

# KEEP PETS SAFE & HEALTHY IN THE HEAT

## NEVER LEAVE PETS IN THE CAR

Hot cars can be deadly. Call 9-1-1 if you see a pet or a child in a car alone.

## AVOID HOT SURFACES

Feel the ground before your pet walks on it. Avoid surfaces like asphalt that may burn your pet's paws.

## OFFER WATER & SHADE

Make sure your pet has access to clean, cool water and a shaded area at all times. Move indoor pets, like fish and birds, away from windows or direct sunlight.

## WATCH FOR HEAT STRESS

Excessive panting, drooling, weakness, and reluctance to move in a pet may be caused by heat stress.

## STAY COOL

Call 211 for pet-friendly Cooling Centers where you and your pet can go for free to stay cool.
