

Accreditation Update 2015

Donna Sze, MPH

QI Summit

February 26, 2015

7 Accreditation Steps

1. Pre-Application

Completed Nov. 2014

2. Application

In progress
Target: May 2015

3. Doc Selection & Submission

In progress
Target: Sept. 2015

4. Site Visit

5. Accreditation Decision

6. Annual Reports

7. Reaccreditation (every 5 years)

Step 3: Documentation Selection & Submission

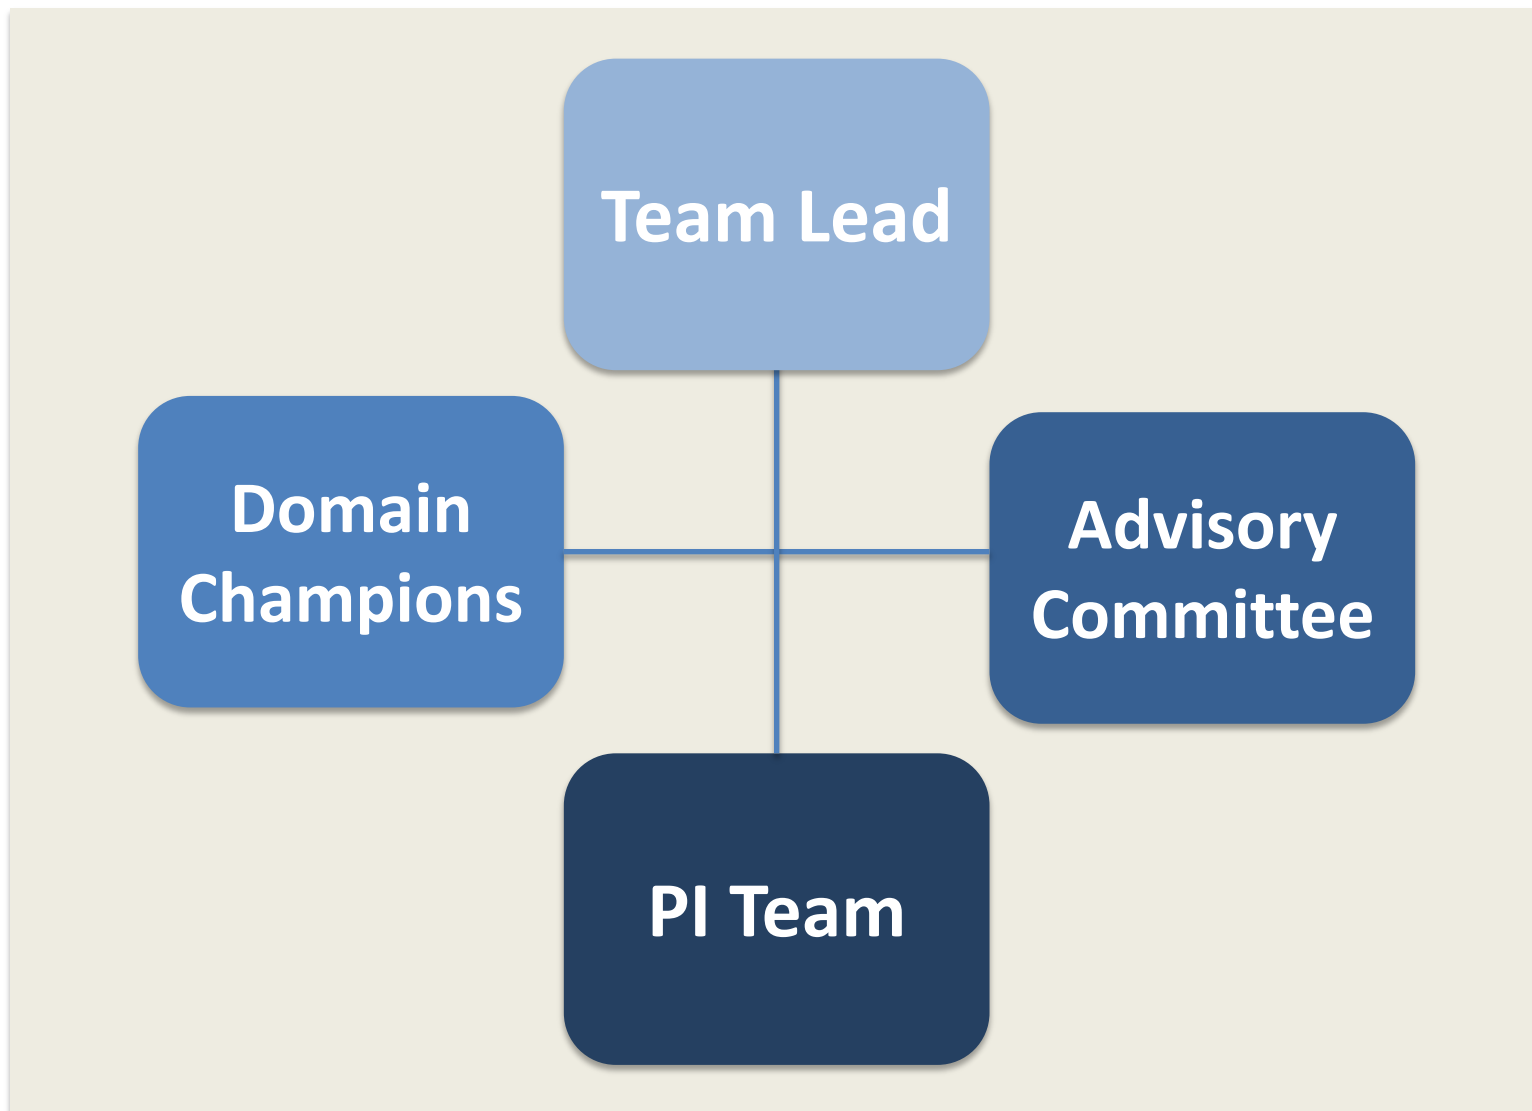

12 Domains

Documents selected and submitted address these public health functions and activities:

<p>1. Assess</p> <p>Conduct and disseminate assessments focused on population health status and public health issues facing the community</p> 	<p>2. Investigate</p> <p>Investigate health problems and environmental public health hazards to protect the community</p> 	<p>3. Inform & Educate</p> <p>Inform and educate about public health issues and functions</p> 	<p>4. Community Engagement</p> <p>Engage with the community to identify and address health problems</p> 
<p>5. Policies & Plans</p> <p>Develop public health policies and plans</p> 	<p>6. Public Health Laws</p> <p>Enforce public health laws</p> 	<p>7. Access to Care</p> <p>Promote strategies to improve access to health care</p> 	<p>8. Workforce</p> <p>Maintain a competent public health workforce</p> 
<p>9. Quality Improvement</p> <p>Evaluate and continuously improve processes, programs, and interventions</p> 	<p>10. Evidence-Based Practices</p> <p>Contribute to and apply the evidence base of public health</p> 	<p>11. Administration & Management</p> <p>Maintain administrative and management capacity</p> 	<p>12. Governance</p> <p>Maintain capacity to engage the public health governing entity</p>

TRENDS IN DIABETES: TIME FOR ACTION

Introduction
 Results from the 2011 Los Angeles County Health Survey (LAHCS) show that the prevalence of diabetes among adults in Los Angeles County is continuing to rise. From 1997 to 2011, the percentage of adults with this condition increased from 6.6% to 9.9%¹ more than 685,000 adults in the county are now affected. Obesity is the primary preventable risk factor for type 2 diabetes,² which accounts for over 90% of all diabetes cases. In LA County, the increase in diabetes has mirrored the obesity epidemic (Figure 1). Living with uncontrolled diabetes long-term can lead to severe health consequences such as heart disease, stroke, kidney failure, neuropathy, and blindness. Diabetes is the 5th leading cause of death in the County³ and the risk of death among people with diabetes is about twice that of people of similar age who do not have diabetes.⁴

Diabetes is Costly to Treat and Manage
 Diabetes is one of the most costly chronic conditions. Medical expenses for people with diabetes average more than twice as much as for those without diabetes.⁵ Nationally, the direct medical costs for individuals with this disease have been estimated to be more than \$116 billion per year, with another \$38 billion attributed to indirect costs associated with disability, productivity losses, and premature death. In LA County, the total direct cost of treating diabetes is estimated to be more than \$6 billion per year.⁶

The Continuing Rise in Diabetes
 • The age-adjusted⁷ percentage of adults with self-reported diabetes increased from 6.6% in 1997 to 9.9% in 2011; this is a 50% increase in prevalence (Figure 1).

Prevalence of Diabetes⁸ and Obesity Among Adults in LA County, LAHCS 2011

• The prevalence increased more rapidly and was higher among men (10.8%) than women (9.1%) (Table 1).

• Diabetes rates increased among all age groups; the largest increase was among adults age 65 and older, among whom nearly 1 in 4 (24.1%) reported having diabetes.

• The prevalence increased among all major racial/ethnic groups. The largest increase was among Asian/Pacific Islanders (APIs).

• Increases in diabetes prevalence were observed among all income groups.

1. The prevalence among self-reported adults in 2011 (9.9%) is reported as unadjusted and unweighted. 2. The prevalence among self-reported adults in 2011 (9.9%) is reported as unadjusted and unweighted. 3. Quality Improvement
Animal Disease Surveillance System

Program Name:
Veterinary Public Health

Team members:
Emily Bealer, DVM, MPH
Danielle Tack, DVM, MPVM, DACVPVM
Karen Ehner, DVM, MPVM, DACVPVM

DPH Strategic Priority 5: Public Health
Objective: 5.1.b Streamline internal diagnostic follow-up processes to ensure timely management of disease cases and control

Timeline: October 2013 through June 2014

PLAN

1. Getting started

- Between 2008-2013 there was an upsurge in animal disease reports (ADR), resulting from intensive outreach to veterinary clinics
- As the number of ADR increased, the staff to routinely examine and respond to reports decreased.
- Based on management team discussions, it was determined that existing protocols and procedures for animal disease investigation required modifications to ensure timely investigations.

2. Assemble the Team
All veterinarians in the program were first assembled in August 2013 to review the Animal Disease Surveillance System and find ways to all participate.

Goals

- By Nov. 1st, 2013, create new ADR database posted on our share drive for joint data entry with protocols in place for report distribution and follow up by the veterinarian team
- By the end of 2014, to have 90% of cases activated within one week of receipt, and 100% within 2 weeks of receipt

3. Examine the Current Approach

- Individual disease databases created in 2008
- All reports logged by one veterinarian in an Excel spreadsheet
- All data entry conducted by one veterinarian in to separate disease databases
- Disease databases not readily accessible to all veterinarians

4. Identify Potential Solutions

- Keep current database and Excel log system, train all vets?
- Assign incoming reports to vet on call based on day received?
- Find a way to enter animal data into vCMR or CaIREIDIE system?
- Create completely new database on VPH share drive that all vets could access?

5. Develop an improvement theory
A Staged Approach

- Train all vets on current system
- Assign cases based on day report received to vet on call
- Create new ADR database using Access for all vets to use via share drive
- Train vets on ADR database and begin all data entry

DO

6. Test the theory

- Database created
- Staff trained
- Identify and generate reports continuously
- All vets use database

7. Evaluate the Results
January-May: 409 cases activated, averaging 8.3 days to activate

56.5% of cases activated within 5 days, averaging 1.2 days to activate
69.9% of cases activated within 10 days averaging 2.6 days to activate

Month in 2014	# cases reported	# >10 days to activate	Average > 10 days	Range
JAN	33	1	13.0	13
FEB	86	20	15.2	13 to 17
MAR	60	11	32.6	32 to 71
APR	106	19	28.7	12 to 62
MAY	124	72	26.1	11 to 89
Grand Total	409	123	21.7	11 to 71

ACT

8. Standardize the Improvement or Develop New Theory
Monthly management meetings held to establish future plans and institute procedures to manage batch data.

9. Establish future plans
Monthly management meetings to review metrics and establish future plans

- Established procedure necessary to monitor and track parvo data.

10. Describe Lessons learned

- Process evaluation crucial in ensuring the quality of our disease surveillance
- Importance of regularly reviewing metrics
- Importance of establishing SMART objectives from beginning

SUBJECT: DEPARTMENT POLICIES PAGE 1 OF 1

POLICY No.: 100 **EFFECTIVE DATE:** 4/15/09

APPROVED BY: *[Signature]* **SUPERSEDES:** DHS Policy No. 101 & 103

PURPOSE: To establish an organized method for developing and communicating policies within the Department of Public Health.

POLICY: Policies are issued as standing orders covering matters of a recurring nature with universal impact on the organization and its employees. Each program shall adhere to these policies and develop procedures for their implementation.

All Department policies shall be approved by the Director or the Chief Deputy of Public Health. Once approved, the following actions will occur:

- Office of Administrative Deputy shall distribute the new policy statements or revisions with a Change Notice (Attachment I) to all manual holders to ensure that manuals are kept up-to-date.
- Public Health Policy manual holders shall read all new and revised policies.
- Public Health Policy manual holders shall ensure that their program manuals are kept current.
- Communicable Disease policies and procedures are by law determined by the Chiefs of Acute Communicable Disease Control Program, Tuberculosis Control Program, and Sexually Transmitted Disease program to be consistent with State regulations.

GUIDE: New policies or revisions to existing policies can be initiated and submitted by any program as follows:

- The submitting program shall ensure the participation of all involved programs in the development of the new or revised policy.
- New policies or revisions must be approved by the submitting Program's Executive Staff member prior to submission.

SUBJECT: UPDATE ON INVASIVE MENINGOCOCCAL DISEASE COMMUNITY EDUCATION PLAN

This is to provide you with an update on actions the Department of Public Health (DPH) has taken to address community outreach and education regarding invasive meningococcal disease (IMD). On April 7, 2014, I notified your Board about an increase in this year's cases of IMD among men who have sex with men (MSM), including those who are HIV-positive, and new vaccination recommendations issued by DPH. On April 25, 2014, I notified your board about the successful vaccination efforts through DPH clinics and distribution of vaccine to community providers, along with the plans for community education. In this memo I will update you on our continued efforts to develop materials for community education.

Development of Community Education Materials

DPH has convened a work group of community partners that work with gay and bisexual men and other MSM to discuss development of materials for community education about IMD. DPH held meetings with this group of stakeholders on April 3, April 17 and April 18, 2014. The resulting community education plan consists of development of the following materials: community education materials and media buys; social marketing messages targeting the gay community; and a training tool-kit and Speaker's Bureau for HIV service providers. Each of these are described in more detail below.

Community Education Materials

DPH is working through an existing media contractor to develop new educational materials in English and Spanish for use across print, outdoor and digital platforms. The campaign, entitled, "Stop before You Swap," and the "Don'tSwap.com" URL, were chosen for their simplicity and directness.

12.1.1 A	Define Public Health Roles, Responsibilities, and Authorities
12.1.2 A	
12.2.1 A	Inform governing entity about public health responsibilities
12.3.1 A	Engage governing entity in public health responsibilities
12.3.2 A	
12.3.3 A	

Next steps

- **Complete Step 2 (application) by May 2015**
 - Complete CHA, CHIP, Strategic Plan
 - Letter of Support

- **Complete Step 3 by September 2015**
 - Collect all documents & address gaps
 - Review process for documents selected
 - Submit documentation to PHAB

Review Process

1. Review by Teams:

- Volunteers will be invited to help with the review process
- Each team will review docs for several measures
- Estimated time commitment:
2- 4 hours per review team

2. Review by Domain Champions:

After the teams complete a review, Domain Champions will complete a second round of review for their domain.

Proposed Review Teams
