

Appendix T-1: COVID-19 Protocol for TK-12 Schools

Note: This document is updated frequently.

Please check the date on the webpage for the most recent version.

Recent Updates: (Changes highlighted in yellow)

3/14/2023

Updates also reflect the new Los Angeles County Department of Put (c. F. e., d.) Buidelines for COVID-19 Cases (Isolation) and Close Contacts that went into effect (c.) March 12, 2023, replacing the now rescinded Los Angeles County Public Health Emergency Orders regarding isolation and quarantine for the general public.

The County of Los Angeles Department of Public Health (DPH) is adopting a targeted public health response to contain COVID-19 exposures, supported by science and public health expertise, at schools serving students from transitional kindergarten through grade 12. In addition to the conditions imposed on schools by the State Public Health Officer and the california Department of Education, schools must also comply with any requirements contained in this protocol.

Please note: This document may be updated as new intermation and resources become available. Go to LAC | DPH | TK-12 Education Toolkit in the latest updates to this document.

This document starts with a discussion of comprovisions for on-campus education in Los Angeles County (LAC), followed by information about safety strategies specific to the school environment.

This TK-12 protocol provides safe in the areas:

- (1) Required workplace policies and ractices to protect employee and student health
- (2) Measures that allow facility of ventilation and reduced crowding
- (3) Measures to optimize precion control
- (4) Communication with employees, students, and families of students and the public
- (5) Measures then are quitable access to critical services

Required policies and autons are grouped together in the first section, while the additional four sections contain numerical strategies that your school may choose to implement as your facility develops a plan to propose afety for all employees, students, and visitors. Although some preventive and protective measures are quired in all schools, most measures are optional and voluntary. Nevertheless, it is appropriate for schools to implement multiple layers of COVID-19 mitigation strategies to reduce risk and limit cases and transmission on the school campus. There are additional measures described in Appendix T2: Exposure Management Plan for K-12 Schools that are also required and are applicable to all on-site personnel. Further resources for TK-12 Schools can be found in the TK-12 School COVID-19 Toolkit.

General Guidance for All Schools TK to Grade 12 COVID-19 Prevention Checklist

Institution	
name:	
Address:	X

NOTE: The terms "employees" and "staff" are used in these protocols to refer to individuals tho work in a school facility in any capacity associated with teaching, coaching, student support, provision of therapies or personal assistance to individual students, facility cleaning, or maintenance, Idministration, or any other activity required for the school to function. "Employees" or "staff" may include individuals who are: paid directly by the relevant school system, paid by entities acting as contractors to the school, paid by outside entities acting in collaboration with the school to serve students, paid by third parties to provide individual student services, or unpaid volunteers acting unter school direction to carry out essential functions. The term "parents" is used in these protocols to refer to any persons serving as caregivers or guardians to students.

REQUIRED WORKPLACE POLICIES AND PRACTICES TO PROTECT STAFF ("EMPLOYEES") AND STUDENTS (CHECK ALL THAT APPLY)

- A. The school must have a COVID-19 Containment. Response and Control Plan that describes the school's comprehensive approach to preventing and containing the spread of COVID-19 on campus. The Plan includes, but is not limited to the ollowing elements:
- □ A designated COVID-19 Compliance Team is at is responsible for establishing and enforcing all COVID-19 safety protocols and ensuring that staff and students receive education about COVID-19. One member of this team is designated as a liaison to DPH in the event of an outbreak on campus.
- Protocol outlining steps that we be taken immediately upon notification of school officials that any member of the school commons (aculty, staff, student, or visitor) tests positive for COVID-19.
 - Immediate separation of the case from the school community to self-isolation at home if notification occurs while the case is on-site. The plan must allow for temporary, on-site isolation of the case if arrangements are needed for the person's return to their home.
 - Fact shorts prother informational materials that are to be given to the case (or appropriate family per ber/s if the case is a child) covering regulations governing self-isolation and links to site with further information.
- Proposition initiate <u>Appendix T2: Exposure Management Plan for TK-12 Schools</u> **consistent with DPH suidance** that outlines procedures for:
 - Isolation of case(s)
 - Identification of persons exposed to cases at school
 - Actions for exposed staff and students to mitigate additional viral transmission
 - Assurance of access to testing for all exposed students and staff within the school regardless
 of vaccination status.

	duonal
	Adherence with Case Reporting Guidance Effective August 1, 2022. Schools are required to report clusters of 3 or more cases of COVID-19 in a classroom, office, or pre-defined or identifiable group (i.e., teammates, club members, cohort, etc.) who were linked and on campus at any point within the 14 days prior to illness onset date. The illness onset date is the date COVID-19 symptoms started or the COVID-19 test date, whichever is earlier. All cluster notifications should be reported to DPH immediately, and no later than 1 business day of the school being notified of the cases by submitting a report online at: https://spot.cdph.ca.gov/s/?language=en_US or calling the TK-12 School COVID-19 Case Reporting Call Center. For any questions or assistance with reporting clusters, contact DPH by calling the TK-12 School COVID-19 Case Reporting Call Center of amailing acdc-education@ph.lacounty.gov . DPH will work with the school to determine whe her the cluster is an outbreak that requires a public health outbreak response.
	Contingency plans for full or partial closure of in-person school operations if that should become necessary based on an outbreak in the school or community. The taken has developed and circulated a communication plan in case full or partial closure is required due to a possible cluster of COVID-19 cases.
	A protocol for COVID-19 response testing. At a minimum the protocol should describe the strategy for testing for students or employees who are symptomatic or students and staff who have known or suspected exposure to an individual infected with SARS-Co-V-2 regardless of vaccination status. Note that current COVID-19 Preventions Non Emergency Regulations require employers to offer testing at no cost to employees during paintime for:
	 All employees who had a close contact with a person with COVID-19 except for employees considered recently returned COVID-19 case without symptoms ("returned cases," as defined in subsection 3205(b)(11)).
	 All employees exposed during an utback regardless of vaccination status.
	Signage is posted at each public entrace or the school informing visitors that they should not enter the facility if they have symptoms of COLID-19.
В.	Obligations for Employers and Employees at Schools
	Employees with an exposure or suspected exposure to a person who has COVID-19 must follow post-exposure guidance as o talled in <u>Appendix T2: Exposure Management Plan for K-12 Schools</u> .
	Employers are required, par the <u>Cal/OSHA COVID-19 Prevention—Non-Emergency Regulations</u> to exclude employees from the workplace who have COVID-19 symptoms. Cal/OSHA does not prescribe any particular method of employee screening but implementing some method as recommended with assist in compliance with this requirement.
	Employers are required to offer for voluntary use well-fitting medical masks and respirators, such as in N 5, K105 or KF94, at no cost to their employees who work indoors and have contact with other years, students, and members of the public, or who are in vehicles with more than one perso. Note that Cal/OSHA also requires employers to provide respirators upon request for voluntary use to any employee, regardless of vaccination status, who is working indoors or in vehicles with more than one person along with instructions on how to ensure the mask fits appropriately.

Employers	must	ensure	that n	o perso	n is	prevente	d from	wearing	а	mask	as a	con	dition	of
participatio	n in ar	n activity	or ent	ry into th	ne s	chool site	unless	wearing a	a m	ask w	ould _l	oose	a safe	∍ty
hazard.														

☐ Employees engaged in activities such as provision of physical therapy or personal assistance to individual students must be equipped with the appropriate personal protective equipment (gloves, masks, gowns, etc.)

C. Implementation of Masking Requirements

All schools are required to adhere to any applicable Health Officer Orders requiring masking in LA County and to have plans in place to communicate such requirements to the wor force visitors, parents, and students.

- Mask Exemption Policy: At times when a Health Officer Order requires this sal masking in an indoor public setting, including schools, alternative protective stratuces may be adopted to accommodate students who are on Individualized Education or 504 Props and cannot tolerate masks or in situations where use of masks is challenging due to prodagogical reasons, student safety, or an existing disability. Individuals may be exempt from a ring a mask for the following reasons:
 - Persons younger than two years old.
 - Persons who are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication.
 - Persons with a medical condition, mental health condition, or disability or whose medical provider has determined that it is unsafe for them to wear a mask, may file for an exemption with their school. A certification from a state licensed health care provider attesting that the student has a condition or disability that precludes them from wearing a mask safely will be accepted as proof of exemption. The following licensed health care professionals may provide such attestations: Medical providers including physician (MD or DO), Nurse Practitioner (NP), or Physicial Assistant (PA) practicing under the authority of a licensed physician; and licensed mental and behavioral health practitioners including Clinical Social Worker (LCSW), Clinical Psychologist (Psy.D. or Ph.D.) Professional Clinical Counselor (LPCC), or Marriage 2 and Family Therapist (LMFT).

At times when the Health Officer Outbreak Order may require universal indoor masking or may require masking for certain individuals, students who are exempt from wearing a mask should wear a face shield with a drape at the bottom, as long as their condition allows it. Schools should enter into an interactive process with individuals who would be required to wear a mask but have a valid exemption und may choose to implement alternative protective strategies when accommodating such students in school. Alternative strategies for consideration include regular (e.g., weekly) scientification of unmasked students; strategies to improve ventilation in indoor spaces that accommodate unmasked students; seating unmasked students closer to open windows, exhaust fans, hyAC intake vents, and free-standing air purifiers; and offering students and staff who share indoor air spaces with unmasked students upgraded respirator masks (e.g., N95, KN95, KF94).

Mask exemption for close contacts: Recently, County Public Health rescinded its isolation
and quarantine emergency orders for COVID-19 cases and their close contacts and replaced
those orders with <u>Guidelines for COVID-19 Cases (Isolation) and Close Contacts</u>. For
students who are an asymptomatic close contact of a COVID-19 case, it is strongly
recommended that they wear a well-fitting mask indoors around others for 10 days after the

close contact. Asymptomatic close contacts should test at least once 3-5 days after the date of exposure. Close contacts who test positive for COVID-19 need to stay home away from others and follow instructions for a confirmed COVID-19 case. Students who are identified as close contacts with a valid mask exemption who remain in school after an exposure need to monitor for symptoms for 10 days after last exposure. If they develop symptoms of possible COVID-19 infection, regardless of vaccination status or previous infection, they stay away from others and test for COVID-19. Refer to DPH's Learn about Symptoms and What to do if You are Sick. Furthermore, students, staff, and an inistrators at schools must cooperate with instructions from DPH outbreak investigators who may implement temporary strategies that differ from these protocols if an outbreak occurs at the school.

	• For employees who are unable to wear a mask, refer to Cal/OSH/ CC V2-1) Prevention—
D (Non-Emergency Regulations for return-to-work requirements alteral expective event. Communication of Protocol
	Copies of this Protocol have been distributed to all employees.
	A copy of this Protocol is posted at the school office and uploaded to public facing page on the school or district website.
	SURES TO ALLOW FOR IMPROVED VENTILATION AND REDUCED CROWDING BY STAFF, DENTS AND VISITORS (CHECK ALL THAT APPLY)
	Implementing measures to promote optimal venitation in the school is strongly recommended. These may include (check all that apply):
	The school HVAC system is in gold, torking order. Consider having the HVAC system evaluated by an appropriate engineer symmetry with the Guidance for Reopening Schools as developed by the American Society of Facting, Refrigerating, and Air- conditioning Engineers (ASHRAE)
	HVAC systems are set to examize indoor/outdoor air exchange unless outdoor conditions (recent fire, very high outside temperature, high pollen count, etc.) make this inappropriate
	Portable, high-efficiency at cleaners have been installed, if feasible
	 Doors and wirdows are kept open during the school day, if feasible, and if outdoor conditions make this oph oriate. Existing fire codes requiring closure of fire-rated doors must be respected
	Air filte smale been upgraded to a higher efficiency (MERV-13 or higher rating is preferred).
	 de to large room capacity and high-risk activities occurring on the court, improved ventilation in gy masiums is a critical strategy to lower risk of viral transmission and outbreaks occurring as a result of high-risk competitive play. Strategic use of fans to improve air exchange at floor level may have significant impact at mitigating this risk. See <u>Best Practices for Gymnasium Ventilation</u> for further guidance
	Other:

	guidance is available at the LACDPH TK-12 Schools COVID-19 Toolkit.
	Consider implementing measures to improve ventilation and promote physical distancing of students on school busses. These measures may include (check all that apply):
	Seating one child per bus seat
	Use of alternating rows
	Open windows as air quality and rider safety concerns allow
	Consider implementing measures to reduce crowding as students, parents or visitors enter and move through the school building.
	Consider offering physical education classes outdoors as much as possible
1E/	ASURES TO OPTIMIZE INFECTION CONTROL (CHECK ALL THAT APPLY TO THE FACILITY)
	Schools should actively encourage employees, students, parents, and visitors to stay home when sick. Employers/facilities need to have a way to communicate that an one with symptoms of COVID-19 and/or a positive COVID-19 test must not enter the premises.
	*Screening testing is not recommended for persons who have recovered from laboratory confirmed COVID-19 within the past 30 days and are asymptomatic.
[☐ It is strongly recommended for individuals who are risk for severe disease to wear a highly protective mask in the following settings:
	Closed spaces with poor air flow,
	Crowded places with many people real v. and
	 Close contact settings especially mile people are talking (or breathing heavily) close together.
	Schools and school districts are five to implement stricter masking policies than the current LA County guidance in order to provide a higher level of safety to all.
[Schools are encouraged to maintain signage at the entry to the school, at the entry to the school office, and throughout the school building noting that face masks are effective at preventing transmission of CC (ID-12 and other respiratory illnesses, and the proper use of face masks for those who choos to year them.
	 Parents of puriger children who prefer their child continues to wear a mask are encouraged to provide a second face mask for school each day in case the one a child is wearing gets siles this would allow for a change of the face mask during the day.
[☐ Masking is recommended for all persons in the school nurse's office or health office, unless the school nurse or other staff is working alone in the space. Maintaining a supply of masks for stude its who may develop symptoms during the school day is recommended for consistent safety of the campus.

		mended to have measures in place to promote appropriate cleaning of space, surfaces, s throughout the school. These may include (check all that apply):
•	exhibi	s are thoroughly cleaned daily and disinfected after transporting any individual who is iting symptoms of COVID-19. Drivers are equipped with disinfectant wipes and sable gloves to support disinfection of surfaces, as needed, during a run
•	Protect EPA-a example acl	ing products that are effective against COVID-19 (these are listed on the Environmental ction Agency (EPA)-approved list "N") are used according to product instructions. When approved disinfectants are not available, alternative disinfectants can be used (for ple, 1/3 cup of bleach added to 1 gallon of water, or 70% alcohol solutions). Do not mix h or other cleaning and disinfection products together—this causes toxic to meet that may ry dangerous to breathe
•	object	dial and other staff responsible for cleaning and disinfecting school surfaces and ts are trained on manufacturer's directions, Cal/OSHA equilibrium and the distribution of the Healthy Schools Act, as applicable
•	appro	dial staff and other staff responsible for cleaning and disinfecting are equipped with priate personal protective equipment (PPE), including gloves, eye protection, atory protection and other appropriate protective equipment, as required by the ct
•	All cle	eaning products are kept out of children's reach and stored in a space with restricted is
•	condit	ation is maximized during cleaning and confecting to the extent feasible. If using air tioning, use the setting that blings in free h air. Replace and check air filters and filtration ms to ensure optimal air quality.
•	freque	cooms, lobbies, break rooms and rounges, and other common areas are cleaned at the ency listed below. Routine chaning is recommended at a frequency no less than once ay during periods of peration but may be done more frequently.
	0	Restrooms:
	0	Lobbies/en y cleas:

•	Stairway entrances	
•	Elevator entry (if applicable)	
•	Classrooms	
•	Faculty breakroom	

SPECIAL CONSIDERATIONS FOR SCHOOL SPORTS AND PERFORMING ARTS

General Considerations. Physical exertion and other activities with increased or more forceful breathing, such as contact sports, singing, playing wind instruments, dancing, or enunciating during theatrical reheatsal and performances, will increase the risk of viral transmission, especially indoors and when community transmission is elevated. The COVID-19 Response Plan indicates that if the early let vietro for number of classroom outbreaks enters the high level of concern, masking will be strongly recommended for these higher risk activities. Schools, performing art classes and clubs, and yourn sports clubs and leagues are free to consider taking a more cautious approach and implement stricter masking or testing policies around these higher risk activities.

□ School sports

Any organized youth sports including school sports teams and clubs should review <u>Appendix S: Protocol for Organized Youth Sports</u> and must comply with any requirements therein to reduce the risk of spreading COVID-19. A few specific recommendations follow but are not a substitute for Appendix S.

Faculty offices:

- Even outdoor sports may include higher risk interactions that happen indoors, including travel
 on team buses, weight training, sharing locker rooms, or watching game films, among others.
 Sports programs should consider if additional safety measures are appropriate, such as
 masking in these settings, requiring vaccination, routine periodic testing, limiting number of
 participants using weight rooms and locker rooms at the same time, and moving activities
 outdoors whenever possible.
- If youth sports activities are taking place indoors, make sure your building's Heating, Ventilation, and Air Conditioning (HVAC) system is in good, working order. Vertilation in gymnasiums can be improved with strategic placement of floor fans. See Berg Practions for Gymnasium Ventilation for diagrams.

■ Music classes

- Schools may consider if current COVID-19 community metrics (see as high community transmission) call for implementation of additional safety measures when hind instruments are being played or singing is occurring in a group setting, especially indoors. Some suggestions include:
 - Individuals playing wind instruments may wear a modified face covering that allows for direct contact with the instrument mouthpiece whenever they are playing the instrument. During periods that the students are not actively practicing or performing, they may choose to switch to full face coverings.
 - Instrument bell covers are recommended to be used during playing of wind instruments.
 - Consider allowing for some physical districting (3 feet minimum recommended) any individual playing a wind instrument and all other participants.
 - o Consider performing routine screening testing at least weekly of **all** individuals participating in the indoor group practice or performance especially if masking, bell covers, and distancing are not being implemented.
 - Move these activities attoors whenever possible which will greatly reduce risks related to poor ventilation and prowding indoors. Additional preventive measures described above such as modifier masks, bell covers, and distancing can also be implemented outdoors based on evel of caution desired.
- For music activities that includes singing in a group setting, consider routine testing of all members of the group at least weekly is another consideration if singers are vocalizing without masks and without recommended physical distancing while indoors.
- Use dipotable absorbent pads or other receptacles, where possible, to catch the contents of spin values of water keys, discard or clean properly after use.

☐ The ater comeses

- Consider routine testing at least weekly for all participants if masks are not used and physical distance is not maintained while practicing or rehearsing indoors.
- Consider holding virtual or outdoor rehearsals and performances instead of indoor whenever practicable.

□ Dance classes

- During movements that generate a greater volume of respiratory droplets due to heavy exertion, consider increasing the distance between individuals and/or moving those activities to outdoor space.
- Consider routine screening testing at least weekly for all participants if masks are not used and physical distance is not maintained during indoor activity.

Music Recording

- Consider increasing distance between singers and all others in the sound booth or recording booth, especially if the vocalists are not wearing masks, due to the large amounts of respiratory droplets released into a relatively small, confined indoor space.
- If wind instruments are being played inside a sound booth with others present refer to section
 above on music classes for suggestions on how to improve safety and migrate risk.
- Other group instrumental music besides wind instruments may be recorded using a sound booth; however, consider maintaining a minimum of 3 feet of physical distance between all musicians, where practicable, especially if masks are not being used.
- Routine testing at least weekly is strongly recommended for all members of a group that shares
 a recording booth if masks are not worn by all and physical distancing is not maintained.
- Before the booth is used by another musician or group of musicians, the booth should be well
 ventilated (consider use of an air purifying device) to promote full air exchange and shared
 equipment (e.g., microphones) should be satisfied.

□ Performances

• For all performances in TK-12 so colling sored productions, consider implementing additional safety measures, especially if masks will not be worn during indoor performances. Consider routine testing at least weekly for all performers and stage crew with close contact to performers, beginning no more than 72 hours before the first gathering of the production ensemble and continuing until the end of the performance schedule.

MEASURES THAT COMMUNICATE TO THE CAMPUS COMMUNITY AND THE PUBLIC

_	Information should be sent to parents and students prior to the start of school concerning school policies related to (sheek all that apply):
	 Isolation and qual in tine policies as they apply to students who have symptoms or may have been exposed to COVID-19 Options or COVID-19 testing if the student or a family member has symptoms or has been exposed to COVID-19
	Who to contact at the school if student has symptoms or may have been exposed:
	How to conduct a symptom check before student leaves home.

The effectiveness of face masks at decreasing risk of transmission of COVID-19 and other respiratory infections, and the right of all individuals to wear a mask without threat of

interference or discrimination

	and a second sec
•	Importance of student compliance with any physical distancing and infection control policies in place
•	Changes in academic and extracurricular programming in order to avert risk
•	School policies concerning parent visits to school and advisability of contacting the school remotely
•	Importance of providing the school with up-to-date emergency contact information including multiple parent contact options
•	Other:
MEASU	RES THAT ENSURE EQUITABLE ACCESS TO CRITICAL SERVICES
	lan for updating Individualized Education Plans (IEPs) and 504 Plant of Sudents with special ds has been developed to ensure that education can continue without undue risk to the student.
•	This plan includes a method for proactive school contact with parents at the beginning of the school year to assure that issues related to the child's education and safety are being addressed.
•	Modifications to individual IEPs and 504 plans may involve remote learning, modifications to the classroom to accommodate student needs, school attendance in a separate area with few students, or a hybrid approach combining in-this and remote learning.
•	Steps taken to modify IEPs and 504 plans to sure student safety comply with relevant provisions of state and federal law.
	ninistrative services or operations that can be offered remotely (e.g., class registration, form mission, etc.) have been moved on line.
	Any additional measures not included above should be listed on separate pages, which the busiless should attach to this document.
