

# Canine Influenza and Leptospirosis Vaccine Providers in Los Angeles County

**DISCLAIMERS:** This is not an all inclusive list. Los Angeles County Department of Public Health does not endorse any hospital or service. All information on this list was self-reported by the facility and may change. Call the facility or check the facility's website for the most up to date information including facility hours of operation, vaccine availability, hospital and vaccine policies, and COVID-19 policies. Note that a clinic may require an appointment with their veterinarian and a physical exam. This is because the State of California Veterinary Medical Board requires a veterinarian to have an established Veterinary-Client-Patient relationship before administering vaccines. See [https://www.vmb.ca.gov/laws\\_regs/vmb\\_act.pdf](https://www.vmb.ca.gov/laws_regs/vmb_act.pdf). The Los Angeles County COVID-19 Health Officers Order, including the requirement for humans to wear masks indoors, is still in effect. A copy of the Health Officer's Order can be found here: [http://publichealth.lacounty.gov/media/Coronavirus/docs/HOO/HOO\\_SaferReturnWorkCommunity.pdf](http://publichealth.lacounty.gov/media/Coronavirus/docs/HOO/HOO_SaferReturnWorkCommunity.pdf)

Canine Influenza and Leptospirosis vaccines are both given as **TWO** separate doses 2-4 weeks apart, then boosted annually thereafter. Pets should wait 2 weeks after receiving the second dose of vaccine before entering a facility to allow for immunity to develop and to be considered fully vaccinated.

For more information about the canine influenza outbreak in Los Angeles County see here: <http://publichealth.lacounty.gov/vet/InfluenzaCanineH3N2.htm>  
 For more information about the canine leptospirosis outbreak in Los Angeles County see here: <http://publichealth.lacounty.gov/vet/Leptospirosis2021.htm>
