All rates are per 100,000 population. Overall rates and rates by gender and race/ethnicity are age adjusted to the 2000 US population.

Rates calculated for small numbers (<20) are unstable and should be interpreted with caution.

2017 rates are calculated using 2016 population data.

Mortality data from California Department of Public Health, provided by the Office of Health Assessment & Epidemiology

Population estimates (2007-2009) prepared by OHAE, released 7/18/2013

Population estimates (2010-2016) prepared by Hedderson Demographic Services for Los Angeles County Internal Services Department
