

Measuring Quality in Public Health - Exercise 1

Please identify which one you think is population indicator and which one is performance measure.

1. Incidence rates of selected communicable diseases (Rate per 100,000 population)—Hepatitis A	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
2. Percent of Salmonellosis cases that are assigned for investigation within one working day of notification.	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
3. Percent of primary and secondary syphilis cases who received treatment within 14 days of assignment	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
4. Incidence rate of primary and secondary Syphilis cases (per 100,000 population)	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
5. Incidence rate of Gonorrhea cases (per 100,000 population)	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
6. Incidence rate of Tuberculosis (per 100,000 population)	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
7. Percent of Gonorrhea cases seen at DPH STD clinics who received treatment within 14 days from specimen collection	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
8. Percent of newly diagnosed pulmonary TB 3s and 5s, excluding B1 referrals, who have any contacts elicited.	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
9. Percent of California Children's Services (CCS) clients with Type I diabetes who required hospital admission for diabetes.	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
10. Percent of CHDP physicians who are board certified in pediatrics, family medicine, or internal medicine.	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
11. Rate of persons diagnosed with HIV infection in Los Angeles County (per 100,000 population)	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
12. Number of HIV/AIDS cases reported	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
13. Percent of contractors required to have both an evaluation plan and a quality management plan that have both plans approved	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
14. Percent of households that have developed an emergency plan	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
15. Percent of women who drink during pregnancy	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
16. Percent of DPH staff who have ever completed all of the mandatory level 1 courses in the Public Health Employee Emergency Readiness Framework 5	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
17. Percent of adults who consume five or more servings of fruits and vegetables each day	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
18. Number of persons requesting tobacco cessation assistance from the CA Smokers' Helpline	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
19. Percent of Los Angeles County adults who engage in 30 minutes of moderate physical activity 5 or more days per week	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
20. Number (total) of reported human animal bites based on bite case reports in bite report database.	<input type="checkbox"/> Population Indicator <input type="checkbox"/> Performance Measure
