

WILD BIRDS CAN SPREAD H5 BIRD FLU

Avoid direct contact with wild birds

People should avoid direct contact with wild birds and observe them only from a distance.

Wild birds can be infected

Wild birds can be infected with avian influenza viruses even if they don't look sick.

Do not touch

Avoid surfaces that may be contaminated with saliva, mucus or poop from wild or domestic birds.

Wash your hands

Always wash your hands thoroughly with soap and water after contact with birds.
