

# Have you been in West Africa lately?

Travelers to Guinea, Sierra Leone, or Liberia may be at risk of Ebola for 21 days after leaving.

These places are having an epidemic of Ebola, a disease that causes fever, diarrhea, unusual bleeding, and can lead to death. **If you've been there recently...**

Check for a fever twice a day for 21 days after leaving the area.

If you have fever or other signs of being sick, see a doctor right away. Talk about your travel. Ask the doctor to call the Los Angeles County Department of Public Health: 213-240-7941

**Check for signs. Call your doctor.
