling, check for any travel restrictions in the area you’re traveling to, including any requirements for funerals and gatherings. See LA County’s guidance for funerals at: http://publichealth.lacounty.gov/media/Coronavirus/docs/business/GuidanceConductingFunerals.pdf.

If you do need to travel, you can take simple steps to reduce the chance for spread of COVID-19. Don’t travel with people from outside of your household or with anyone who is sick. Wash your hands often and/or use hand sanitizer with at least 60% alcohol content and wear a cloth face covering* whenever you’re not in your room. Consider other ideas when traveling, such as making sure you’re out of your room when your baggage is delivered or when your room’s being cleaned, only using ice machines if they’re hands-free, and bringing your own items (e.g., towels, goggles, and noseclips) to the fitness center or pool.

59. Are campgrounds and RV parks open?

Yes, campgrounds and RV parks can be open if they follow reopening rules, which may include reducing the site’s capacity to allow for adequate spacing. In addition, outdoor spaces used for gatherings and group functions such as pavilions, communal fire rings, public-use kitchens, and amphitheaters should be closed and public events/gatherings such as group bonfires, group campsites, presentations at amphitheaters, or musical or other performances are not allowed.

To reduce the chance of spread of COVID-19, wear cloth face coverings*, stay 6 feet from people who aren’t part of your household and bring your own equipment. If possible, pre-purchase firewood, food, or other items or have them delivered to your campsite or RV. When using shared restrooms, avoid placing personal items such as toothbrushes directly on counter surfaces. Finally, only participate in boat rides, basketball/volleyball games, rope courses, or climbing walls, with your own household.

*Important Information regarding Cloth Face Coverings: Cloth face coverings are used to reduce the risk of someone who has the virus and does not know it from transmitting the virus to others. Children under the age of 2 years (including infants) and anyone who has trouble breathing, is unconscious, or is unable to remove a face cover without help should not wear one. Those between the ages of 2 and 8 should use them but under adult supervision to ensure that the child can breathe safely and avoid choking or suffocation. Individuals who are not recommended to wear a cloth face covering are exempted from the Reopening Safer at Work and in the Community for Control of COVID-19 Health Officer Order’s requirements to wear cloth face coverings.
